

Legacy Molding, Riverton, WY

<http://legacymolding.com/>

For over a decade, this company has been serving customers across many industry segments, providing parts ranging from basic - to those with extremely challenging geometry *and* tight tolerances. In addition, Legacy Molding has experience with hundreds of different materials - providing first-hand knowledge of their characteristics in the press and the impact on the finished component. Since its inception, the cornerstone of **Legacy Molding's** operating principles has always been the mandate to provide customers with rapid turn around and problem solving during each phase of the project. Transforming a *difficult process* into a *controlled process* is their strength.

Summer Intern: ideal candidates will be able to work with SolidWorks and probably be majoring in Mechanical Engineering. Although, other engineering majors with SolidWorks experience and interest working with a company that created molds for industry manufacturing is encouraged to apply. Position will be part-or-full-time during the summer (based on needs of the students) and will be paid hourly.

Send a resume to Rob Wright at Rob@legacymolding.com; candidates can call 307-857-1111 ext. 101 if wanting to ask questions about the position, the type of work to expect, and hours of week anticipated.
