

OSHA 10-Hour Training

November 23, 24, & 25

Online

Wyoming Technology Transfer Center

Local Technical Assistance Program

OSHA 10-Hour Safety

The OSHA 10-hour training program includes prevention of safety and health hazards in the workplace, information regarding workers' rights and employer responsibilities.

This training helps give employees the information they need to be able to identify and correct hazards they may encounter in a construction environment by focusing on key safety issues. This interactive training will help sharpen participant skills and better prepare them for work in what can be a hazardous occupation. DOL-OSHA course completion cards will be provided to participants upon graduation.

Overview

In an effort to promote social distancing and limit travel, OSHA has decided to move all training courses to an online format. Due to the online nature of this course, it will be taught over a 3-day period. All attendees will meet with the instructor over Zoom to conduct the course, and all materials will be given to them electronically.

Course Requirements

- Download Zoom
- Access to a webcam with audio & video
- A valid email address for course documents

Instructor

Robinson Vasquez

Date

November 23, 24 & 25

8:00AM—12:00PM each day

Location

Online

Price

\$95.00

This includes class materials.
