The University of Wyoming requests your response of qualifications to provide consulting and testing services for an investigation of the existing roof and ceiling systems of the 107,946 square-foot dome roof on the University of Wyoming Arena Auditorium. The Arena Auditorium was built in 1982 and the most recent roof replacement is reaching the end of its estimated useful life.

The University is seeking qualified firms to investigate, analyze and evaluate the current condition and performance of the existing roof and ceiling systems. The selected firm will make visits to the project site to observe the current condition, identify deficiencies, document known issues, conduct system verification testing and sampling to determine the remaining useful life of the existing building roof and ceiling components. The selected firm will also advise as to satisfactory methods for corrections of observed deficiencies and recommend enhancements to operations and maintenance (O&M) programs to preserve and extend the remaining useful life of the existing roof and ceiling systems.

Anticipated project deliverables may include but are not limited to; investigation plan, field observation reports, performance verification test reports, and corrective action reports.

Bid documents are available by logging on to Public Purchase at www.publicpurchase.com.

Only bids submitted electronically through the Public Purchase site will be considered.
