

Sublette County Forest Collaborative

February 17, 2017

Information needs

1. What is forest resiliency?
2. Biofuels
3. Economics related to forests
4. Current conditions and inventory of forests, disturbance data - USFS
5. Lynx habitat data, current aerial survey
6. Previous fuel reduction efforts
7. Pull data then set priorities for collaborative
8. NEPA information
9. Ecology of systems and needed research (successional capabilities, including fire frequencies, wildlife, etc.)
10. WUI areas
11. Red green maps
12. What can USFS, BLM, State do or not do (e.g., wilderness, roadless areas)
13. How was NEPA done in Hamm's Fork, Labarge Creek, White Pines fuel reduction, BLM Wyoming Range Mule Deer Project?
14. Call Brain G. regarding GIS information/tool and forest vegetation map
15. Information from user groups
16. Final report from Governor's Task Force on Forests
17. Working Circle/Mill map
18. Watershed health information
