Saturday, April 8th at 11:30 a.m.
Lander Valley High School, 350 Baldwin Creek Rd.

Keynote Speaker

Mike Kintgen

Denver Botanic Gardens

Presenting

**Rocky Mountain
Native Perennials for
Wyoming Landscapes**

Mike Kintgen is a popular international speaker with a passion for rock gardening and botanic travel. Curator of Alpine Collections at the Denver Botanic Gardens, he oversees eight gardens. He has lectured on steppe and high elevation floras found in semi-arid regions around the world including Europe and South America.

Mike has worked full time at DBG since late 2004, but has volunteered since the mid 1990's. In 2012 he finished a two year project to have DBG's collection of alpiners recognized in the North American Plant Collection Consortium through the American Public Gardens Association. He interned at both the Chicago Botanic Gardens and at the Rhododendron Species Foundation under Steve Hootman. He has been a member of North American Rock Garden Society (NARGS) since 1993 (age 12) and is a former president of the Rocky Mountain Chapter of NARGS. He has observed alpiners in Alaska, Hawaii, Argentina, Morocco, Spain, the Alps, and throughout the American West.
