WYOCLOUD FINANCIAL MANAGEMENT & HCM OPERATIONAL AFTER UPDATE

Greetings,

WyoCloud Financial Management and HCM are **now operational and accessible** after this weekend's update.

As previously shared at the [Monthly Finance and HR Deep Dive presentation on Thursday, May 20th](#), users may see a new feature in the expenses module while creating expense items. When creating new expense item, the system may detect if the expense is a duplicate based on various factors. When this happens, a pop-up window will display noting the current expense and the duplicate expense either from a previously submitted expense report or a recently created expense item not on an expense report yet. Users have the option to keep both expenses or to delete the current expense.

Best,

The WyoCloud Team
