Overview

This course will help local agencies maximize the value received from their investments in asphalt paving. Important considerations for design and specifications will include a focus on durability considering what is locally available. It will provide the tools and knowledge to construct, inspect, and test, or manage the construction, inspection, and testing, to make sure the desired product is obtained. Topics will include: patching, surface preparation, mill and fill, and new construction, as well as how new technologies can be applied. Strategies for bidding and scheduling work to minimize costs will also be included. The class will provide information for management-level decision-making and to help field staff understand the principles behind quality pavements, and will provide guidance for inspection and testing staff as well.

Who should attend?

This workshop should be attended by city and county engineers, consultants, WYDOT personnel, street maintenance supervisors, construction technicians, maintenance crew leaders, and street maintenance workers.

Instructor

Mike Robinson:

Mr. Robinson has more than 30 years’ experience across the country in the heavy civil industry, working for a large state agency, as a contractor and materials producer, and as a consultant. His primary focus is flexible pavements and aggregate materials including pavement design, quality management, troubleshooting, maintenance and rehabilitation techniques, constructability reviews and value engineering, and construction claims support. He is a graduate of the University of Wyoming, and is active in local and national pavement and industry associations, and Transportation Research Board standing committees, and is a member of the Association of Asphalt Paving Technologists. He is a registered Civil Engineer in Wyoming, Nevada, California, and Arizona. More information can be found on his website: MikeRobinsonLLC.com.

Date/Location

**October 27, 2020**

Clarion Hotel
2518 Foothill Blvd.
Rock Springs, WY 82901

**April 29, 2020**

The Bozeman Trail Steakhouse
675 E. Hart St.
Buffalo, WY 82834

The workshop is **$65.00**, which includes lunch, breaks, and all class materials.

**CANCELLATION POLICY:** All registrants will be billed unless cancellations are received at least 48 hours prior to the workshop.
