

## Qualitative Research Methods Minor

### Program Details

The purpose of the minor is to provide graduate students access to a sequence of qualitative methods courses to enhance their understanding of research methods. This concentration of courses also provides our graduates a documented way to demonstrate to potential employers that they have academic preparation in qualitative research methods.

This minor requires 16 credit hours of qualitative research method courses and an internship experience in which students co-teach a methods course with a faculty member. [Learn more about our program outcomes.](#)

### Required courses
