

# HOME MODIFICATIONS

ENABLING AGING IN PLACE

**Home modifications** are changes made to one's home, that make daily activities easier. As we age, having a well-adapted home that meets our individual needs is important. Many homes, however, are not designed with this in mind. Home modifications meet this need, and allow us to remain active and in our homes for longer.

**The Wyoming Home Modification Action Coalition (WYHMAC)** operates with the mission **"To promote home safety, independence and quality of life of Wyoming residents, through increased access to Home Modifications."** We're working to strengthen connections and create a unified network of care, to enable adults ability to remain in their homes and age in place.

To connect with WYHMAC, please reach out to
