### PRESENTATION DESCRIPTION

An important tool for identifying and reducing hazards in any industry; a job hazard analysis (JHA), also called a job safety analysis (JSA), is a technique to identify the dangers of specific tasks in order to reduce the risk of injury to workers. This presentation will discuss the following items:

- Regulatory driver—OSHA's requirements for a safe workplace and programs/policies/ procedures
- Managing risk—injury cost to employers, human error and behavior, employer defense, fun examples
- JSA/JHA:
  - Purpose—hierarchy of controls, stop work authority
  - When needed and where used
  - Who prepares them
  - Difference between JSA and: FLHA, pre-task planning, tool box talks, etc.
  - Continual improvement/evaluation—the “plan-do-check-act” process
- Constructing—“how-to” and templates, safety committees, front-line worker involvement, peer-review.
