### Container Content List

#### Container Content Description Level Key:

Item	The contents are individually placed into the container (i.e. artifacts, books, compact discs, cassette tapes) and may have no relation to each other or to the rest of the container contents, so each item is listed individually.
File	The contents have been arranged by the collection creator into discrete components or units (i.e. folders, three-ring binders, bound volumes) which, where possible, have been identified and listed by the descriptive titles or headings originally assigned by the collection creator.
Container	The contents are not identified or are not arranged into any identifiable order, so only the types of material present, and very little of the intellectual content, was listed.

Please Note: Multiple description levels may be applied within the same container as needed depending upon the arrangement of the contents.
