**Halliburton:** Oct 10 - 5:00pm - EN3076

---

## Career Preparation Program

Thursday, Sept 27 - 12:10-1:00pm in EN1062

### Engineering a Business by Casey Gregersen (UW Alum)

Robert Kiyosaki, *Rich Dad Poor Dad*, wrote “Why climb the ladder when you can own the ladder?” After just starting their professional careers, most students set their sights immediately on how fast they can climb the ladder to CEO or VP of their new employer. But, what if there was another, even more fulfilling option? What if you could instead use your skill set, lean on mentors and other professionals, build your own company and have everyone work for you?

**Casey Gregersen** graduated with Masters in Petroleum Engineering in 2012 and completed his Masters Thesis under the guidance of **Dr. Alvarado**. Casey took a full time job with Shell as a Drilling Engineer, but quickly found *that he really enjoyed the business side of everything*. Thanks to a flexible field rotational schedule, working 2 weeks in the field and then having 2 full weeks off at a time, Casey decided to take the plunge and kick started his own business with his wife Annie. Together they opened Pure Barre Midland in 2016, which turned out to be a great success but most importantly, taught Casey the business skills necessary to start to build a company in an industry he was most passionate about, Real Estate!

Lunch provided

**Student Career TREK**

**Live Local Work Local (LLWL) -Fremont County, WY**

Nov 4-6, 2018  
(excused absences apply)

The **LLWL Student Career TREK** is an opportunity for UW students to meet with industry leaders and emerging professionals in the beautiful central Wyoming communities of Thermopolis and Riverton surrounded by mountain ranges on all sides. Events that may be included in this trip, but not limited to: company site visits, employer panels, networking with UW alumni, mock interviews, business discussions, and the potential to uncover an unexpected employment opportunity!

Students will be selected from an application process (an email will arrive soon with details and how to apply). Travel, hotel, meal expenses are paid by sponsors. For engineering/computer science students who attend, here are companies being considered for site visits:

**\*Oilfield/Energy:** McCumber Well Service, Merit Energy, Champion, Devon, Aetheon, Conoco Phillips

**\*Engineering/Technology:** Pertech, Brunton, Legacy, Hi Mountain, Proform, ChemTrade, Gores & Associates, Inberg Miller, Apex

**\*Construction:** Ad Martin Truss, Job Corp

**Deadline to apply is Oct 5, by 11:59pm - check your UW email for "Call for Applications"**

---

## **SWE Student Career TREK - visited these companies: Sept 10-12, 2018 Silicon Valley, CA**

**Angel Investor at Sand Hill Angels** - met with Laura Swan, UW alum

<http://www.sandhillangels.com/>

**Apple** - met w/ Colter Reed, UW Alum

<https://www.apple.com/jobs/us/students.html>

**Autodesk** - organized by Angie Schrader, UW Alum

<https://www.autodesk.com/careers>

**JLohr Winery** - met with Jeff Humphries, UW alum

<https://www.jlohr.com/> and <https://www.jlohr.com/careers>

**Plenty** - met w/ Nate Story, UW Alum

<https://www.plenty.ag/join-us/>

**Safeway Corporation, IT/Cyber Security** - met w/ Kathleen Smith, UW Friend/Donor

<http://www.careersatsafeway.com/corporate>, (scroll to IT)

**Suki** - met with Punit Soni, UW Alum

<https://www.suki.ai/working-at-suki>

Each company hires different majors; the alums we talked with indicated that UW students might want to research the company of interest and determine if they want to apply for employment. Company contacts can be provided if seeking more information; contact Ann Jones in CEAS career services for more information; or contact members of the UW Society of Women Engineers who attended.

## **Internships/Jobs received via email this week (apply if interested)**

**WENCK, Cheyenne, WY** is seeking an Entry-level Engineer to support civil, water resources, and environmental compliance projects for their state, municipal and private clients. The successful candidate will support work related to water supply and storage projects and environmental compliance, including hydraulic and hydrologic modeling, air quality permitting, SPCC plans, report preparation, engineering design, permit applications, preparation of construction and bid packages, and construction management. This entry level position will require some travel to remote sites. Engineering degree from an ABET accredited engineering school, with an emphasis in civil, mechanical, water resources or environmental engineering. Full job description can be found here: <https://www.wenck.com/current-positions/project-engineer/> click on the "Apply Now" button if interested.

**Tesla**, has internships/co-ops listed on their website:  
<https://www.tesla.com/careers/students> Autopilot Computer Vision Internship, Automation Controls, Autopilot, Hardware Performance; apply as their directions indicate.

**Long Building Technologies** has multiple full-time (post-graduation) positions open as they are rapidly expanding. This company has been in business for 52 years and have a foot print in WY and MT. They are hiring in the following locations: WY: Cody, Gillette, Buffalo, Sheridan, Jackson, Casper, and Cheyenne; MT: Billings, Helena, and Missoula. Go to this website to see various positions and how to apply  
<http://www.long.com/career-opportunities/job-openings> Other questions can be directed to Savannah Urban at [surban@long.com](mailto:surban@long.com).

**Lockheed Martin, Littleton, CO**: an email notice was received that L.M. just announced a big staffing effort, basically staffing an entire missile program as soon as possible; multiple jobs just opened in Littleton CO, Valley Forge PA and Huntsville AL see positions posted on their website:  
<https://www.lockheedmartinjobs.com/>
