POLS 5710: Topics in Health Policy (Elective)
Instructor: Dr. Maggie
Delivery   Swenson Zoom
Day   Tuesdays
Time: 6:10-9:00pm

This "topics" course introduces health policy in the US, exploring how government actions affect health and well-being. You will learn about the US healthcare system and the policies that regulate how healthcare is financed and delivered. This course also takes a broader approach to health policy by examining the health impacts of various social policies and social systems. We will explore contemporary debates in health policy, such as the tensions between health promotion and individual liberties and health technology and privacy.
