Bread in a Bag

Ingredients:
- 1 ½ cups whole wheat flour
- 1 package rapid rise yeast*
- 3 tablespoons sugar
- 3 tablespoons non-fat powdered milk
- 1 teaspoon salt
- 1 cup hot water (125-130°F Fahrenheit)
- 3 tablespoons vegetable oil
- Up to 1 ½ cups all-purpose wheat flour
- ½ cup oatmeal

Supplies:
- thermometer
- heavy-duty freezer bags with zipper-style closure (1-gallon size)
- greased baking sheets or greased mini-loaf pans
- measuring cups and spoons

Directions:
1. Wash hands thoroughly.

2. Combine 1 cup whole wheat flour, undissolved yeast, sugar, powdered milk, and salt in freezer bag. Squeeze the upper part of the bag to force out air. Seal the bag. Shake and work the bag with your fingers to blend the ingredients.

3. Add hot water and oil to the dry ingredients. Reseal the bag. Mix by working the bag with your fingers. Add remaining whole-wheat flour; reseal the bag and mix the ingredients thoroughly. Add oatmeal; reseal the bag and mix thoroughly.

4. Gradually add enough all-purpose flour to make a stiff dough that pulls away from the bag. For best results, be careful not to add too much flour.

5. On a lightly floured surface, knead the dough for 2 to 4 minutes, or until it is smooth and elastic. For best results, let rise until double in bulk. After rising, pull off pieces of dough and roll them into bread sticks (approximately 3/4" thick, 6-8" long). Place on greased baking sheet. Bread sticks can be twisted, shaped as pretzels or letters, or left straight. As another option, dough can be shaped into small loaves and placed in greased mini-loaf pans.

6. Bake at 375°F Fahrenheit for 15 minutes or until brown.

* At high elevations (over 5,000 feet) regular yeast may work better.
