

OCTOBER

All of a sudden, it's October. This month marks the half-way point in the semester. In October, you'll likely have a midterm exam or a major project in every class. For many students, this part of the semester brings academic stress and anxiety. On top of that, many students experience social stresses and homesickness. These academic and personal pressures may sound scary, but these challenges also offer opportunities to get to know yourself and your campus resources. In this chapter, we'll cover both the stresses and the resources. You'll learn about Early Alert, midterms, and anxiety; you'll also encounter study plans and campus resources like the Counseling Center and Coe library that can help you develop skills and approaches to October's challenges. October is challenging, but you can do it!

LOGISTICS

EARLY ALERT FEEDBACK

Early Alert is a program that is run through the advising app, Navigate. It allows faculty to provide academic feedback on student performance during the 4th week of classes, long before mid-term grades are assigned. The goal is to give you a glimpse of your early performance in each class.

This alert encourages you to speak with your instructors and/or seek academic support services such as tutoring and Supplemental Instruction. If you receive an academic concern from an instructor in one or more of your classes, don't panic! Your advisor and RA will reach out to you to check in and help you formulate a plan to move forward. This is an opportunity to seek academic/personal help and discuss your options with your instructors and advisors. You can also find your Early Alert info in the Navigate app.

Student Voices: EARLY ALERT

“Early Alert is so beneficial for students' academic success because it is a great gauge on how not only you think you're doing in classes, but how your professors and teachers see how you are doing in the course as well. It really is an 'Early Alert' which helps you better improve your performance in courses before it is too late.”

Zach Winslow, UW Student

Faculty Voices: EARLY ALERT

“I'm glad we have this system in place. It shapes the way I think about my students' grades in general, and that has changed some of the language I use about grades in class. I reached out to one of my students due to the Early Alert, and it turned out to be a very pivotal moment to do so.”

“This is a wonderful system to identify struggling students much earlier during the semester and offer advice/resources to improve their learning. If the system helps one student to succeed in college, then it is worth my time as an instructor to use it.”

PREPARING *for* MIDTERMS

Even though mid-term exam week is on the calendar all along, it can sneak up on students. Generally, each of your classes will have a major exam, paper, or project due at or around mid-term week. This can be stressful if it catches you off guard, so it's best to prepare for mid-term week in advance.

“ My hardest midterm was my first semester. I was just getting used to the college life and figuring out what I needed to do and how to study. I felt very overwhelmed and stressed to the max. I didn't have a large work load, but I had a lot of studying to do for the exams I had the following week. I focused on the things I needed the most help on.”

-Kassondra Giacchino, *UW Student*

“ My first midterm week was a real wake up call. No one prepared me for what it would be like. I was a mess because I didn't know what to study, what was the best way to study for me, or if I was giving each class the right amount of my time. I studied for some classes super hard, and others not as much as I needed to. In one class, we did an early quiz and I did well on it. For the midterm, I totally bombed it. Now I know to deal with the stress by talking with my friends, taking time to eat, and spacing out my studying so I don't stress too hard.”

-Olivia Balanoff, *UW Student*

Seven Day STUDY PLAN

Since last-minute cramming usually doesn't work out well, keep the following 7-day study plan in mind (although some exams will need more than one week of preparation). Study a maximum of 2 hours at a time before taking a break, and attend any review sessions offered during the week.

DAY ONE	Organize all your notes, handouts, and materials you'll need to cover. Check to see if anything is missing. Prioritize what will be most important to study through what is least important to study. Divide your study materials into at least three sections (sometimes the teacher does this automatically through the course units—you might divide by date, topics, etc.). You can also break this down by "lecture notes" and "book notes." *Some students re-write or re-type their class notes at this point; others find this strategy unhelpful.
DAY TWO	Study/review all the materials for the first section you identified, both in the course book(s) and in your own notes. (If you are breaking things down by lecture/book, study one or the other).
DAY THREE	Study all the material in the second section.
DAY FOUR	Study all the material in the third section (if relevant).
DAY FIVE	Meet with a partner or small group to compare notes, formulate possible test questions, and quiz each other. Review ALL material.
DAY SIX	Study/review your weakest sections.
DAY SEVEN	Study/review ALL material.

Tips: Think positively! Get a full night's sleep the night before an exam. Eat light, and eat healthy before the exam to keep the blood circulating to your brain. And, most importantly, spend 5-10 minutes after difficult classes reviewing your notes, and 30 minutes each week reviewing the whole week's notes. This will make a BIG difference in your ability to ace the material and study effectively.

Other Notes:

- Talk to the professor before a test that you're worried about. Request their advice for covering material and studying effectively. Ask them about pitfalls students in the past have made on the exam.
- If you are very anxious, study in the classroom where the exam will be held at least once. Visualize yourself taking the exam and knowing the answers. Use the same pen or pencil you used for studying to write the exam.
- Minimize group work if it is not helpful.
- Practice applying information to new scenarios. Ask for sample problems, if possible.

Seven Day PLAN WORKSHEET

Use the information from the chart above to create a seven day study plan for an upcoming exam or project. In a few sentences, briefly describe the exam or project, and then make a plan for what you'll do on each of your seven days. Be as specific as possible.

DAY ONE	
DAY TWO	
DAY THREE	
DAY FOUR	
DAY FIVE	
DAY SIX	
DAY SEVEN	

HELP *for* TEST ANXIETY

WHAT ARE THE CAUSES OF TEST ANXIETY?

Text anxiety rarely comes out of a vacuum. Sometimes the causes are real, like when one's grade is not where one wants it to be; other times, the anxiety is in our heads. It may be past experiences of blanking out on tests, or being unable to retrieve answers to questions. It could also be a lack of preparation for an exam, which is a real reason to be worried about your performance. In this case errors in time management, poor study habits, failure to properly organize material and cramming the night before the exam might increase anxiety. If you have adequately prepared

for a test, your anxiety may result from negative thinking and worries. You might be focusing on past performances on exams, how friends and other classmates are doing, or the negative consequences you expect if you do poorly.

REDUCE TEST ANXIETY

WHILE STUDYING: Give yourself plenty of time before the test. Review the material frequently. Set up your study goals and take one step at a time to not overwhelm yourself. If you are feeling anxiety building, there are several types of exercises which can help you relax.

1. **Engage in deep breathing for 2-5 minutes.** Close your eyes and concentrate on the air going in and out of your lungs. Take long, deep breaths, hold your breath, and then exhale.
2. **Tense and relax different muscle groups.** For example, pull your shoulders back and hold them for a few seconds, then relax.
3. **Engage in guided imagery.** Pick a scene that you find peaceful, beautiful, and natural. What do you see, hear, feel and smell?
4. **Describe the anxiety.** Focus your attention on your anxiety and think about the feelings it causes. How large is it? Where is it located in your body? What is its color, shape, and texture? If you completely experience a physical sensation, it will often disappear.
5. **Exercise.** Exercise helps release anxiety and excess energy and, as a result, reduce body tension.
6. **Engage in positive self talk.** This involves:
 - Thinking about rational responses to counter negative thoughts (Don't say, "I'm going to fail this test." Instead: "I have the ability to do this. I just need to get some help.")
 - Thoughts that help you to cope with stress (Think, "a little anxiety is helpful. Just try my best.")
 - Thoughts that keep you on task (e.g., "I can write this paper if I break it into smaller steps.")

PRIOR TO THE TEST: Arrive early. Sit comfortably. Avoid anxious people who might cause you to doubt your knowledge. Look the test over, read the directions twice, and then organize your time efficiently. Don't rush but work at a comfortable pace. Don't worry about how far along classmates are on the test.

DURING THE TEST: Try deep breathing and muscle relaxation. Take small relaxation breaks. Drink water. If you find a difficult question, move onto easier questions. Eat something or chew gum. Ask the instructor a question. Say, "this is only one test" and, "I'm familiar with this." Reward yourself at the end.

Accessing UW COMPUTER LABS

There are over 130 computer labs on campus available to all students. Willett Drive 409 is available 24 hours a day through a card swipe for campus ID cards. For computer labs availability and schedule, see <https://microlab.uwyo.edu/Labs/schedule.asp>.

ADVANTAGES TO COMPLETING HOMEWORK IN A LAB

1. **College Work with College Computers:** Treat a computer lab like an office. It will force you to focus on schoolwork and not get distracted by social media notifications or game updates on your own laptop.
2. **Specialized Software:** Some labs may have software applications that may be expensive or unavailable for personal use, including industry-standard software used in fields such as engineering, design, computer science, and more. Get hands-on experience and develop skills for future careers.
3. **Reliable and Fast High-Speed Internet Access:** Save time by downloading large files or streaming educational videos in a computer lab on campus.
4. **Collaborative Environment:** Working with others on group projects in a computer lab fosters a sense of teamwork and encourages idea sharing.
5. **Technical Support:** Some labs have dedicated technical support staff who can assist students with hardware or software issues they might encounter.
6. **Printing and Scanning:** Easily print or scan assignments using up-to-date technology.

GRADES *and* ACADEMIC STANDING

GRADES

Through high school many students are used to knowing what their grade is at every moment. At UW most instructors use WyoCourses for grading, so students can keep track of their progress throughout the semester if instructors post grades promptly.

Grading policies can be found within the syllabus for each course. It is important to be familiar with each class's grading policy, including the following factors:

- **Attendance Policy**

Some instructors will reduce your final grade based on absences - pay attention to this!

- **Weighted Grading**

For example, labs are worth a certain percentage of the whole grade.

The grading function in WyoCourses is a communication tool between instructors and students. It is not official. Don't make assumptions about your progress. Talk with your instructors!

Official grades are posted to a student's transcript 4 days after the end of the semester. At this time a student establishes their UW Grade Point Average (GPA).

ACADEMIC STANDING *quiz*

(Search "academic probation" on the UW website.)

What GPA is required to be in good academic standing?

- 1.5 or higher
- 2.5 or higher
- 2.0 or higher
- 3.0 or higher

What happens if a student's cumulative GPA is below 2.0 after grades are submitted at the end of the fall semester?

- They are placed on academic probation
- They are academically suspended
- They receive a warning
- They must retake their courses

Who does a student work with if they are placed on academic probation?

- Their professors
- Their classmates
- An academic support team
- The Dean of Students

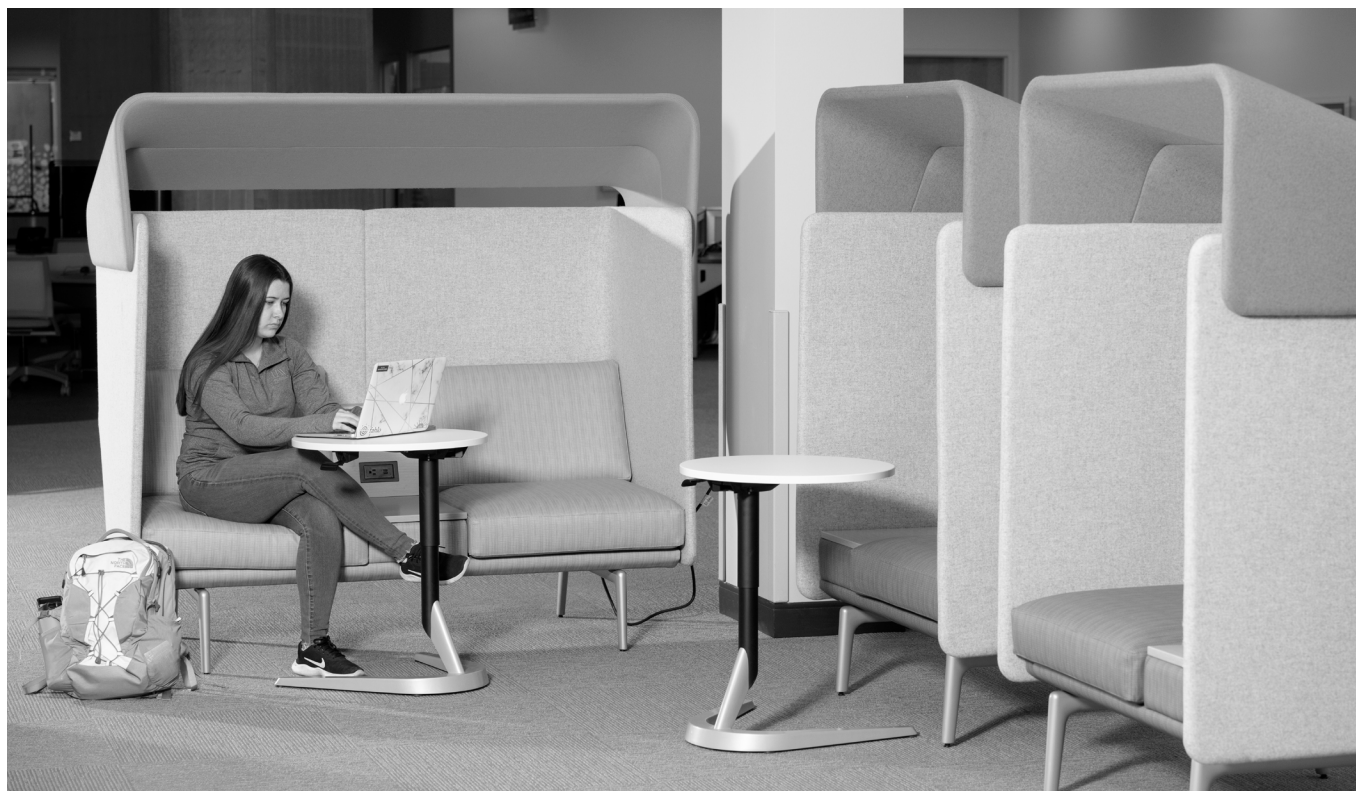

What is the consequence for students who have a GPA below 2.0 for two consecutive semesters?

- They are placed on academic probation
- They receive a warning
- They are academically suspended
- They must change their major

There is an appeal process for students who are academically suspended.

- true
- false

Answers: c, a, c, a

Get to KNOW COE

University of Wyoming Libraries is a center of discovery and learning on campus.

Librarians teach students how to locate, evaluate, and integrate information within their studies. UW Libraries are a key part of scholarly activities at the University and remain at the forefront of information technology as it applies to library collections.

In Coe Library you will find:

- 1.3 million + books and 800,000 + eBooks
- hundreds of academic article databases
- study rooms and computer labs
- laptops and ipads to borrow
- music and movies
- Student Innovation Center (makerspace)
- Studio Coe multimedia lab with a recording studio
- One Button Studio with a green screen
- STEP Tutor Center & Writing Center
- Learning Commons
- food & drinks at the Book & Bean Cafe

“ I started going to the library my second semester to study because it was peaceful and relaxing. I could get more done with fewer distractions. I also went to the writing center on the first floor a few times to get help with papers.”

-Kassondra Giacchino, *UW Student*

“ Coe Library for me is helpful for studying and meeting with tutors. I use the computers and the study floors the most. It is very busy and there are a lot of people who go in and out. It's great for getting some quiet and getting things done.”

-Olivia Balanoff, *UW Student*

Explore the COUNSELING CENTER

The University Counseling Center (UCC) offers individual counseling, group counseling, outreach programming, and graduate training programs. Counseling can be helpful for test anxiety, stress, and any issues you might be struggling to manage in your first semester.

UCC is a Safe Zone for all students seeking services.

Students can make an appointment by dropping by Knight Hall 341 during hours of operation:

Fall and Spring Drop-In Hours:

Drop-in times, for a brief initial meeting with a counselor, are:

Monday - Friday 10:00 am - 11:30 am & 1:00 pm - 3:30 pm

WHAT HAPPENS WHEN I FIRST ARRIVE?

You will be greeted by front office staff and asked to fill out some forms. You will then have the opportunity to meet briefly (15-20 minutes) with the drop-in counselor to discuss your situation. At that time, the counselor will provide you with a future appointment at UCC and/or a referral to another agency to assist you with your needs.

This initial appointment is not a counseling appointment. It is an opportunity for the counselor to assess and discuss your needs.

WHAT IF I HAVE A CRISIS?

Crisis intervention services are also offered during regular clinic hours (8:00 - 5:00 pm) for students with urgent problems. Please call or drop-in and inform our receptionist you have an urgent crisis. For after-hours crises, call 766-8989 and ask for the on-call counselor.

If you are experiencing an emergency, call 911 or the Suicide and Crisis Lifeline, 988.

University Counseling Center

Hours of Operation:

Monday - Friday

8:00 am - 5:00 pm

341 Knight Hall

Phone: 307-766-2187

Reflect

Spend a few minutes writing about a challenge you've faced and overcome this semester. Describe the way that challenge felt. What habits or techniques allowed you to get past the anxiety of the challenge?

Improving NOTE-TAKING SKILLS

April Heaney and Jessica Willford, LeaRN Program (aprilh@umyo.edu)

Students often say after a few semesters at UW, “I finally figured out how to take good notes!” These students also frequently say, “I wish I’d known this when I first came to college.” The tips below are meant to give you a jump in tailoring your own approach to note-taking, and come mostly from research on effective note-taking as well as tips from advanced students. Maybe the most important suggestion, though, is to think of note-taking NOT just as a “recording activity,” but rather as a method (tailored to your needs) for improving learning. Strong note-taking takes a willingness to try new strategies, practice, and flexibility for the demands of different courses.

Common Mistakes in Note-Taking:

- Trying to write down everything the instructors says
- Leaving no space for editing, adding, and reflecting on notes
- Failing to do the reading before class
- Re-copying notes (an efficient system should eliminate the need for re-copying)
- Stopping note-taking during class discussion (even if the instructor writes material on the board)

Best Practices:

- Use a three-ring binder rather than a spiral bound notebook (this gives flexibility to add, copy, or re-organize pages).
- Give a heading and date for each class period’s notes.
- Take notes while you read your textbook. Incorporate these notes into your lecture notes.
- Make copies of helpful tables or graphs from your textbook and tape them onto blank pages in your notes.
- Quickly develop a system for abbreviation in the first few weeks of class. If your instructor has his/her own system of abbreviation, make yourself a key so you remember what abbreviations mean.
- Develop a way to identify key points that the instructor hints (or directly says) are important (for example, highlighting or starring).
- Mark vocabulary words by highlighting, underlining, or bracketing/boxing.
- Keep notes as concise as possible.
- Use sticky tabs or post-its to mark important sections in your notes that you’ll need to come back to (for referencing in papers, studying for exams, memorizing information).
- Leave generous space in the margins and at the bottom of pages for adding and summarizing points.
- Review your notes for a few minutes before class, and a few minutes after class.
- Visit the instructor in the first month of class, share your note-taking and request suggestions.
- Be able (and ready) to change your note-taking style from course to course.
- Consider using the “Cornell Method” for organizing and remembering information (shown on the other side).

Student Voice:

The two biggest things that helped me were showing up for class and being confident that the material was worth learning... even in classes I didn’t love.” -Paige Delgado, UW Student

Divide the paper into three sections.

- Using a thick marker, draw a dark horizontal line about 5 or 6 lines from the bottom.
- Draw a dark vertical line about 2 inches from the left side of the paper from the top to the horizontal line.
- Write course name, date, and topic at the top of each page.

Write notes.

- The large box to the right is for writing notes.
- The box to the left is for capturing key ideas, concepts, and vocabulary during your review.
- Skip a line between ideas and topics.
- Review the notes as soon as possible after class.

Summarize.

- Write a summary of the main ideas in the bottom section (during your daily or weekly review time).
- Spend most of your time studying the ideas in the left column and the summary at the bottom. These are the most important ideas and will probably include most of the information that you will be tested on.

Name	Date
Subject	Page #
recall column	notes column
summary	

This note-taking system is called the Cornell method or the Cornell Notes system. This method of taking notes was devised in the 1940s by Walter Pauk, an education professor at Cornell University.

NOTE-TAKING Problems AND Solutions

I can't write as fast as the instructor talks. Insert blank lines in your notes whenever you miss information—and then talk with friends or the instructor to fill in missing components. Try using a laptop to take notes if you have one available to you.

I try to listen harder when I'm confused, and then I just stop writing. Just keep writing, even if you don't understand something the instructor says. The more information you have in your notes, the more you will have to "work with" later when you're processing your notes or comparing with others' notes.

I can't read my handwriting after I take notes. Read your notes aloud as you go back over them. Reading out loud helps to “trigger” memory and also aids in connecting concepts.

Student Voices: HOMESICKNESS & Culture Shock

“ I got homesickness almost right away! For the first couple months, I went home almost every weekend. I really missed having people to give me hugs and I missed my family. It wasn't until later that I was able to find my place in Laramie. My current and favorite thing to remind myself is that everything is temporary. My loneliness didn't last forever. I found friends and learned that there are a lot of places to go to talk to someone. You can always come home, but instead, give yourself time for the transition.”

-Olivia Balanoff, UW Student

“ I made the mistake of going home every weekend my first semester. Making new relationships was not that difficult for me, but I wish I would have spend more time with my floor mates since I had a single room and did not have a roommate. There were times where I felt lonely and missed my dog and mom, but I knew that it would get better with time.”

-Kassondra Giacchino,
UW Student

Reflect

In October, many students experience homesickness, increased academic work load, relationship issues, and anxiety. Spend a few minutes identifying your biggest challenges so far this semester. How will you work to overcome those challenges? What resources will help you to do this?

Faculty Voices:

THE VALUE OF OFFICE HOURS

“Take note of your faculty office hours and schedule a ‘hello’ appointment in the first two weeks of class, online or in person. Most of us are all dressed up and ready to be available, and sometimes we feel almost lonely when students don’t connect with us. A hello visit is a great time to express your interests in the course, or your concerns about the workload, or type of work. We learn from each other, and by connecting with us, you are building your network of connections.”

-Mary Keller, *Philosophy & Religious Studies*

“When it comes to communication, nothing beats face-to-face interaction. So much is left unsaid via email, text, or even phone. Going to office hours is essential. This is how you get to know your professor and they get to know you.”

-Ken Sims, *Geology*

“As an instructor of distance students, I really appreciate it when students make an effort to come to the Zoom office hours that I offer, even if only to introduce themselves. If you don’t have such an option, reach out to your instructor in some other way. The syllabus lists various ways you can contact your instructor, take advantage of them. Your instructor is a resource for you. I believe one should always take advantage of their resources!

-Sarah Lee, *Family & Consumer Science*

Locate your instructors’ office hours and write them in the space below. If there is conflict with your own schedule, be sure to make an appointment with your instructor and offer two to three alternative times that work for you.

ADVISING & REGISTERING *for Classes*

Registration for spring classes opens in mid-November and registration dates and times vary by student. However, before registering for spring, you will meet with your advisor to plan your spring course schedule. The appointment may feel like a whirlwind, so it's important to come prepared. Before your appointment, put together some ideas for your spring schedule by perusing the University Studies Program (USP) requirements as well as your major requirements. Coming to your advising appointment with a preliminary schedule (or several ideas) saves time for discussing other issues and ensuring your schedule is as good as it can be.

COMPLETING ALCOHOL EDU AND SEXUAL ASSAULT PREVENTION FOR UNDERGRADUATES (SAPU)

Students must complete the second part of Alcohol Edu and SAPU prior to registering for spring classes, ideally in October. You can find the links to Alcohol Edu and SAPU on your checklist on WyoWeb. For more information about Alcohol Edu and SAPU, visit the HOPEs website at www.uwyo.edu/rec/wellness-center/hopes/alcoholedu-sapu.html. If you have questions, please contact the HOPEs Program in the UW Wellness Center at hopes@uwyo.edu or 307-766-6776.

HOW DOES ADVISING WORK?

- Before advising week (early November) you will receive an email from your advisor to set up an appointment specifically to plan your spring schedule. Make this appointment as soon as you see the email! (Reach out to your advisor if you do not receive an email!)
- In the meeting, your advisor will help you develop a schedule and give you your Personal Electronic Registration Code (PERC) number that you will enter to register for courses in WyoWeb. You can also ask for advice on course withdrawal, resources on campus, career and major choices, financial issues, and any other concerns – your advisor will help you with answers and also put you in touch with the right people and resources.

Planning your SPRING SCHEDULE

You might be tempted to think “big” when you approach your spring classes and end up with a killer schedule (one that might make it hard for you to do well in your classes – and enjoy your semester!) It’s important to remember that you are still navigating college and new expectations during your first year. Keep your schedule sane, and remember that you are in charge of your college path. Keep these tips in mind as you get ready for your advising appointment:

Use a 4-year degree plan for your major:

The 4-year plans will help you see the sequence of courses you’ll

need to graduate in the major you end up sticking with. If you have a declared major, the plan can help you choose courses and see the path ahead of you. If you are undeclared, checking out the degree plans for a couple majors you are exploring can help you get a “feel” for these degree programs and determine what to ask your advisor. You can find the 4-year degree plans online at www.uwyo.edu/acadaffairs/degree-plans/.

Know whether you need a full-time course load:

A full-time load means you are registered for at least 12 credit hours for the current semester. Being a full-time student is generally important if you want to continue to be covered by your parent’s health insurance; for determining how much financial aid you can receive in a semester; and if you want to have access to all the services covered by student fees (e.g. Half-Acre Gym, Student Health, free access to athletic events, etc.) Some scholarships have guidelines about how many credit hours you’ll need to maintain the scholarship. (If you are receiving a Hathaway Scholarship, talk with your advisor to make sure all of your classes will count toward your 12 hours.)

**A good credit hour goal is 15 credit hours. This will help avoid a heavy dose of unscheduled time and also help you stay on track for a 4-year graduation.*

Ask lots of questions about your major:

The advising appointment is a perfect opportunity to start asking questions about your major. www.uwyo.edu/uw/colleges.html is a great resource showing all that UW offers.

If You Change Your Major:

The first step in the process is to meet with your current advisor. They will ask a few questions about what major you want to declare and walk you through the process of completing the Change of Major paperwork. You will then need to take the paperwork and your advising file to your new department to be signed in order to complete the process. Keep in mind that a number of Colleges and Departments do have GPA requirements in order to declare there. If you have questions about that, contact the department you are interested in declaring in to make sure you are eligible.

Do-It-Yourself Degree Plan:

You should check your Degree Evaluation on WyoWeb. This will show you the classes you have taken as well as those requirements that are still unmet. Within WyoWeb: Student Records > Academic Profile > Degree Evaluation

Plan Ahead:

In WyoWeb: Students > Wyo-Records > Registration > Plan Ahead, you can create a “Plan Ahead” spring schedule. Your advisor will also have access to this wish list of courses, so it can help during the advising appointment.

Tips from Students: ADVISING & FINDING A MAJOR YOU LOVE

“ Finding a major that works for you and that you will enjoy can be difficult. I started off majoring in Criminal Justice and switched to Education after my first semester. Remember to take a variety of classes and see what you enjoy. You never know, you may become very interested into something that you never would have thought about pursuing. Broaden your horizons!”

-Kassondra Giacchino, UW Student

“ Find something that you are passionate about even if it's not easy -- the best things in life are not easy! The most important step is to ask yourself 'is this what I really want to do?' 'Will I be happy?'"

-Sienna Trujillo, UW Student

“ Before I came to UW, I went to the University of Northern Colorado in Greeley. I had a 0.28 GPA before the end of the semester. There was no goal; college was just the 13th grade, you know, it was the next thing to do. When I came to UW, I was focused. The biggest advice is to come in with focus. You don't have to say, "I'm going to be the vice president of Staples Corporation" – just come in thinking what you want to learn, and know that having a degree is going to benefit you enormously”

- Nathan Coupal, UW Student

“ If you are looking for a major that you love try to look at what excites you, don't major in something for your parents or someone else...do what you love. Look at up your advisor in the first few weeks of school and reach out.”

- Emilee Inez, UW Student

“ Using advising sessions is very helpful when finding a major for you. Advisors are there to help make the best out of your college experience and get you into a career that you will enjoy doing after college. They have a lot of experience in a variety of subjects, and are there to help.”

-Kassondra Giacchino, UW Student

October Activities

THE WILLIAM WHITE STUDENT ENGAGEMENT PROGRAM

DIRECTIONS

1. Select and attend or complete a minimum of 1 activity from 2 of the 3 categories listed on the back of this sheet that you want to complete.
2. For each activity completed, fill in the information required for that box.
3. Be ready to discuss your activities during class and with your peer mentor.
4. Turn in your activity sheet to your peer mentor at the end of the month.
