

# CLASSROOM VISITS

LET US COME TO YOU...

## OUR OUTREACH TEAM:

Our team of CEPS Student Ambassadors can visit classrooms, virtually or in person, to encourage the exploration of the engineering design process.

- **HANDS ON LEARNING:**  
We can design a lesson and activity based on your target objectives.
- **SUPPORT AND COLLABORATE:**  
We can support your lesson and provide support to students by working with small groups and offering an engineering student's perspective.
- **ASSESS AND EVALUATE:**  
Have a final project or contest? We can judge or assess and offer an engineer's feedback.
- **INFORMATION:**  
Want your students to know about engineering and what engineers do? We can come and show them.
- **DEMONSTRATION:**  
We can visit your class and demonstrate projects or designs that align with your learning goals and objectives.

**Need something else? Let us know, and we will do what we can.**
