Wyoming’s College of Business (COB) 2019-2022 Strategic Plan is structured around five priority areas, which are aimed to leverage the college’s identity and potential to lead in an age of constant change and digital innovation.

The COB offers AACSB-accredited programs at the bachelors, masters, and doctoral degree levels. Composed of three academic departments, the COB’s 55 faculty teach nearly 30,000 credit hours (Fall ’19 and Spring ’20) to 1,300 business students as well as service majors from other colleges across the University. As part of an R2 institution, the COB prioritizes and supports academic scholarship across the college and is a recognized leader in environmental and natural resource economics, as well as other major areas of business. The college is supported by world-class learning facilities and Centers of Excellence that meet the demands of a 21st century business education.

The core of our plan features five goals covering student success, teaching and learning, research and creative activities, community engagement and global partnerships. Under each goal, our plan identifies objectives along with specific baseline and progress indicators.

Opportunities abound in Wyoming. As the state’s only College of Business, we play a critical role in re-imagining higher education, considering ways to enhance economic development, expanding new forms of work-force training, and diversifying the Wyoming economy. We are committed to the following priorities as informed by our strategic plan:

• Continue momentum to create a leading student experience supported by the Green Johnson Student Success Center; a comprehensive unit integrating enrollment, advising, and career development
• Enrich our research and scholarship by retaining and supporting our top faculty
• Engage the state to support economic development, workforce training, and diversification of the state’s economy
• Continue expanding the quality, support, and accessibility of our online programs
• Increase global connections for our students, faculty, staff and programs

Our strategic plan will help guide the school’s growth in an era of increasing competition and greater challenges for higher education as an industry.

The college’s long-standing history of serving the state will be critical as we look forward to increase that commitment by leveraging the expertise and resources of its flagship school.

Best regards,
