HLED 4020/5020, 3 credits

Food, Health & Justice

Online, asynchronous

Food sustains us.

Yet food is also killing us, whether from too much, too little, the wrong kinds, and how we produce it.

This course maps how current *food systems* affect *public health* and *social justice* in the US.

No graduate prerequisites. Undergraduate prerequisites are a COM2, GPA ≥2.75, and a commitment to do all the readings. Multiple disciplines are very welcome! Counts for ENR, the sustainability minor.

HLED 5020 is an approved Specialization course for the UW <u>Graduate</u> Certificate in Community & Public Health.
