NEW OPPORTUNITIES	4
CONNECTIONS THROUGH CULTURE GRANTS 2025	4
Programme: British Council	4
Total Budget: £100,000	4
Deadline: 23/06/2025	4
ADMINISTRATIVE & PROGRAMMATIC SUPPORT, AMERICAN CORNER JAFFNA	4
Programme: U.S. Mission to Sri Lanka	4
Total Budget: \$150,000	5
Deadline: 03/07/2025	5
ANNUAL PROGRAM STATEMENT (APS) FOR FISCAL YEAR 2025	5
Programme: U.S. Mission to Tunisia	5
Total Budget: \$200,000	5
Deadline: 07/07/2025	5
PRIMA SECTION 2 MULTITOPICS	5
Programme: PRIMA - Partnership for Research and Innovation in the Mediterranean Area	5
Total Budget: €36,000,000	6
Deadline: 08/07/2025	6
Diana Challenge Programme 2026	6
Programme: Defence Innovation Accelerator for the North Atlantic	6
Total Budget: €500,000	10
Deadline: 11/07/2025	10
THEMATIC AREA 1 WATER MANAGEMENT IN NEXUS	10
Programme: PRIMA - Partnership for Research and Innovation in the Mediterranean Area	10
Total Budget: €10,900,000	11
Deadline: 15/07/2025	11
THEMATIC AREA 2 FARMING SYSTEMS IN NEXUS	11
Programme: PRIMA - Partnership for Research and Innovation in the Mediterranean Area	11
Total Budget: €10,800,000	12
Deadline: 15/07/2025	12
THEMATIC AREA 3 AGRI-FOOD VALUE CHAIN IN NEXUS	12
Programme: PRIMA - Partnership for Research and Innovation in the Mediterranean Area	12
Total Budget: €10,800,000	13
Deadline: 15/07/2025	13
WOMAN GREENING FOOD SYSTEMS AWARD	13
Programme: PRIMA - Partnership for Research and Innovation in the Mediterranean Area	13
Total Budget: €100,000	14
Deadline: 15/07/2025	14
CREATING OPPORTUNITIES THROUGH MARKET DEVELOPMENT IN SPORTS AND DIGITAL SKILLS	14
Programme: U.S. Mission to Kazakhstan	14
Total Budget: \$1,000,000	14

Deadline:	17/07/2025	14
U.S. EMBASSY LIBREVILLE PUBLIC DIPLOMACY SMALL GRANTS PROGRAM		14
Programme:	U.S. Mission to Guinea	14
Total Budget:	\$100,000	15
Deadline:	31/07/2025	15
Applications open for General Project Funding		15
Programme:	Federal Cultural Foundation	15
Total Budget:	€500,000	16
Deadline:	31/07/2025	16
Call for Applications for Roma and pro-Roma non-profit Organizations (Czech Republic and Slovak)		16
Programme:	RomanoNet	16
Total Budget:	€300,000	17
Deadline:	05/08/2025	17
Call for proposals to strengthen National Roma Civil Society Coalitions		17
Programme:	ERGO Network	17
Total Budget:	€225,000	19
Deadline:	05/08/2025	19
Enhancing Institutional Capacity in the Office of the Auditor General, Uganda		19
Programme:	European Commission (EC)	19
Total Budget:	€2,000,000	20
Deadline:	26/08/2025	20
Synergies and Mutual Learning with National and Regional Initiatives on Industrial Decarbonisation		20
Programme:	Horizon Europe	20
Total Budget:	€1,000,000	21
Deadline:	23/09/2025	21
Accelerate the Uptake of Life-Cycle Assessment for Safe and Sustainable by Design Chemicals and Materials and Resulting Products		22
Programme:	Horizon Europe	22
Total Budget:	€15,000,000	24
Deadline:	23/09/2025	24

New Opportunities

Call Title:	CONNECTIONS THROUGH CULTURE GRANTS 2025
Programme:	British Council
Objective:	The British Council's Connections Through Culture (CTC) Grants support artistic collaboration between the UK and select countries in Asia, Europe and Australasia'. The grants support collaborative projects between artists, creative practitioners and arts organisations, fostering cross-cultural exchange and lasting relationships.
Eligible Activities:	<p>The grants support the development of new creative projects leading to collaborative activities that promote the exchange of skills, knowledge, and practice. Various approaches can be taken such as art residencies, exhibitions, performances, showcases, publications, webinars, and conferences, among others. Projects can be digital, face to face or a hybrid of both.</p> <p>Actions must take place in Asia, Europe and Australasia.</p>
Eligible Applicants:	They welcome applications from both new and returning partners, and they're particularly keen to hear from those they have not previously worked with.
Total Budget:	£100,000
Deadline:	23/06/2025
More information and official documents:	https://arts.britishcouncil.org/get-involved/opportunities/connections-through-culture-2025

Call Title:	ADMINISTRATIVE & PROGRAMMATIC SUPPORT, AMERICAN CORNER JAFFNA
Programme:	U.S. Mission to Sri Lanka
Objective:	The U.S. Embassy Colombo, Public Diplomacy Section (PDS) is pleased to announce a funding opportunity through the Public Diplomacy grants program for support of American Spaces in Sri Lanka. There are two awards associated with this funding opportunity: To support American Corner Jaffna with 1) Administrative AND 2) programmatic support.
Eligible Activities:	<p>They seek a single grantee to implement both awards (both will be Cooperative Agreements, meaning significant Public Diplomacy Section input and assistance). The grantee would issue any necessary sub-awards or sub-grants to support the American Space throughout the grant period.</p> <p>Actions must take place in Sri Lanka.</p>
Eligible Applicants:	DRL welcomes applications from Not-for-profit organizations, Civil society/non-governmental organizations, Think tanks, Public and private educational institutions.

Total Budget:	\$150,000
Deadline:	03/07/2025
More information and official documents:	https://www.grants.gov/search-results-detail/359044

Call Title:	ANNUAL PROGRAM STATEMENT (APS) FOR FISCAL YEAR 2025
Programme:	U.S. Mission to Tunisia
Objective:	The Public Affairs Section (PAS) at U.S. Embassy Tunis invites creative and engaging proposals for programs that strengthen ties between the United States and Tunisia, highlight shared values, and promote bilateral cooperation in ways that make America safer, stronger, and more prosperous.
Eligible Activities:	<p>Examples of possible PD small grant proposals include, but are not limited to:</p> <ul style="list-style-type: none"> • Subject-matter expert, academic, and professional lectures, seminars, and speaker programs that include U.S. speakers/experts. • Programs that strengthen relationships and linkages between U.S. and Tunisian higher education and cultural institutions. • Educational, artistic, and cultural programs, including programs that strengthen English language teaching and learning, music, musical theater, dance workshops, master classes, and performances, live theatre performances, art exhibitions, and sports and culinary diplomacy initiatives that increase mutual understanding between the people of the United States and Tunisia. • Programs, including podcasts, that promote economic empowerment, entrepreneurship, or that share U.S. experiences related to addressing community challenges, including the management of water or energy resources, waste management, urban design and planning, and preparing for and mitigating natural or human-caused disasters. • Cultural heritage conservation and preservation programming, including through the use new and immersive technologies, such as VR technology. <p>Actions must take place in Tunisia.</p>
Eligible Applicants:	Eligible recipients include nonprofits and individuals.
Total Budget:	\$200,000
Deadline:	07/07/2025
More information and official documents:	https://www.grants.gov/search-results-detail/359120

Call Title:	PRIMA SECTION 2 MULTITOPICS
Programme:	PRIMA - Partnership for Research and Innovation in the Mediterranean Area
Objective:	The project is expected to achieve the following topics:

	<ul style="list-style-type: none"> Thematic Area 1-Water management in the Nexus: Topic 2.1.1-2025 (RIA*) Enhancing Policy Development through Impact-Driven Water Footprint and Virtual Water Concepts in the Mediterranean Region PRIMA website. Topic 2.2.1-2025 Upscaling Agroecology Practices at the Farm Level in the Mediterranean Topic 2.3.1 RIA Towards a Plant-Based Alternative Protein products Transition in the Mediterranean Region
Eligible Activities:	The following Member States (MS) of the European Union (EU) are eligible: Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Spain, Slovenia. The following Third Countries associated to Horizon 2020 (AC) are eligible: Israel, Tunisia, and Turkey. The following Third Countries not associated with to Horizon 2020 (TC), having concluded international agreements for scientific and technological cooperation setting out the terms and conditions of their participation in PRIMA are eligible: Algeria, Egypt, Jordan, Lebanon, and Morocco.
Eligible Applicants:	Any legal entity created under the European Union law is eligible.
Total Budget:	€36,000,000
Deadline:	08/07/2025
More information and official documents:	https://prima-med.org/submit-your-project/section-2-multi-topics-2024/

Call Title:	Diana Challenge Programme 2026
Programme:	Defence Innovation Accelerator for the North Atlantic
Objective:	<p>The Defence Innovation Accelerator for the North Atlantic's Challenges for 2026 have launched, calling all innovators who are on a mission to develop ground-breaking dual-use technology within this year's 10 challenge areas.</p> <p>DIANA is a programme that uses 'challenges' to identify emerging and disruptive technologies which can fulfil capability needs of the Alliance. Challenges are therefore based on the priority technology areas of NATO, Allied nations, the latest trends in emerging and disruptive technologies, and market potential.</p> <p>DIANA issues its challenges publicly through Challenge Calls. Innovators can submit proposals in response to these challenges. Companies that are competitively selected based on their proposed solutions will be invited to join the DIANA Challenge Programme, signing a framework agreement to become "DIANA innovators" and continue iterating the solution they proposed in response to the challenge.</p>
Eligible Activities:	<p>Challenges</p> <p>Energy and Power:</p> <p>The energy sector is grappling with increasing demand, ageing infrastructure, environmental concerns, and security vulnerabilities. The need for location-independent on-demand power with high reliability and resilience represents a fundamental enabler for the Alliance across a multitude of civilian and military applications. This is further compounded by the anticipated power demands of machine learning and electrified mobility. The Alliance seeks dual-use solutions that</p>

	<p>ensure reliable power, resilience against threats, and adaptability to evolving conditions.</p> <p>Advanced Communication Technologies: State-of-the-art communication technologies provide data sharing networks with unprecedented levels of bandwidth, latency and availability. Further performance gains will be necessary to enable advancing technologies such as autonomous networks and telemedicine. In both civilian and military contexts, communication networks are increasingly prone to interference, jamming, cyberattack and physical sabotage. Next generation communications technologies must therefore combine high levels of performance with resilience, redundancy and adaptability in both civilian and military applications. The Alliance seeks dual-use solutions enhancing the resilience and effectiveness of next generation communications technologies for the robust and rapid exchange of data across decentralised computing, sensing and communications networks.</p> <p>Contested Electromagnetic Environments: Sensing and surveillance technologies often operate in contested and congested electromagnetic environments, where the spectrum bandwidth is limited due to unintentional interference by commercial and industrial use or due to intentional jamming by hostile actors. Other devices using the electromagnetic spectrum, such as radar or space-based navigation systems, may also be subject to interference, jamming and spoofing, leading to disablement or performance degradation. This interference can be countered using novel sensor technologies which are inherently robust against electromagnetic noise, through the accurate measurement and intelligent management of the electromagnetic spectrum or using alternate sensing systems. These technologies are equally applicable in civilian and military environments. The Alliance seeks dual-use sensing, navigation, data link, spectrum analysis and management solutions that ensure operational robustness and resilience in electromagnetic contested and congested environments.</p> <p>Human Resilience & Biotechnology: In the 21st century, the intersection of life sciences and biotechnology has led to transformative advancements in personalised medicine and health, food security, biomanufacturing, and combating disease. Still, boosting human survival and health remain challenging, especially during war or natural disasters. In this context, establishing a continuum of care for military personnel is key to allied medical offset strategy. Civilian and military medical units must be resilient, agile, and equipped with advanced biotechnology and medical technologies, for example for Chemical, Biological, Radiological, Nuclear and Explosive (“CBRNE”) response and trauma care. This challenge aims to enhance and protect human health and performance, equipping humans to handle extreme physical and mental demands. The Alliance seeks cutting-edge biomedical, biotechnology, bioengineered, synthetic and computational dual-use solutions to protect the wellbeing and security of NATO citizens and military personnel.</p> <p>Operations in Extreme Environments: The Arctic and other extreme environments present unique challenges for remote communities, research, natural resources exploration and defence operations. Great distances, cold, heat, humidity, dust, radiation, corrosive environments, rugged terrain and lack of infrastructure significantly limit the effectiveness of standard personnel training, equipment, and systems. The Arctic in particular presents many of these obstacles in a multi-domain theatre of increasing strategic relevance. The Alliance seeks dual-use technologies and innovative solutions to ensure effective and safe operations in the planet’s most challenging environments.</p> <p>Maritime Operations:</p>
--	---

	<p>Military and civilian operations increasingly leverage complex groups of assets across land, sea, air, space and cyberspace, all requiring seamless command and control. The maritime environment particularly suffers unique challenges, operating in cold, wet, salty conditions, with congested shipping lanes and rapidly changing environmental conditions. To address these challenges, the Alliance seeks secure, integrated dual-use solutions to provide real-time situational awareness, aid decision-making and empower operations across vast maritime theatres.</p> <p>Resilient Space Operations: Space is increasingly a key domain for both commercial and military activities. Access and monitoring of the space environment is crucial for Allies to protect assets from debris, energetic particles and radio emissions as well as anticipating and defeating adversary threats. Space situational awareness currently heavily leverages ground-based sensors like telescopes and radar, but surveillance from orbital sensors is an underdeveloped method of improving situational awareness. Furthermore, legacy charged particle and radio emissions models rely on limited historical data in a discrete number of orbital regimes. Just as air traffic management must account for weather events and radio spectrum use, space traffic management must also adapt to this dynamic landscape. Meanwhile, sustaining operations in an increasingly crowded space environment will require frequent manoeuvring to avoid predicted collisions, very rapid revisit rates to track manoeuvring targets, and on-orbit servicing to refuel for manoeuvres and repair damage sustained due to space weather.</p> <p>Critical Infrastructure & Logistics: Critical infrastructure and logistics face significant challenges to resilience and adaptability in the face of evolving threats and demands. Additive manufacturing, metamaterials, and nanotechnology all offer promising solutions to these challenges, but often fall short due to limitations in scalability, material properties, and integration capabilities. Additive manufacturing struggles with slow production speeds and material limitations, metamaterials face hurdles in design, fabrication and characterisation, and nanotechnology encounters technical, safety, and regulatory challenges. Meanwhile each of these technologies requires a complex logistical chain to deliver the right materials to the right places at the right time. The Alliance seeks dual-use solutions that ensure resilient and adaptable critical infrastructure and logistics across all its operations and supply chains.</p> <p>Autonomy & Unmanned Systems: Unmanned systems across air, land, sea, and undersea domains (“UAVs”, “UGVs”, “USVs”, and “UUVs”) have become increasingly prevalent in both Alliance operations and civilian applications. These platforms deliver transformative and rapidly advancing capabilities, unlocking a broad range of tactical and strategic opportunities. However, they also introduce a dynamic set of challenges, including new operational concepts, evolving training requirements, and complex sustainment needs. At the same time, there is a growing imperative to detect and counter adversarial unmanned systems. The Alliance is actively seeking innovative autonomous technologies and effective countermeasures to enhance protection against the full spectrum of unmanned systems (“UxS”).</p> <p>Data Assisted Decision Making: Advances in sensors, communications and computation have led to a vast amount of data being collected throughout both civilian and military operations. However, due to the complexity of dynamic environments and diversity of sources, this data is frequently unfiltered and unstructured. Effective data fusion is therefore required for big data algorithms to extract meaningful insights and correlations. Digital modelling, simulation and prediction tools must utilise these diverse data to inform machine</p>
--	--

	<p>learning algorithms for effective automated decision making in dynamic environments. Integrating the derived information into a single interactive display, optimised to empower human situational awareness and decision making, is also challenging due to the inhomogeneity of sources and formats. From collection to user interpretation, maintaining the authenticity, traceability and veracity of data and information is critical for decision makers to meet their objectives. To address these challenges, the Alliance seeks integrated dual-use digital solutions to enable data assisted decision making.</p> <p>Benefits</p> <p>A dual-use focus: learn how to prepare your business for the defence and security environment, understand the ways of working in defence and what it takes to scale in that domain, whilst simultaneously progressing your technology in the civilian market.</p> <p>Early exposure to customers: get early feedback from defence end-users and buyers across NATO to enable you to shape your solution to meet both military and civilian needs. Innovators get exposure to end-users and buyers throughout the programme, and may also receive invitations to attend military exercises.</p> <p>Support to secure your solution: learn how to safeguard your intellectual property and manage security risks.</p> <p>Opportunities to test your technology: access a network of around 180 specialised test centres across the Alliance, each with specific technology testing capabilities, to validate and refine your technologies in realistic, mission-relevant environments.</p> <p>Exposure to a transatlantic pool of investors: connect with a trusted, transatlantic pool of investors to fuel the growth of your company. Learn how to match public and private funding.</p> <p>Business development support: strengthen your core business skills – including pitching, upsizing, and engaging with procurement professionals – to support the long-term growth of your business and adoption of your solution by end-users.</p> <p>In addition to this support, innovators receive €100,000 of contractual funding, and may seek, through competitive processes, additional funds for testing, evaluation, validation & verification activities.</p> <p>The €100,000 of contractual funding is paid in full before the start of Accelerator Programme Phase 1 and is awarded to the company, not to individuals. It supports ongoing development of the proposed solution over the first six months and is also used to cover innovators' travel costs for mandatory training sessions and events forming part of the DIANA Accelerator Programme.</p> <p>The contractual funding shall be also used to cover mandatory travel to assigned accelerator sites as well as global events, occurring up to one week per month of Phase 1. No additional funding will be provided to cover travel expenses beyond this allocation.</p> <p>Innovators who are successfully down-selected to Accelerator Programme Phase 2 may receive up to €300,000 in additional contractual funding to support a further six months of iteration of their solution.</p> <p>Phase 2 of the Accelerator Programme offers tailored support to a smaller group of innovators down-selected through a proposal process at the end of Phase 1.</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>They encourage all eligible companies that think their technology could help solve one of the challenges to submit a proposal.</p> <p>Any incorporated company with its principal place of business in a NATO member nation that is controlled and majority owned by nationals of NATO member nations is eligible to submit a proposal. They recommend early-stage start-ups or small and medium-sized enterprises with limited experience in defence and security to apply, as these companies will be most suited to and benefit most from the programme.</p>

	<p>DIANA will accept collaborative proposals as long as all member companies meet the eligibility requirements; a single company must be listed as the lead for the purposes of communication during the submission process, as well as for contracting and reporting requirements, should the proposal be selected.</p> <p>DIANA seeks technology solutions at maturity levels typically between Technology Readiness Level (“TRL”) 4-7, but lower TRL solutions that could offer significant strategic impact and higher TRL solutions that could be adapted to defence and security applications will be considered.</p> <p>DIANA focuses on dual-use technologies, which by definition have applications in both civilian and defence and security settings. In other words, DIANA does not work on weaponry, munitions, or other technology only applicable to combat—this is the scope of other programmes and agencies. The focus on dual use is integral to DIANA, and part of what makes them unique.</p> <p>Companies that signed agreements with DIANA to be part of DIANA cohorts in previous years are not eligible to apply again. Companies that submitted to previous DIANA calls but were unsuccessful are eligible (and encouraged) to reapply.</p>
Total Budget: €500,000	
Deadline: 11/07/2025	
More information and official documents:	https://www.diana.nato.int/

Call Title:	THEMATIC AREA 1 WATER MANAGEMENT IN NEXUS
Programme:	PRIMA - Partnership for Research and Innovation in the Mediterranean Area
Objective:	<p>Aligned with the priorities of the European Green Deal, including the EU biodiversity strategy for 2030, as well as the EU climate adaptation and mitigation ambitions for 2030 and 2050, successful proposals will focus on scaling up Nature-based Solutions¹⁸ (NBS). These solutions will enhance water security and improve the management of water-related risks amidst a changing climate, emphasising principles such as green, blue, and circular approaches (e.g., Natural Water Retention Measures, NWRMs) to mitigate the impacts of extreme events and water pollution.</p>
Eligible Activities:	<p>Project results are expected to contribute to the following expected outcomes:</p> <ul style="list-style-type: none"> • Improved water management, enhanced climate resilience and adaptive capacity of ecosystems and communities¹⁹ through the implementation of cost-effective Nature-Based Solutions (NBS) • Increased knowledge sharing and capacity building among stakeholders at all levels to effectively design, implement, and maintain NBS. • Improved monitoring and evaluation systems for continuous enhancement of NBS leading to their integration into environmental, agricultural, and urban planning policies, as well as climate adaptation and mitigation and environmental protection strategies, supported by innovative governance frameworks. <p>The following Member States (MS) of the European Union (EU) are eligible: Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Spain, Slovenia.</p>

	The following Third Countries associated to Horizon 2020 (AC) are eligible: Israel, Tunisia, and Turkey. The following Third Countries not associated with to Horizon 2020 (TC), having concluded international agreements for scientific and technological cooperation setting out the terms and conditions of their participation in PRIMA are eligible: Algeria, Egypt, Jordan, Lebanon, and Morocco.
Eligible Applicants:	Any legal entity created under the European Union law is eligible.
Total Budget:	€10,900,000
Deadline:	15/07/2025
More information and official documents:	https://prima-med.org/submit-your-project/water-management-in-the-nexus/

Call Title:	THEMATIC AREA 2 FARMING SYSTEMS IN NEXUS
Programme:	PRIMA - Partnership for Research and Innovation in the Mediterranean Area
Objective:	<p>Aligned with the objectives of the European Green Deal and EU Nature restoration law, and the upcoming European Water Resilience Strategy, the initiative to enhance wetland restoration in the Mediterranean serves as a catalyst for achieving the EU's climate goals outlined for both 2030 and 2050. It aligns with the Union for the Mediterranean's Greener Med Agenda 2030, which underscores the pivotal role of wetlands in furnishing vital ecosystem services for the region's environmental well-being and economic advancement. Wetlands are regions where water influences the environment, fostering a unique ecosystem rich in biodiversity. They include coastal marshes, lagoons, rivers, estuaries that are supporting different varieties of plant and animal life. Successful proposals will contribute to enhance wetland agro-ecosystems sustainably, to expand knowledge on wetland status in the Mediterranean and their restoration potential, and to provide evidence-based policy recommendations for a better integration and coexistence of agriculture and wetlands.</p>
Eligible Activities:	<p>Project results are expected to contribute to the following expected outcomes:</p> <ul style="list-style-type: none"> • Increased resilience of Mediterranean wetland agroecosystems by safeguarding ecosystem services provisions especially for flood and drought control, while producing food (or feeds) and contributing to the socio-economic development of the region • Comprehensive Assessment and Mitigation of Greenhouse Gas Emissions and carbon sequestration, unique to Mediterranean wetlands, thereby contributing to climate change adaptation and mitigation efforts. • Promote innovative, Mediterranean-specific practices that support agrobiodiversity within wetland agroecosystems. <p>Examples include integrating traditional crop varieties like salt-tolerant barley, durum wheat, and native legumes that thrive in wetland-adjacent soils, thereby preserving genetic diversity while adapting to local conditions.</p> <p>The following Member States (MS) of the European Union (EU) are eligible: Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Spain, Slovenia. The following Third Countries associated to Horizon 2020 (AC) are eligible: Israel, Tunisia, and Turkey. The following Third Countries not associated with to Horizon 2020</p>

	(TC), having concluded international agreements for scientific and technological cooperation setting out the terms and conditions of their participation in PRIMA are eligible: Algeria, Egypt, Jordan, Lebanon, and Morocco.
Eligible Applicants:	Any legal entity created under the European Union law is eligible.
Total Budget:	€10,800,000
Deadline:	15/07/2025
More information and official documents:	https://prima-med.org/submit-your-project/farming-systems-in-the-nexus/

Call Title:	THEMATIC AREA 3 AGRI-FOOD VALUE CHAIN IN NEXUS
Programme:	PRIMA - Partnership for Research and Innovation in the Mediterranean Area
Objective:	Contributing to the European Green Deal priorities, the Farm-to-Fork Strategy for a fair, healthy, and environmentally friendly food system, and the EU's climate goals for 2030 and 2050, this approach emphasizes initiatives that introduce the Mediterranean diet and organic products in schools, aiming to instill healthy eating habits in children from a young age. The strategy should integrate innovative technologies and methods to boost consumer awareness and engagement through educational campaigns. Key components include leveraging existing initiatives and digital tools, promoting policy dialogue, and fostering partnerships between consumers and researchers. Focusing on social innovation and consumer behaviour, participatory methods such as living labs are essential for facilitating meaningful and sustainable dietary shifts.
Eligible Activities:	<p>The project is expected to achieve the following outcomes:</p> <ul style="list-style-type: none"> Proposals should aim to demonstrate and implement innovative approaches that enhance the adoption of the Mediterranean diet across diverse age groups, such as children, adults, and older adults. Applicants are encouraged to select one or more of these demographics, promoting healthy eating habits in children through school-based programs, raising awareness among adults through community and workplace initiatives, and offering personalized dietary support for older adults. Proposals must incorporate cutting-edge educational campaigns, engagement strategies, and digital tools that deepen consumer understanding and participation in sustainable food systems. Additionally, proposals should address policy innovation by promoting tailored policy frameworks at EU, national, and regional levels, with a focus on using public food procurement as a strategic lever to drive demand for sustainable foods. <p>As an Innovation Action, proposals should also deliver evidence-based recommendations, actively engage stakeholders, and establish monitoring mechanisms. This will support the development and deployment of effective policies that drive the widespread and sustainable adoption of the Mediterranean diet, ultimately contributing to PRIMA's broader objectives.</p> <p>The following Member States (MS) of the European Union (EU) are eligible: Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Spain, Slovenia. The following Third Countries associated to Horizon 2020 (AC) are eligible: Israel,</p>

	Tunisia, and Turkey. The following Third Countries not associated with to Horizon 2020 (TC), having concluded international agreements for scientific and technological cooperation setting out the terms and conditions of their participation in PRIMA are eligible: Algeria, Egypt, Jordan, Lebanon, and Morocco.
Eligible Applicants:	Any legal entity created under the European Union law is eligible.
Total Budget:	€10,800,000
Deadline:	15/07/2025
More information and official documents:	https://prima-med.org/submit-your-project/food-value-chain-in-the-nexus/

Call Title:	WOMAN GREENING FOOD SYSTEMS AWARD
Programme:	PRIMA - Partnership for Research and Innovation in the Mediterranean Area
Objective:	<p>The prizes will be awarded, after the closure of the contest, to the contestant(s) who, in the opinion of the panel, best address all the following criteria:</p> <ul style="list-style-type: none"> • Innovative Solutions for Greening Food Systems: Demonstrated implementation of innovative solutions and practices proposed and led by women, specifically aimed at greening food systems in the Mediterranean region. This includes, but not limited to, pioneering approaches in agriculture, food production, and waste reduction that prioritize environmental sustainability, biodiversity conservation, and resource efficiency. • Evidence of Impactful Implementation: Evidence of tangible outcomes resulting from the implementation of proposed solutions, showcasing measurable improvements in sustainability, resilience, and inclusivity within the agriculture and sector. This could include quantifiable metrics such as reductions in carbon emissions, improvements in soil health, increased biodiversity, or enhanced food security and nutrition outcomes. It is essential to quantify the outcomes via measurable key indicators (for instance, number of beneficiaries and end-users, percentage of efficiency improvement).). • Women Empowerment for Green Food Systems: Active engagement and empowerment of local communities and stakeholders, facilitated by women, in decision-making processes and project implementation specifically within the context of greening food systems. This involves fostering inclusive participation, ensuring equitable access to resources, providing opportunities for capacity building, and promoting leadership roles for women and marginalized groups in initiatives aimed at enhancing the sustainability and resilience of food systems.
Eligible Activities:	<p>The following Member States (MS) of the European Union (EU) are eligible: Croatia, Cyprus, France, Germany, Greece, Italy, Luxembourg, Malta, Portugal, Spain, Slovenia. The following Third Countries associated to Horizon 2020 (AC) are eligible: Israel, Tunisia, and Turkey. The following Third Countries not associated with to Horizon 2020 (TC), having concluded international agreements for scientific and technological cooperation setting out the terms and conditions of their participation in PRIMA are eligible: Algeria, Egypt, Jordan, Lebanon, and Morocco.</p>

Eligible Applicants:	Any legal entity created under the European Union law is eligible.
Total Budget:	€100,000
Deadline:	15/07/2025
More information and official documents:	https://prima-med.org/woman-greening-award/

Call Title:	CREATING OPPORTUNITIES THROUGH MARKET DEVELOPMENT IN SPORTS AND DIGITAL SKILLS
Programme:	U.S. Mission to Kazakhstan
Objective:	The U.S. Mission to Kazakhstan's Public Diplomacy Section (PDS) announces an open competition to implement projects that promote U.S. best practices and values to strengthen U.S.-Kazakhstan ties through the digital technology and sports sectors. PDS Kazakhstan invites proposals for programs that engage capable participants, strengthen regional networks to advance business ties with the United States, highlight shared values, and promote bilateral cooperation and security.
Eligible Activities:	The Public Diplomacy Section invites proposals for programs that support one of the following U.S. Mission priority program areas listed below, with a key focus on audiences and participants outside of Kazakhstan's largest cities: Goal 1. Deepening Kazakh-American Ties Through Sports Goal 2. Equipping Young Professionals with In-Demand Technical Skills Actions must take place in Kazakhstan.
Eligible Applicants:	The following organizations are eligible to apply: Not-for-profit organizations, including think tanks and civil society/non-governmental organizations, from both the United States and Kazakhstan, with experience in providing legal support to journalists.
Total Budget:	\$1,000,000
Deadline:	17/07/2025
More information and official documents:	https://www.grants.gov/search-results-detail/359227

Call Title:	U.S. EMBASSY LIBREVILLE PUBLIC DIPLOMACY SMALL GRANTS PROGRAM
Programme:	U.S. Mission to Guinea
Objective:	The Public Diplomacy Section invites proposals for programs that strengthen ties between the U.S. and Gabon by highlighting our shared values and promoting bilateral cooperation.

Eligible Activities:	All programs must have a clear nexus to U.S. foreign policy objectives, and contribute to U.S. Embassy Libreville's efforts to make the United States safer, stronger, and more prosperous; and/or showcase U.S. excellence in various fields, including emerging technologies. Actions must take place in Gabon.
Eligible Applicants:	Embassy Conakry encourages applications from registered not-for-profit organizations
Total Budget:	\$100,000
Deadline:	31/07/2025
More information and official documents:	https://www.grants.gov/search-results-detail/359222

Call Title:	Applications open for General Project Funding
Programme:	Federal Cultural Foundation
Objective:	The Federal Cultural Foundation is pleased to invite applications for its General Project Funding to finance projects in all artistic fields. The Foundation supports artistic productions and awards funding to thematic areas which fall under the artistic and cultural funding responsibilities of the German federal government and possess particular thematic significance for current artistic and social discourse. One of its chief objectives is to promote innovative programmes and projects in an international context.
Eligible Activities:	Up to ten million euros is allocated each year to support large, innovative projects in an international context. The Federal Cultural Foundation may award funding to institutions with headquarters in Germany or abroad. Project coordinators must ensure visibility of their projects in Germany. Media produced with project funding from the Federal Cultural Foundation must also include a German-language version. Focus Areas Visual and performing arts Literature Music Dance Film Photography Architecture New Media Funding Information In the area of General Project Funding, the Executive Board is responsible for approving funding for project applications of more than 50,000 euros and less than 250,000 euros. General Project Funding will only consider projects that require at least 50,000 euros and have at least 20 percent of their entire costs secured through personal capital and/or third-party financing.
Eligible Applicants:	Eligibility Criteria

	<p>The Federal Cultural Foundation considers a project to have an "international context" if any of the following criteria apply:</p> <ul style="list-style-type: none"> it is carried out in cooperation with at least one partner with headquarters located outside of the Federal Republic of Germany it is essential for at least one of the constituent events to be staged outside of the Federal Republic of Germany it requires the significant involvement of artists from different countries international cooperation is necessary for its preparation and research it brings together a large number of participants or constituent projects it requires the involvement of internationally renowned institutions <p>Ineligibility Criteria</p> <p>The German Federal Cultural Foundation does not grant operational funding to institutions – only project funding.</p> <p>Moreover, it does not finance purchases, construction measures or projects comprised solely of guest performances abroad, nor does it subsidise expenditures on printing alone.</p> <p>As a rule, the Foundation does not fund event series or regularly recurring projects.</p>
Total Budget: €500,000	
Deadline: 31/07/2025

Call Title:	Call for Applications for Roma and pro-Roma non-profit Organizations (Czech Republic and Slovak)
Programme:	RomanoNet
Objective:	<p>RomanoNet is announcing a call for grant applications for Roma and pro-Roma civil society organizations registered and operating in the Czech Republic or Slovakia. Organizations dedicated to promoting fundamental rights and European Union values, strengthening Roma communities, and supporting the emancipation and participation of the Roma minority are eligible to apply for the grant.</p> <p>Challenge Objectives</p> <ul style="list-style-type: none"> • Strengthen the capacities of Roma and pro-Roma civil society and Roma communities to promote and defend the values of the European Union, such as respect for human dignity, freedom, democracy, equality, the rule of law and respect for human rights, including the rights of minorities • Promote access to basic human rights for Roma men and women • Promote equality and social inclusion of Roma men and women • Promote a human rights approach to the situation of Roma • Fight against anti-Gypsyism • Monitor the implementation of national strategies for the integration of the Roma minority at the local, regional and national levels • Develop cooperation between Roma communities and public institutions • Strengthen cooperation between Roma and non-Roma civil society
Eligible Activities:	<p>Eligible Activities</p> <p>Types of activities that can be supported by the grant</p>

	<p>Activities aimed at developing the capacities of organizations, experts or community members - for example, training, coaching, workshops, mentoring and other non-formal education tools</p> <p>Awareness-raising activities aimed at the general public, including communication events and campaigns, creation and dissemination of printed and online materials, public events and cultural projects</p> <p>Advocacy and monitoring activities aimed at strengthening the rule of law and representing disadvantaged groups – e.g. legal advice, advocacy work, community organizing and mobilization, monitoring and evaluation of government policies and programs focused on the Roma minority, preparation of opinions and professional publications</p> <p>Community initiatives that support active citizenship and the involvement of Roma and other members of society – for example, local activities, volunteer initiatives or support for grassroots movements</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>Civil society organizations that are registered and actively operating in the Czech Republic or Slovakia can apply for a grant if they meet the following conditions:</p> <p>Not established for profit</p> <p>They can carry out paid economic activity and employ workers,</p> <p>Their main goal is not to represent economic or professional interests of its members</p> <p>They were founded on the initiative of individuals or groups and their activities include elements of volunteering</p> <p>They act in the public interest and in the public sphere – for the benefit of people, certain groups or society as a whole – without seeking political power</p> <p>They operate democratically, transparently and participatorily, with elected or appointed leadership that is accountable to the organization's members and supporters</p> <p>They publish annual reports on their activities and financial performance in accordance with applicable law</p> <p>They have no outstanding obligations to the state</p>
Total Budget: €300,000	
Deadline: 05/08/2025

Call Title:	Call for proposals to strengthen National Roma Civil Society Coalitions
Programme:	ERGO Network
Objective:	<p>ERGO Network invites national coalitions of Roma and pro-Roma civil society organisations from across the European Union to submit proposals for funding under the ROVA – Roma CSOs promoting EU values project funded by the European Union.</p> <p>Aims</p> <p>This call aims to support the formation and strengthening of national Roma civil society coalitions to advocate effectively for the rights and inclusion of Roma communities. Selected coalitions will engage in joint advocacy, monitoring, and awareness-raising</p>

	<p>activities, with a view to influencing national policies and ensuring the implementation of national Roma strategic frameworks.</p> <p>While also new and other already established coalitions are encouraged to apply, this call aims to specifically build on the results achieved by the Roma Civil Monitoring project (2021-2025), through which National Roma Coalitions monitored the implementation of national Roma strategic frameworks and advocated for a better implementation of the framework on national level.</p>
Eligible Activities:	<p>Objectives</p> <p>To support cooperation, coalition building and exchange between (pro-) Roma CSOs in EU Member States for strengthened advocacy on Roma issues.</p> <p>To hold national governments accountable for the implementation of national Roma strategic frameworks.</p> <p>To promote fundamental rights and EU values of respect for human dignity, freedom, democracy, equality, rule of law and respect for human rights, including those of minorities through greater political participation of Roma CSOs.</p> <p>Eligible Activities</p> <p>Projects must take place in EU Member States and can include:</p> <p>Advocacy initiatives (e.g. meetings with policymakers, campaigns, position papers)</p> <p>Monitoring and watchdog actions</p> <p>Capacity-building (training, coaching, workshops)</p> <p>Awareness-raising campaigns</p> <p>Research and community-based consultation</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>One organisation will apply as coordinator on behalf of a coalition of CSOs. The coordinator will be the sole beneficiary of the grant and will be responsible for the administration of the grant on behalf of the coalition.</p> <p>Applicants are required to submit a Memorandum of Understanding (or similar document confirming a coalition) between at least 4 (pro-)Roma civil society organisations from the same country, confirming their cooperation and appointing one organisation as coordinator for this project proposal. Coalition members (other than coordinator) do not have to be registered legal entities but still need to respect EU values and fundamental rights.</p> <p>Civil society organisations can apply as coordinator of a coalition if they are:</p> <p>established in a Member State of the European Union</p> <p>Neither be an affiliated entity, nor an associated partner or contractor of ERGO Network, Autonomia Foundation, FAGIC, Integro Association, RomanoNet or Nevo Parudimos (this does not include member organisations of above networks and associations. These are eligible).</p> <p>Not established for private gain.</p> <p>They may engage in paid economic activities and employ staff, but any income must not be distributed among members, founders, or managers. Economic activities must remain secondary and support the organisation's mission.</p> <p>Their main purpose is not to represent the economic or professional interests of their members.</p> <p>They were established voluntarily by private individuals or groups, and their activities include elements of voluntary work.</p>

Total Budget:	€225,000
Deadline:	05/08/2025

Call Title:	Enhancing Institutional Capacity in the Office of the Auditor General, Uganda
Programme:	European Commission (EC)
Objective:	The European Commission is accepting applications for Enhancing Institutional capacity in the Office of the Auditor General, Uganda (SAI – Uganda).
Eligible Activities:	<p>Objectives To strengthen the institutional capacity of the Office of the Auditor General (OAG) in conducting value-adding audits that promote accountability, transparency, and good governance, ultimately fostering improved service delivery in Uganda. To improve the management and technical capacity of the Office of the Auditor General (OAG) to plan and undertake audits and post audit processes as prescribed by the law and in line with international standards and best practices.”</p> <p>Components Enhanced institutional capacity to undertake IT audits Undertake value-adding audits in the emerging areas of Energy and Extractives Staff Capacity Development towards improved alignment with INTOSAI standards</p> <p>Funding Information The maximum EU contribution to the Twinning contract is € 2 000 000. The overall execution period of the Twinning contract is 36 months.</p>
Eligible Applicants:	<p>Eligibility Criteria Only Public Administrations and Mandated bodies as per Twinning Manual of European Union Member State may apply through European Union Member States’ National Contact Points.</p> <p>Qualifications, experience and skills required: At least a Bachelor’s Degree or equivalent in management, public administration, economics, law, accounting or another field related to the project or in the absence of a Bachelor’s degree, 8 years of professional experience At least 3 years of specific experience in state audit related matters Proven contractual relation to a public administration or mandated body; Very good command of English equivalent to C1 level, both orally and written; Computer literacy. The following experience and skills will be considered as assets: Proven experience in managing capacity-building projects for Supreme Audit Institutions (SAIs).\Proven expertise in Performance audit methodologies and standards Proven expertise in IT audit methodologies and standards. Experience with twinning rules and procedures.</p>

Total Budget:	€2,000,000
Deadline:	26/08/2025

Call Title:	Synergies and Mutual Learning with National and Regional Initiatives on Industrial Decarbonisation
Programme:	Horizon Europe
Objective:	<p>Submissions are now open for the topic ‘Synergies and Mutual Learning with National and Regional Initiatives in Europe on Industrial Decarbonisation’.</p> <p>Scope</p> <p>The governance of the action should be under the authority of national and regional governments and relevant public bodies who are responsible for national and regional policies, strategies and programmes addressing energy intensive industries.</p> <p>Proposals should support the coordination of national and regional public authorities’ funding of research, innovation, acceleration of public/private R&I and deployment of technologies for the energy intensive industries’ decarbonisation. It should be aligned with the policies rolled out under the Clean Industrial Deal. The proposals should take into account and build on the Mutual Learning Exercise on Industrial Decarbonisation. Coordination and support activities should address all of the following:</p> <p>Promote and organise active networking, exchanges of information and mutual learning and the application of a whole-of-government approach, involving national and regional authorities.</p> <p>Build an overview of national and regional technology roadmaps, strategies, and action plans on industrial decarbonisation.</p> <p>Compare this overview to relevant work at European level, including the ERA Industrial Technology Roadmap for low carbon technologies in energy-intensive industries, the updated SRIAs of the Processes4Planet and Clean Steel Partnerships, activities under the Innovation Funds, the SET-Plan, and the Net Zero Industry Act (and its implementing acts), as well as the 2020 Taxonomy Regulation and its implementation as regards climate mitigation.</p> <p>Build and exchange knowledge and expertise in national and regional industrial decarbonisation roadmapping for low-carbon technologies in energy-intensive industries; and develop monitoring tools and identify indicators to monitor progress.</p> <p>Promote the valorisation of knowledge and results of EU, national and regional projects, in line with the Council conclusions on knowledge valorisation of 23 May 2024.</p> <p>Implement the action through analytical work, providing information and data, workshops to facilitate collaboration among countries participating under the energy intensive industry part of the ERA Action and relevant working parties under the SET Plan among others.</p>
Eligible Activities:	<p>Expected Outcomes</p> <p>Increased cooperation across Member States and Associated Countries related to European, national and regional initiatives in the field of decarbonisation of energy - intensive industries in the context of a R&I deployment agenda.</p> <p>Support the implementation of the part on accelerating the decarbonisation of energy-intensive industries of the ERA Action on “Accelerating R&I investments for Europe’s</p>

	<p>industrial Transformation and Competitive Sustainability” featuring in the 2025-2027 ERA Policy Agenda.</p> <p>Exchange of best practices across Member States and Associated Countries on industrial decarbonisation projects and initiatives under the ERA Action and in the context of a R&I deployment agenda.</p> <p>Contribute to the Coordination of actions under the ERA Action and relevant work streams under the SET-Plan.</p> <p>Facilitate the development of new and update of existing national and regional industrial decarbonisation roadmaps, strategies, and action plans on energy intensive industries of countries participating in the ERA Action as well as under the SET Plan.</p> <p>Make available relevant national and regionally funded projects on the European Innovation Centre for Industrial Transformation and Emissions (INCITE)-Platform in line with a methodology developed by the Joint Research Centre in cooperation with other Commission services.</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>Entities eligible to participate:</p> <p>Any legal entity, regardless of its place of establishment, including legal entities from non-associated third countries or international organisations (including international European research organisations) is eligible to participate (whether it is eligible for funding or not), provided that the conditions laid down in the Horizon Europe Regulation have been met, along with any other conditions laid down in the specific call/topic.</p> <p>A ‘legal entity’ means any natural or legal person created and recognised as such under national law, EU law or international law, which has legal personality and which may, acting in its own name, exercise rights and be subject to obligations, or an entity without legal personality.</p> <p>To become a beneficiary, legal entities must be eligible for funding.</p> <p>To be eligible for funding, applicants must be established in one of the following countries:</p> <p>the Member States of the European Union, including their outermost regions: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechia, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden.</p> <p>the Overseas Countries and Territories (OCTs) linked to the Member States: Aruba (NL), Bonaire (NL), Curaçao (NL), French Polynesia (FR), French Southern and Antarctic Territories (FR), Greenland (DK), New Caledonia (FR), Saba (NL), Saint Barthélemy (FR), Sint Eustatius (NL), Sint Maarten (NL), St. Pierre and Miquelon (FR), Wallis and Futuna Islands (FR).</p> <p>countries associated to Horizon Europe; Albania, Armenia, Bosnia and Herzegovina, Canada, Faroe Islands, Georgia, Iceland, Israel, Kosovo, Moldova, Montenegro, New Zealand, North Macedonia, Norway, Serbia, Tunisia, Türkiye, Ukraine, United Kingdom.</p>
Total Budget: €1,000,000	
Deadline: 23/09/2025	
More information and official documents:	https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/HORIZON-CL4-INDUSTRY-2025-01-TWIN-TRANSITION-38

Call Title:	Accelerate the Uptake of Life-Cycle Assessment for Safe and Sustainable by Design Chemicals and Materials and Resulting Products
Programme:	Horizon Europe
Objective:	<p>The European Commission is accepting proposals for Accelerate the Uptake of Life-Cycle Assessment for Safe and Sustainable by Design Chemicals and Materials and Resulting Products topic.</p> <p>Scope</p> <p>Proposals should identify and fill the gaps in LCA tools, methods and data used for improving the environmental sustainability and efficiency of chemicals, materials and resulting products, taking also into account the criticality of raw materials. The Environmental Footprint (EF) methods should in particular be built on. All stages from raw material extraction to end-of-life disposal of products should be included. Data-driven decisions and actions for a greener and more sustainable future should be enabled, while respecting planetary boundaries. The tools should be in compliance with the Safe and Sustainable by Design framework, hence to be considered as a reference in the proposal.</p> <p>Multidisciplinary research activities should address all the following:</p> <ul style="list-style-type: none"> Develop advanced, user-friendly LCA tools and methodologies that allow for a comprehensive assessment of the environmental sustainability of the entire lifecycle of chemicals, materials and resulting products whilst considering planetary boundaries; Develop LCA datasets, in particular building on the EC PEF methods, from design to end-of-life of at least three relevant chemicals or materials and a selection of their resulting products. The selected substances should be emerging alternatives to substances of concern (as defined in the ESPR proposal) and should have a high socio-economic value; Develop solutions to fill in the identified data and assessment gaps and to estimate LCA uncertainty, using advanced digital technologies, modelling, machine learning and artificial intelligence; Feed relevant sustainability databases managed by the European Institutions and Agencies, such as the European Platform on LCA (EPLCA), with FAIR data and ensure new tools developed are findable by stakeholders. Provide guidance for LCA modelling of circularity scenarios for chemicals, materials and resulting products, in alignment with EC PEF methods and the SSbD framework; Ensure that the developed tools, methods and datasets are cost-effective and user-friendly in order to increase uptake and use in industry; Develop guidelines and user-friendly solutions to enable a seamless integration of the new LCA approaches with existing safety assessment tools and methods (notably the EC PEF method) to ensure a holistic SSbD assessment from the early innovation phases; Engage with the wider stakeholder community, especially with SMEs, to promote a harmonised use of the proposed tools and methodologies; Perform training and knowledge transfer activities to promote LCA and SSbD knowledge as well as life cycle thinking within the R&I ecosystem; Projects should contribute to yearly policy briefs and technical discussions, for example under the Eco-design for Sustainable Products Regulation (ESPR) or with the EF Technical Advisory Board; Proposals should leverage the experience of Social Sciences and Humanities (SSH) researchers in refining models related to child labour, employment conditions, and other socio-economic factors within LCA;

	The improved/advanced tools and methods should consider evaluating the economic and social dimension of sustainability at product level based on a functional unit.
Eligible Activities:	<p>Expected Outcomes</p> <p>Projects are expected to contribute to the following outcomes:</p> <p>Support the implementation of EU strategies such as the proposed Eco-design for Sustainable Products Regulation (ESPR), the EU Ecolabel, the Green Claims Directive proposal, the One-Substance-One-Assessment package, the Batteries Regulation, the Critical Raw Materials Act and the Net Zero Industry Act with scientific evidence on sustainability throughout the entire life cycle of chemicals and materials,;</p> <p>Reduce significantly the cost to apply LCA at company level, including for SMEs, compared to current costs;</p> <p>Allow an efficient and simplified LCA application at early stage of design and facilitate decision making for companies and policy makers by providing user-friendly and cost-effective tools, methods and data;</p> <p>Provide advanced, reliable and predictive life cycle models and impact assessment methods, allowing for a satisfactory measurement of planetary boundaries;</p>
Eligible Applicants:	<p>Eligibility Criteria</p> <p>Entities eligible to participate:</p> <p>Any legal entity, regardless of its place of establishment, including legal entities from nonassociated third countries or international organisations (including international European research organisations) is eligible to participate (whether it is eligible for funding or not), provided that the conditions laid down in the Horizon Europe Regulation have been met, along with any other conditions laid down in the specific call/topic.</p> <p>A 'legal entity' means any natural or legal person created and recognised as such under national law, EU law or international law, which has legal personality and which may, acting in its own name, exercise rights and be subject to obligations, or an entity without legal personality.</p> <p>To become a beneficiary, legal entities must be eligible for funding.</p> <p>To be eligible for funding, applicants must be established in one of the following countries:</p> <p>the Member States of the European Union, including their outermost regions: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechia, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden.</p> <p>the Overseas Countries and Territories (OCTs) linked to the Member States: Aruba (NL), Bonaire (NL), Curaçao (NL), French Polynesia (FR), French Southern and Antarctic Territories (FR), Greenland (DK), New Caledonia (FR), Saba (NL), Saint Barthélemy (FR), Sint Eustatius (NL), Sint Maarten (NL), St. Pierre and Miquelon (FR), Wallis and Futuna Islands (FR).</p> <p>countries associated to Horizon Europe:</p> <p>Albania, Armenia, Bosnia and Herzegovina, Canada, Faroe Islands, Georgia, Iceland, Israel, Kosovo, Moldova, Montenegro, New Zealand, North Macedonia, Norway, Serbia, Tunisia, Türkiye, Ukraine, United Kingdom.</p>

Total Budget: €15,000,000	
Deadline: 23/09/2025
