Call Title:	ERC SYNERGY GRANT
Programme:	European Commission – Horizon Europe
Objective:	The aim is to provide support for a small group of two to four Principal Investigators to jointly address ambitious research problems that could not be addressed by the individual Principal Investigators and their teams working alone. Synergy projects should enable substantial advances at the frontiers of knowledge, stemming, for example, from the cross-fertilization of scientific fields, from new productive lines of enquiry, or new methods and techniques, including unconventional approaches and investigations at the interface between established disciplines. The transformative research funded by Synergy Grants should have the potential of becoming a benchmark on a global scale.
Eligible Activities:	Principal Investigators must demonstrate the ground-breaking nature, ambition and feasibility of their scientific proposal. Principal Investigators must also demonstrate that their group can successfully bring together the scientific elements necessary to address the scope and complexity of the proposed research question. One of the Principal Investigators must be designated as the Corresponding Principal Investigator. At any one time, one Principal Investigator per Synergy Grant Group except the Corresponding one can be hosted or engaged by an institution outside of the EU or Associated Countries. Actions must take place in EU member states or Associated Country.
Eligible Applicants:	The ERC actions are open to researchers of any nationality who intend to conduct their research activity in any EU Member State or Horizon Associated Country. Principal Investigators may be of any age and nationality and may reside in any country in the world at the time of the application. The host institution must engage and host the Principal Investigator for at least the duration of the project, as defined in the grant agreement.
Total Budget:	€10,000,000 per applicant for 6 years

Call Title:	Integrating Data Sources for Treatment Optimisation and Efficiency
Programme:	Water Research Foundation
Objective:	The Water Research Foundation is currently accepting proposals for its project namely Data Management Best Practices: Integrating Data Sources for Treatment Optimization and Efficiency. Objectives Review and compile case studies of tools that utilities use to combine data sets, organize and validate data, and maintain data security before carrying out treatment optimization efficiency projects. Create a best practice guide for utilities wanting to integrate their datasets to prepare for Machine Learning (ML) Artificial Intelligence (AI) based treatment optimization efficiency projects.
Eligible Activities:	Research Approach The precise research approach will be determined by the selected research team, but the following key aspects should be considered by the researchers: Conduct a literature review, including ML AI work, to document the software and tools being used to organize data across multiple systems (SCADA, CMMS, financial, etc.), validate data, and maintain data security. Tools can include programming languages used to combine information from multiple databases into a single source, in addition to data development for convenient machine reading. Interview survey utilities that are combining and organizing datasets across multiple platforms, validating data, and maintaining data security before carrying out treatment optimization efficiency projects.

	<p>Inventory and characterize the quality reliability of typical utility data sets (SCADA data historian, customer billing, capital assets such as service line material, LIMS, etc.) and expected level of effort to prepare the data sets for ML, AI, or reliable data mining. Identify which data sets might be of greatest use in the future so utilities can prioritize investments in improving data quality reliability.</p> <p>Conduct a workshop with utilities to discuss tools and document their challenges and successes.</p> <p>Compile a best practice guide for utilities to use as a reference for successfully combining and organizing datasets across multiple sources in a way that can be used for ML AI applications.</p> <p>Expected Deliverables</p> <p>Deliverables from this project include:</p> <p>Literature review of existing methods for data collection, validation, and security</p> <p>Case studies report based on utility interviews with a minimum of five case studies (one case study per utility interviewed)</p> <p>Data quality and reliability review</p> <p>Utility workshop materials and summary</p> <p>Best practice guide based on previous research activities and deliverables</p> <p>Utility report-out video</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>Proposals will be accepted from both U.S.-based and non-U.S.-based entities, including educational institutions, research organizations, governmental agencies, and consultants or other for-profit entities.</p> <p>WRF's Board of Directors has established a Timeliness Policy that addresses researcher adherence to the project schedule. Researchers who are late on any ongoing WRF-sponsored studies without approved no-cost extensions are not eligible to be named participants in any proposals.</p>
Total Budget:	\$500,000

Call Title:	Industrialisation of Sustainable & Circular Deep Renovation Workflows Programme
--------------------	--

Programme: European Commission – Horizon Europe	
Objective:	<p>The European Commission (EC) is pleased to announce the Industrialisation of Sustainable & Circular Deep Renovation Workflows Programme.</p> <p>Expected Outcomes</p> <p>Project results are expected to contribute to all of the following expected outcomes:</p> <ul style="list-style-type: none"> • Streamlining resource-efficient nearly zero-energy performance renovation processes. • Renovations with reduction of at least 30 % waste, 25% cost, and 30% work time (to 1-2 days per dwelling/building unit), compared to current deep renovation processes. • Reduced energy performance gap between as-built and as-designed (difference between theoretical and measured performance), and higher construction quality. • Innovative, tailored business models for deep renovation, generating economies of scale and contributing to an increased rate of renovation. • Improved comfort, Indoor Air Quality and Indoor Environmental Quality.
Eligible Activities:	<p>Scope</p> <p>Proposals are expected to address all of the following:</p> <ul style="list-style-type: none"> • Investigate innovative approaches for industrialised deep circular renovation, covering the whole workflow from design through to off-site prefabrication, installation, construction on-site and strategies for maintenance, operation and end of life. • Ensure the proposed approaches aim to achieve the highest level of energy performance (at least NZEB level) with a view toward zero-emission buildings, ensuring a high level of indoor environment quality, keeping costs in an attractive range for owners and investors. • Make use of innovative processes and technologies, including those delivered by previous research, such as design based on circularity principles, prefabricated components, and digital tools that allow to optimise workflows (cost, time, quality, resource use). • Demonstrate a seamless integration of the proposed approaches with state-of-the-art digital technologies for construction and renovation (Building Information Modelling, Digital Twins, etc.). • Select processes and technologies that can be easily tailored to give a maximum potential for rapid and broad deployment at European level. • Investigate innovative business models (e.g. as-a-service models), accounting for potential market and regulatory barriers, in view of mass deployment and Europe-wide impact. • Apply the proposed workflows to at least three demonstrations to assess the proposed approaches for different buildings typologies representative of the European building stock, ensuring the most adequate coverage of the respective climatic conditions. The demonstrations can be either single buildings or clusters of buildings, and at least one of the demonstrations has to address residential buildings. • Contribute to the activities of the Built4People partners and to the Built4People network of innovation clusters.
