Current Position

Professor, Anthropology, University of Wyoming (1997-present)

Robert L. Kelly is an internationally-known authority on the archaeology and ethnology of hunting and gathering societies. He has participated in research projects in western North America since 1973. He is a past-president of the Society for American Archaeology (2001-2003), and past-editor (2015-2018) of the Society's flagship journal, *American Antiquity*. He has authored over 100 articles, reviews, and books, including two archaeology textbooks, *Archaeology*, in its 7th edition, and *Archaeology: Down to Earth*, in its 5th edition, both co-authored with David Hurst Thomas; *The Lifeways of Hunter-Gatherers* (Cambridge University Press, 2013); *The Foraging Spectrum* (Smithsonian, 1995) and *The Fifth Beginning: What Six Million Years of Human History Can Tell us About Our Future* (October, 2016; translated to Chinese, 2018). In 2017 he received a Senior Humboldt Research Award (Germany). He has served as a department head (9 years) and Director of the Frison Institute (3 years). He has lectured in many countries, has received over \$1.3 million in grant funding, and currently researches the use of radiocarbon dates as measures of prehistoric population, long-term effects of demography and climate at a rockshelter in the Bighorn Mountains, ice patch archaeology in the Rocky Mountains, and paleoindian mammoth hunting.

Current Research

Current research focuses on hunter-gatherer demography (studied from 14C dates) and links to climate change; the nature of Pleistocene colonization of the Americas, focusing on the question of why fluted point age occupations are relatively rare in caves and rockshelters; use of rockshelters in Bighorn Mountains; high altitude adaptations in Rocky Mountains.
