

Recruiting System Update Live

The Recruiting system update is now live. Effective immediately, users will notice an updated look and feel of the hiring system as well as some adjustments in functionality. This update moves the university's recruiting and hiring system away from using Flash, as support for this software is ending at the end of the year.

Additional information and a demo of the update was offered during a June 25th Deep Dive, a recording of which is available [here](#). In addition all Quick Reference Guides have been updated and can be found [here](#). Human Resources is also offering Zoom based help sessions. A full list of these and registration is available in the Employee LearnCenter's [Course Catalog](#), search Recruiting.

If you encounter any issues while using the updated recruiting system, please complete a [Recruiting Service Request](#) and a member of the Human Resources team will be in touch.
