SAFETY CODE FOR HANDLING PESTICIDES
National Agricultural Chemicals Association

1. Always read the label before using herbicides. Note warnings and cautions each time before opening the container.

2. Keep herbicides out of reach of children and pets. They should be stored outside of the home and away from food and feed.

3. Always store herbicides in their original containers, and tightly closed. Never transfer herbicides to anything but the original container.

4. Never smoke while applying herbicides.

5. Avoid inhaling herbicides. Always wear protective clothing and masks.

6. Do not spill herbicides on the skin or clothing. If a spill occurs, remove the contaminated clothing immediately and wash thoroughly.

7. Wash your hands and face, and change to clean clothing after applying herbicides. Also wash clothing each day before reuse.

8. Cover food and water containers when applying herbicides around livestock or pet areas. Do not contaminate fishponds.

9. Use separate equipment for applying hormone-type herbicides in order to avoid accidental injury to susceptible plants.

10. Always dispose of empty containers so that they cannot harm humans, animals, or valuable plants.

11. Observe label directions and cautions so that herbicide residues on the edible portions of plants are within the limits permitted by law.

12. If symptoms of illness occur during or shortly after spraying, call a physician or get the patient to a hospital immediately.

IN CASE OF EMERGENCY:
Contact the POISON CONTROL CENTER for your state, or call Chemtrec.
