Dementia Support Center
Wyoming Center on Aging

The Dementia Support Center at the Wyoming Center on Aging provides education and home and community-based services to support the well-being of persons with dementia, their family, and friends.

Programs offered:
TCARE | SHARE | CarePro | Supported Independence

Look inside for more information!

---

**Our mission:**
Enhance the dementia-capability of our community through education, and provision of home and community-based services.

---

Our services are available **FREE** of cost thanks to the Administration for Community Living.

---

The Dementia Support Center was created to serve people with dementia who are living in Albany County, Wyoming. However, we will do our best to serve any person in Wyoming who may benefit from these services.
The early stages of dementia can be an important time to prepare for the changes that lie ahead. The SHARE program empowers persons living with dementia and their families to get the most out of today while planning for tomorrow.

**SHARE helps families by:**
- Improving family communication
- Increasing families use of services
- Creating better care plans for the future

**TCARE®** care consultants identify caregivers’ risk of stress and burnout and equip family caregivers with the right resources and services based on tailored care plans for every unique caregiving journey.

**How will the TCARE® program help you?**
Extensive research has shown that the TCARE® program can:
- Lower your stress
- Improve your health
- Help you communicate with other family members
- Improve care for your family member
- Extend the time that you are able to care for your family member at home

**Supported Independence**
The Supported Independence program helps to maintain the health, safety, and independence of persons with dementia who may need additional support.

**The program includes:**
- Safety assessments
- Companionship visits and phone calls
- Health education
- Efforts to strengthen formal and informal supports

**We also offer:**
CarePro—a group support and education program for caregivers of persons with dementia.

Dementia screening for people with intellectual and developmental disabilities (IDD) who may have or be at risk of dementia.

Training programs for community members, first responders, health care and service providers to increase their ability to provide dementia-capable care.

**Not sure which program is right for you?**
