

CORI SIEKERT

MANAGER, CYBER SECURITY
SERVICE, KPMG LLP

Bachelor of Science 2016, Accounting

Cori Siekert is currently a manager for KPMG LLP, providing cyber security consulting services to clients across industries such as telecom, technology, federal government services, and manufacturing. She joined the firm as an associate in the Technology Assurance team, supporting the financial audit teams with annual audit filings for clients. After two years, she transferred to the Cyber Services team, specializing in diagnostic assessments for certifications efforts, but also providing business continuity and cloud security services. In addition to her client services, she leads a team to develop and present professional and personal improvement content in quarterly calls for KPMG's Women in Cyber group to support other women in technology and consulting.

Ms. Siekert graduated from the University of Wyoming with a BS in Accounting in 2016 and in 2019, she returned to the College of Business for the Inaugural Women in Business panel.
