TERM PAPER PROPOSAL SHEET
Zoology/Botany 4100, Spring 2012

Due to Michael Dillon by February 8, 2012

Student name: ___________________________

Subject or title of term paper: ______________________________________________________
___________________________________________________________________________
___________________________________________________________________________

We have met and discussed the proposed title/topic of the term paper, which will contribute one half of the course grade in ZOO 4100 or BOT 4100. We have discussed and agreed upon a meeting schedule to discuss the term paper, and the content/discussion instructor has explained the criteria for how the paper will be graded. This includes when drafts and the final copy are due, and how points will be allocated to draft and final versions. We understand that should there arise a contradiction between how writing is taught by Dr. Dillon and by the content/discussion instructor, the preferences of the content instructor will have precedence.
