

27 March 2017

Sal Venegas, Jr. Senior Associate Storbeck/Pimentel & Associates 6512 Painter Avenue Whittier, CA 90601

Dear Mr. Venegas:

I was honored to be contacted about the position of Vice President for Research and Economic Development (VPRED) at the University of Wyoming (UW). Through this letter I am pleased to indicate my interest in becoming a candidate for the position. I currently serve as Associate Vice Chancellor for Research at the University of Kansas (KU), where I hold a tenured faculty position in the Chemistry Department. I also act as Vice President of the KU Center for Research, Inc., a 501(c)(3) corporation that receives and manages the majority of KU external sponsored project funding.

My interest in this opportunity stems from UW's reputation as a public research university with a long track record of research excellence and success in garnering Federal sponsored project funding. My early independent research career was coincident with the development of the EPSCoR/IDEA programs. I have been continually impressed by UW's leadership in the NSF EPSCoR program, and its success in leveraging EPSCOR program funding for the benefit of its research and education missions. As Wyoming's only public research university, UW is clearly well regarded and well funded by state government. This relationship is supported by the institution's vision for integrating its research mission with outreach and extension activities--including its engagement in water and other natural resource issues, and biodiversity research--that are critical to the continued prosperity of the State. This intentional collaboration with State and Federal agencies that have substantial interests in the region has created a platform for research on the unique biome of the region. Because research in this area addresses issues in agriculture, tourism, and broader quality of life issues for the citizens of Wyoming, I perceive that UW is viewed as providing substantial added value for the State. Partnering with faculty and staff researchers, and institutional leaders to grow initiatives of this type will be an exciting and fulfilling role for the institution's new Vice President for Research and Economic Development.

Based on the position description and materials complied for UW's VPRED position, I view creativity and vision as the predominant traits required of the institution's next chief research officer. Among other goals, UW seeks to sustain its expansion of R&F funding, grow engagement with private sector research partners, and more closely articulate institutional research and scholarly objectives in biodiversity, neuroscience, and computational science. These disciplines form a rich and interwoven web of research opportunities, given the strong reliance of both modern biodiversity research and neuroscience on advanced

computational modeling. It is also clear the State and other regional partners such as INL and NCAR look to UW as a partner in fostering regional economic development and research initiatives. The substantial economic development staff reporting to UW's VPRED should be a powerful lever the university can use to enhance these collaborations. These are all issues to which I have contributed considerable effort and creative solutions at KU over the past 5 years. I have worked closely with the Provost's Office, academic Deans, and a range of multidisciplinary faculty research teams to foster new research initiatives and expand sources of funding for key programs. I have also played a central role in the design and programming of a new \$300 million multidisciplinary research campus at KU. Given my understanding of UW's strong national reputation, its enthusiasm for collaboration with industry and the substantial potential for fostering research and economic partnerships in the region, I feel confident that I can collaborate with institutional leaders and key development partners to generate innovative initiatives that will build UW's research portfolio.

When I joined KU Research seven years ago, then Vice Chancellor Warren established a vision that our office would represent the outward face of university research to partners in the community and private sector, and to policy-making constituencies in Kansas and the region. Realizing this vision means that I spend a significant amount of my time outside of the Research Office, working with teams of investigators, statewide constituents, and potential private sector partners in research. I currently provide budgetary and strategic oversight for the Kansas Geological Survey, one of the important extension units on the KU campus. This unit has played a critical role in serving the energy sector, statewide agriculture, and mineral exploration interests within the State. It also provides wellrespected input on these issues to the State Legislature. Over the past three years, KGS research has contributed to characterizing seismicity induced by wastewater disposal. informing policy on the utilization of ground water resources, and studying CO₂-based alternative technologies for petroleum and natural gas recovery. These issues have formed alliances among researchers, business representatives and policy makers around questions that are critical to the economic vitality of the State. I have also contributed to a range of strategies to enhance industry partner access to unique university research resources. KU has created a concierge one-stop access for companies seeking partnerships with the university. We have developed technology-specific affiliate programs for industrial collaborators, online clearing houses for KU technology assets, streamlined technology licensure procedures and grant agreements for companies, and offered proof of concept and venture fund initiatives to support the development of new KU startups.

Through the Chairmanship of a major committee of the American Chemical Society, I have had the opportunity to work with one of the largest and most effective science policy advocacy staffs in Washington. In this capacity I have testified before the House Science Committee, and the National Science Board, participated in advocacy visits to Congress, and worked directly to craft policy statements that represented the positions and priorities of the scientific community to Congress. For three years, prior to the "end" of the earmark era, I served on the State advisory council for Kansas Senator Pat Roberts. This council advised Sen. Roberts and his staff on critical priorities for funding of research, education, infrastructure, and economic development programs for the State of Kansas. Finally, I regularly work with KU's Federal government relations staff, including authoring a white paper for the Provost's effort to obtain State funding for our small molecule drug discovery and vaccine development efforts. Strategies for diversifying and expanding support for research and scholarly activities are part of the near-term goals of virtually all of the top 150 institutions in NSF's HERD survey. Universities applying creative approaches to the generation of new research partnerships will be best positioned to thrive in an evolving landscape of core research funding. Within KU Research's Office of Innovation and Collaboration, we have created a 360° customer relations management (CRM) database for corporate partners. Today, large-scale corporate investment tends to flow to universities that successfully connect with companies on multiple levels: Sponsored research projects, technology licensure, student internship programs, hiring in multiple disciplines (basic sciences, engineering and business), alumni in corporate leadership roles, and historical success with partnerships. Our CRM system seamlessly integrates this data and allows our researchers, recruiters, and IP marketing professionals to place discussions with companies in the context of our big picture relationship. Progressing to first-tier partnership status with major companies increasingly demands that diverse stakeholders within universities share these types of information and use the accumulated knowledge to develop coordinated long-range objectives for corporate partnership and philanthropy.

In spite of the imperative for all public research universities to diversify their research funding streams, Federal funding is and will for the foreseeable future remain the most significant source of university R&D funding. Consequently, enhancing opportunities for researchers and multidisciplinary research teams to compete for Federal funding must absolutely remain our top institutional priority. The Federal funding landscape is changing as even the less "mission oriented" Federal agencies increasingly become vehicles for defined, large-scale science and technology initiatives. KU Research has allowed me to stand up a research development group to help faculty continuously track these changes and overcome inertial barriers to the submission of large multidisciplinary and multiinstitutional proposals. Over the past three years, this office has participated in the submission of over \$200 million in proposals. The group has played a major role in staffing new multidisciplinary research teams identified and convened through KU's Bold Aspirations strategic planning process. These initiatives have included small molecule drug discovery, vaccine research, data science, and research on the ecology and economics of surface and ground water resources. KU's Chancellor has recently collaborated with leaders from other universities to transform our homegrown water research initiative into a multidisciplinary Big 12 water research collaboration. Through my involvement with the advisory board for the KU Cancer Center's Institute for Advancing Medical Innovation, I have begun discussions with colleagues in the School of Pharmacy and on the KU-Medical Center campus about how teams of translational of cancer researchers working across our campuses can respond to the new NIH initiatives.

Employing data analysis to understand the weaknesses in one's own research portfolio and identify opportunities to match developing research thrusts with the priorities of Federal agencies can also point out opportunities to diversify the university's research portfolio. Under my leadership we recognized that KU's potential to respond to programmatic needs within Department of Defense (DoD) agencies far exceeded our historical levels of funding from those sources. Initially, I led an effort to construct a closed facility to support DoD research on the KU campus. We then worked over the next 18 months to connect young and mid-career investigators with DoD agencies and new DoD programs like ARL's Open Campus initiative. Over the past year, this effort has resulted in funded DoD projects in new technology areas such as remote sensing and cyber security, as well as four additional high-

level defense agency visits to our campus. Plans to complete an expanded off-campus secure facility are now underway.

I am very proud that my career at KU has allowed me to explore a broad range of scholarly cultures. I began at KU in 1985 focusing on organometallic chemistry and catalysis, areas closely associated with my doctoral and postdoctoral training. As my career has unfolded, my group developed a close collaboration with industrial scientists, working in the area of stereospecific polymerization catalysts. During the latter part of the 1990's, my scholarly interests began to diversify to include STEM education. My transition into work in STEM education has been supported through major funding from NSF, the William and Flora Hewlett Foundation, the Ewing Marion Kauffman Foundation, and the National Mathematics and Science Initiative. Though I continue to work with graduate students in the area of STEM education research, I have recently collaborated with colleagues in the Department of Economics and the School of Education on projects as diverse as monitoring the effects of secondary school mobility and teacher quality on the success of secondary student matriculation into post-secondary education, and the affect of Federal funding in the Chemical Sciences on U.S. economic development. Over the years, my work has generated numerous scholarly products, including invention disclosures, one U.S. patent, and a large number of publications, and invited and contributed presentations, cumulatively obtaining close to \$20 million dollars in external funding for KU from Federal, private sector and foundation sources.

My work in KU Research has also been a platform for learning about university budget and finance processes. As a member of the KU Research leadership team, I regularly participate in reviews of the \$50 million office budget, and provide the Vice Chancellor for Research with advice about the investment of funds for capital improvements and instrument acquisitions, faculty retention, and infrastructure improvement. I provide direct oversight of the budgets of five of KU's university designated Centers and Institutes, and most of the university's core research laboratories. New fiscal controls implemented by our finance group over the past two years have greatly enhanced the office's ability to project income from external sponsored projects, and manage those funds on a short-term and long-term basis. As part of my professional service, I also chair the American Chemical Society's Budget and Finance Committee. This committee works with the Society's professional financial staff to provide oversight and direction for the investment of the Society's annual half-billion dollar budget.

I trust the insights in this letter and the accompanying information highlighting my prior administrative experience resonates with the priorities the search committee holds for UW's VPRED opening. The University of Wyoming is a great public research institution. I would be honored to learn more about the search committee's vision for the future of UW's research and economic development missions, and to discuss how effective research leadership can contribute to bringing these ideas to fruition.

Sincerely, Joseph A. Heppert, Ph.D. Associate Vice Ch

Joseph A. Heppert, Ph.D. Associate Vice Chancellor for Research, Professor of Chemistry

Curriculum Vita Joseph Anthony Heppert, 2017

Contact Information:

KU Office of Research	2901 Oxford Road
2385 Irving Hill Road	Lawrence, KS 66049
Lawrence, KS 66045-2112	785-841-5642 (H)
Youngberg Hall, Room 211	785-864-8235 (W)
E-Mail: jheppert@ku.edu	FAX: 785-864-5396

Education:

9/78 - 12/82	University of Wisconsin, Madison, WI Ph.D Chemistry
	Major concentration- Inorganic Chemistry
	Minor - Organic Chemistry
	Research Director - Professor D.F. Gaines
9/74 - 5/78	San Jose State University, San Jose, CA B.S Chemistry with Great Distinction

Professional Experience:

9/10 – present	Associate Vice Chancellor for Research and Vice President, Kansas University Center for Research, Inc., University of Kansas, Lawrence, KS.
9/09 - 9/10	Associate Vice Provost for Research and Graduate Studies and Vice President, Kansas University Center for Research, University of Kansas, Lawrence, KS.
7/05 - 9/09	Chair, Department of Chemistry, University of Kansas, Lawrence, KS.
7/00 - 7/09	Director of the KU Center for Science Education, University of Kansas, Lawrence, KS.
8/00 – present	Professor of Chemistry, University of Kansas, Lawrence, KS.
7/96 – 8/00	Associate Chair for Undergraduate Studies, Department of Chemistry, University of Kansas, Lawrence, KS.
8/91 - 7/00	Associate Professor of Chemistry, University of Kansas, Lawrence, KS.
9/85 - 7/91	Assistant Professor of Chemistry, University of Kansas, Lawrence, KS.

6/83 - 9/85	Post-Doctoral Fellow for Professor Malcolm Chisholm, Indiana University, Department of Chemistry, Bloomington, IN.
1/83 - 5/83	Visiting Assistant Professor of Chemistry, Indiana University, Bloomington, IN

Selected Administrative and Professional Accomplishments:

Associate Vice Chancellor for Research

- Provides input on formation of the \$50 million budget for KU Research, and directly oversees entities supported by one-third of this budget.
- Provides budgetary and scientific oversight, and conducts regular 5-year evaluations for half of KU's university designated research centers and all KU core research laboratories.
- Manages and assigns all institutional research space and capital infrastructure.
- Collaborates with AVC for Innovation and Collaboration to recruit national and international corporate research partners, and market institutional core research capacity to regional industry.
- Co-leads the planning and design of research spaces in KU's new Integrated Science Building, a \$170 million science research and teaching building scheduled to complete construction in July 2018.
- Facilitates institutional support for developing multidisciplinary research thrusts aligned with KU's *Bold Aspirations* strategic plan.
- Serves on the KU faculty IP committee.
- Authored institutional policies on support for KU startups and access of corporate collaborators to institutional research assets.
- Created KU's research development group to overcome barriers to the submission of large multidisciplinary, and multi-institutional proposals. Over the past two years, this group has participated in the submission of over \$200 million in proposals and achieved \$18 million in awards over the past year.
- Spearheaded an initiative to expand KU's funding from DoD agencies and led the creation of a space for secure research for KU investigators.
- Created a dedicated core facility to support high performance research computing, resulting in a four-fold increase in the computing capacity of KU research clusters.
- Represented KU Research on the KU Master Planning steering committee.

Chair, ACS Committee on Budget and Finance

• Chairs the ACS governance committee providing financial oversight of programs supported by the Society's half-billion dollar budget.

Chemistry Department Chair

- Oversaw department hiring and faculty mentoring that laid the groundwork for an increase in faculty count to 30, and growth of total departmental Federal expenditures from \$7 million to \$10 million per year over a 5-year period.
- Initiated nominations leading to appointment of the first two female university distinguished professors in Chemistry Department history.

• Testified before the U.S. House Science Committee and the National Science Board on the importance of Federal support for science, technology, engineering, and mathematics (STEM) education.

Center Director/Principal Investigator

- Founded KU Center for Science Education (currently KU Center for STEM Learning) at the invitation of KU's Chancellor.
- Co-founded the UKanTeach Program, which created a new four-year secondary STEM teacher licensure program using funding from the Kauffman Foundation and the National Mathematics and Science Institute.
- Obtained \$20 million in research funding from Federal agencies and foundations over the past 30 years.

Academic Honors:

National	
2012	Fellow of the American Chemical Society
University	
Spring 2012	KU Leading Light Award, Institutional Recognition of Sponsored Program Funding
9/01 - 5/02	Vice Chancellor's Fellow, KU
Fall 1998	Keeler Intra-University Professorship, KU
Spring 1998	Graduate Teaching Award, KU Center for Teaching Excellence
Graduate	
9/81 - 5/82	Eastman Kodak Fellowship, University of Wisconsin, Department of Chemistry.
1/79 - 5/79	Samuel McElvain Research Assistantship, University of Wisconsin, Department of Chemistry.
Undergraduate	
Fall 77- Spring 79 Su 1975 - 1997	General Motors Corporation Scholarship, San Jose State University. Undergraduate Trainee Fellowship at Lawrence Livermore Laboratory, AWU/ERDA.

Inventions and Patents:

Patent Applications and Provisional Patent Applications Filed through K.U.

1. "Process for Producing Cetane Improvers from Triglycerides," <u>Galen J. Suppes, Joseph A.</u> <u>Heppert</u>, 11 Nov 96.

Invention Disclosures Filed with K.U.

- 1. "Soluble Highly-Pure Metathesis Polymerization Pro-catalysts Bearing Imido and Chelating Aryloxide Ligands," J.A. Heppert, 7 Jan. 93.
- 2. "Stereochemically Defined Imido Ligands in Selective Catalysis," J.A. Heppert, N.W. Eilerts, T.J. Baroni, 3 Feb 93.
- 3. "Imido Substituted Polyoxomolybdate Clusters as Polymerization of Co-Catalysts," J.A. Heppert, Eric Maatta, 5 Feb 93.
- 4. "Soluble Highly Pure Metathesis Polymerization and RIM Thermoset Metathesis Catalysts Bearing Acetylene Ligands," J.A. Heppert, January 23, 1994.
- 5. "Soluble Highly Pure Anionic Metathesis Polymerization and RIM Thermoset Metathesis Catalysts Bearing Oxo, Aryl Imido and Acetylene Ligands," J.A. Heppert, July 23, 1994.
- 6. "New Two Component Metathesis, ROMP and Metathesis RIM Polymerization Catalysts

Featuring a Highly Active Aluminum Activator". J.A. Heppert, Sept.20, 1995.

- 7. "New Highly Active Two Component Activators for Transition Metal Metathesis and Metathesis Polymerization Catalysts", J.A. Heppert, Sept.20, 1995.
- 8. "Cetane Enhancers through the Ozonolysis of Fatty Acids and Triglycerides." J.A. Heppert <u>G.J. Suppes</u>, November 1996.
- 9. "Cetane Enhancers through the Oxygenation of Fatty Acids and Triglycerides." J.A. Heppert G.J. Suppes, November 1996.
- 10. "An Abbreviated Route to Nitrated Cetane Enhancers Through Transesterification of Triglycerides" J.A. Heppert, G. J. Suppes, November 1996.

Professional Training Courses:

1. American Chemical Society, January 2017 Leadership Conference, "Extraordinary Leaders."

Invited Presentations:

- 1. Notre Dame University, Inorganic Division Seminar, Notre Dame, IN, "Reactions of $(\eta^6 Haloarene)M(CO)_3$ Substrates with Metal Carbonyl Anions", J.A. Heppert, October 2, 1986.
- 2. MASUA Lecture, University of Missouri-St. Louis," Recent Developments in the Chemistry of Arene Chromium Tricarbonyl Complexes", J.A. Heppert, March 9, 1987.
- 3. MASUA Lecture, University of Nebraska, <u>J. Heppert</u>, March 11, 1987.
- 4. MASUA Lecture, Kansas State University, April 13, 1987.
- 5. University of Oklahoma, Inorganic Divisional Seminar, Norman, OK, "Toward the Synthesis of Chiral Transition Metal Complexes...", J.A. Heppert, Dec. 8, 1987.
- 6. University of South Dakota, Departmental Lecture, Vermillion, SD, "New Directions in Organometallic Stereochemistry", Feb. 8, 1988.
- 7. South Dakota State University, Departmental Lecture, Brookings, SD, "New Directions in Organometallic Stereochemistry", Feb. 9, 1988.
- 8. Augustana College, Student Affiliate, Sioux Falls, SD, "New Directions in Organometallic Stereochemistry", Feb. 9, 1988.
- 9. American Chemical Society National Meeting, Dallas, TX, Ad Hoc Symposium Honoring ACS Inorganic Division Award for M.H. Chisholm, "The Use of Chiral Auxillaries and Group Selective Reactions in ...", J.A. Heppert, Apr. 11, 1989.
- 10. Pharmaceutical Process Division, Dow Chemical Company, Midland, MI, "New Asymmetric Complexes of Groups 4 and 6", J.A. Heppert, June 1989.
- 11. University of New Mexico, Albuquerque, NM, "New Asymmetric Complexes of Group 4 and 6 Metals: Prospects for Application to Stereospecific Synthesis", J.A. Heppert, March 12, 1990.
- 12. University of Utah, Salt Lake City, UT, "New Asymmetric Complexes of Group 4 and 6 Metals: Prospects for Application to Stereospecific Synthesis", J.A. Heppert, March 13, 1990.
- 13. Utah State University, Logan, UT, "New Asymmetric Complexes of Group 4 and 6 Metals: Prospects for Application to Stereospecific Synthesis", J.A. Heppert, March 14, 1990
- 14. University of Arizona, Tuscon, AZ, "New Asymmetric Complexes of Group 4 and 6 Metals: Prospects for Application to Stereospecific Synthesis", J.A. Heppert, March 15, 1990
- 15. Great Lakes Regional Meeting, Dekalb, Il, Symposium on Transition Metal Mediated

Organic Synthesis, "New Routes to Asymmetric Organotransition Metal Reagents", May 31, 1990.

- 16. CIC Meeting, Halifax, Nova Scotia, Symposium on Transition Metal Mediated Organic Synthesis, "Binaphtholate Complexes of the Early Transition Elements", July 16, 1990.
- 17. University of Missouri, Kansas City, Departmental Lecture, "New Perspectives on Asymmetric Transition Metal Complexes", Sept. 6, 1990.
- 18. Metathesis Polymers Division, B.F. Goodrich Company, Brecksville, OH, "Some Aspects of the Application of Molecular Design to ROMP Catalysis", October 5, 1990.
- 19. University of Iowa, Iowa City, IA, Departmental Lecture, "New Asymmetric Complexes of Groups 4 and 6", November 9, 1990.
- 20. Iowa State University, Ames, IA, Inorganic Divisional Lecture, "New Asymmetric Complexes of Groups 4 and 6", November 7, 1990.
- 21. Grambling State University, Grambling, LA, Departmental Lecture, "Some New Applications for Asymmetric Organotransition Metal Complexes", November 29, 1990.
- 22. Louisiana State University, Baton Rouge, LA, Departmental Lecture, "Some New Applications for Asymmetric Organotransition Metal Complexes", November 30, 1990.
- 23. Tulane University, New Orleans, LA, Departmental Lecture, "Some New Applications for Asymmetric Organotransition Metal Complexes", December 3, 1990.
- 24. University of Texas Austin, Inorganic Divisional Lecture, "New Applications for Asymmetric Complexes of the Group 4 and 6 Metals", April 24, 1991.

- Fall 1984 ACS Meeting, St. Louis, MO, "Reactions of (Me₃SiCH₂)₄W₂(μ-CSiMe₃)₂(M=W or Ta) with Alkynes: The Formation of a Dimetallaallyl Ligand in (MeSiCH₂)₄W₂(μ-C(R)₂SiMe₃)(μ-CSiMe₃), Where R=H, Me and Ph". J. A. Heppert, Malcolm H. C. and J. C. Huffman, Department of Chemistry, Indiana University, Bloomington, Indiana 47405, September 4, 1984.
- 3. Inorganic Gordon Research Conference, Wolfeboro, NH, "The Chemistry of Ditungstacyclobutadienes", J. A. Heppert, M. H. Chisholm, Department of Chemistry, July 1984.
- 4. Fall 1985 ACS Meeting, Denver, CO, "The Synthesis of Alkoxide- Substituted 1,3-Ditungstacyclobutadienes", <u>J.A. Heppert</u>, M.H. Chisholm, J.C. Huffman, E.J. Kober and D.L. Lichtenberger, September 12, 1985.
- 5. Fall 1985 ACS Meeting, Denver, CO, "Reactions of Ditungstacyclobutadienes with Allenes. The Formation of a Unique Allyl-Substituted Alkylidene Ligand in $(R)_2(R')_2W_2[\mu, \eta^3 - C(SiMe_3)C(CHR'')_2](\mu-CSiMe)$, Where R and R' = Me_3SiCH₂, O-t-Bu and O-i-Pr, and R'' = H, Me and Ph'', J.A. Heppert, M.H. Chisholm and J.C. Huffman, September 12, 1985.
- 6. Organometallic Gordon Research Conference, Andover, NH, "Nucleophilic Aromatic Substitution By Metal Carbonyl Anions at Haloarene Chromium Tricarbonyl Substrates", J.A. Heppert, August 12, 1986.

- 21st Annual Midwest Regional ACS Meeting, Kansas City, MO, "Nucleophilic Aromatic Substitution at (η⁶-Chloroaryl)Tricarbonyl Chromium Substrates by Metal Carbonyl Anions", <u>J. A. Heppert</u>, D. M. Scherubel, M. A. Morgenstern, Department of Chemistry, University of Kansas, November 6, 1986
- American Chemical Society, National Meeting, Denver, CO, "Aspects of the Mechanism of Nucleophilic Substitution at (η⁶-haloarene)Cr(CO)₃ Substrates by [CpM(CO)₂]⁻ Nucleophiles", J.A. Heppert, April 6, 1987,
- 9. American Chemical Society, National Meeting, New Orleans, LA, "Tetracarbonyl Ferrate Derivatives of (Arene)Cr(CO)₃ Substrates", J.A. Heppert, Sept. 3, 1987.
- 10. Missouri Inorganic Day, Washington U., St. Louis, MO, "Asymmetric Deprotonation of...", J. A. Heppert, April 30, 1988.
- NSF Organometallic Workshop, St. Louis, MO, "Asymmetric Deprotonation of (η-Arene)Cr(CO)₃ Complexes", J.A. Heppert, May 21, 1988.
- 12. American Chemical Society National Meeting, Toronto, Canada, "Bidentate Alkoxide Complexes of the Group IV Metals", T.J. Boyle, J.A. Heppert, F. Takusagawa, June 7, 1988.
- Organometallic Gordon Conference, Newport, RI, "Group Selective Deprotonation of (η-Arene)Cr(CO)₃ Complexes", <u>J. Heppert</u>, June 28, 1988.
- American Chemical Society National Meeting, Los Angeles, CA, "A Tungsten- Tungsten Triple Bond Bearing Chiral Alkoxide Ligand: W₂(O-t-Bu)₄(1,1'- bi-2-naphtholate)", <u>J.A.</u> <u>Heppert</u>, S.D. Dietz, T.J. Boyle, F. Takusagawa, Sept. 23, 1988.
- American Chemical Society National Meeting, Los Angeles, CA, "Diastereomeric Group Selectivity in the Asymmetric Deprotonation of (η- Arene)Cr(CO)₃ Complexes", <u>J.A.</u> <u>Heppert</u>, M.E. Thomas-Miller, M.J. Milligan, D.G. Vander Velde, J. Aube, Sept. 22, 1988.
- American Chemical Society National Meeting, Dallas, TX "The Diastereospecific Synthesis of a π-Cyclohexadiene-*exo*-ene Chromium Complex", J.A. Heppert, <u>M.L. Milligan</u>, Apr. 11, 1989.
- 17. American Chemical Society National Meeting, Dallas, TX, "The Synthesis and Reactivity of Binaphtholate Complexes of Tungsten", J.A. Heppert, <u>S.D. Dietz</u>, F. Takusagawa, Apr. 11, 1989.
- 18. Southwest Organometallic (J.J. Zuckerman Memorial) Workshop, Norman, OK, "New Challenges in Group 6 Chemistry", J.A. Heppert, May 27, 1989.
- 19. Organometallic Gordon Research Conference, Newport, RI, "New Asymmetric Complexes of Groups 4 and 6", J.A. Heppert, July 1989.
- 20. American Chemical Society National Meeting, Boston, MA, "Binaphtholate- Substituted Metal Alkylidenes: Approaches to Stereocontrolled Olefination", J.A. Heppert, <u>S.D. Dietz</u>, M.D. Morton, April 1990.
- 21. American Chemical Society National Meeting, Boston, MA, "Chiral d^o- Tungsten Alkylidene Complexes: Application to the Stereo-Controlled ROMP of Norbornene", <u>J.A.</u> <u>Heppert</u>, S.D. Dietz, M.D. Morton, April 1990.
- 22. American Chemical Society National Meeting, Boston, MA, "The Dehalogenation of Arene and Arenetricarbonyl Chromium Compounds with Metal Carbonyl and Metal Carbonyl Hydride Reagents", <u>M.A. Morgenstern</u>, J.A. Heppert, M.E. Thomas-Miller, D.J. Scherubel, M.K. Shaker, April 1990.
- American Chemical Society National Meeting, Boston, MA, "Asymmetric Bimetallic Complexes Built Around an (η⁶-Arene)Cr(CO)₃ Template", J.A. Heppert, <u>M.L. Milligan</u>, M.E. Thomas-Miller, M.J. Smith, S.D. Gray, E.A. Toplikar, R. Newburn, April 1990.

- American Chemical Society National Meeting, Boston, MA, "Asymmetric Synthesis of (η⁶-Arene)Cr(CO)₃ Complexes", <u>J. Aube</u>', J.A. Heppert, M.L. Milligan, P. Zenk, M.J. Smith, April 1990.
- 25. Organometallic Gordon Research Conference, Newport, RI, "Novel Approaches to Asymmetric Organotransition Metal Complexes", J.A. Heppert, June 1990.
- 26. American Chemical Society National Meeting, Washington, DC, "Unprecedented Diastereospecific Ligand Substitution in d³-d³ W₂ Complexes", <u>J.A. Heppert</u>, S.D. Dietz, N.W. Eilerts, August 28, 1990.
- 27. American Chemical Society National Meeting, Washington, DC, "Cyclopentadienyl Dicarbonyl Iron (O) Complexes Containing Ketal Chiral Auxiliaries", <u>M.E. Thomas-Miller</u>, J.A. Heppert, August 30, 1990.
- 28. Marvel Symposium, University of Arizona, Tuscon, AZ, "Dinuclear W₂ and Ta Complexes as ROMP Catalysts", J.A. Heppert, M.D. Morton, N.W. Eilerts, April 12, 1991.
- 29. Sam Houston State University, Huntsville, TX, Chemistry Department, "An Introduction to Organometallic Research", April 23, 1991.
- 30. Steven F. Austin State University, Nacogdoches, TX, Chemistry Department, "An Introduction to Organometallic Research", April 25, 1991.
- 31. ISOM9, Metathesis Conference, Ursinus College, King of Prussia, PA, "Ta₂ Complexes as Norbornene Polymerization Catalysts", <u>M.D. Morton</u>, J.A. Heppert, July 23, 1991.
- 32. ISOM9, Metathesis Conference, Ursinus College, King of Prussia, PA, "Are Dimetallacyclobutadiene Complexes Catalysis or Catalyst Precursors for the ROMP of Norbornene?", J.A. Heppert, July 25, 1991.
- 33. Midwest Regional ACS Meeting, Omaha, NE, ,November 7, 1991 "Alcoholoysis and Thermolysis Reactions of W₂(μ-CSiMe₃)₂(CH₂iMe₃)₄, <u>N.W. Eilerts</u>, J.A. Heppert.
- 34. Midwest Regional ACS Meeting, Omaha, NE, November 7, 1991. "Synthesis and Derivatization of W₂(NMe₂)₂(OCMe(CF₃)₂)₄", <u>M.D. Morton</u>, J.A. Heppert, F. Takusagawa.
- 35. Creighton University, Departmental Lecture, "Aspects of Ligand Design in Stereocontrolled Polymerization Catalysis, Joseph A. Heppert, February 21, 1992.
- 36. American Chemical Society, National Meeting, San Francisco, CA, "Synthesis of Bifunctional Group 4 Electrophiles". <u>N.W. Eilerts</u>, D.L. Barnes, J.A. Heppert, April 5, 1992.
- 37. American Chemical Society, National Meeting, San Francisco, CA, "Ring Opening Metathesis Polymerization by Dinuclear W and Ta Catalysts." <u>N.W. Eilerts</u>, J.A. Heppert, <u>M.D. Morton</u>, April 5, 1992.
- 38. American Chemical Society, National Meeting, San Francisco, CA, "Synthesis and Thermodynamic Characteristics of W₂(NMe₂)₂(OCMe(CF₃)₂)₄. <u>M.D. Morton</u>, J.A. Heppert, F. Takusagawa, D. VanderVelde, April 5, 1992.
- American Chemical Society, National Meeting, San Francisco, CA, "Stereoelectronic Effects on π-Bonding in Asymmetric Tungsten(VI) Oxo and Imido Complexes." S.D. Dietz, J.A. <u>Heppert</u>, M.D. Morton, F. Takusagawa, April 5, 1992.
- Organometallic Gordon Research Conference, Newport, RI, "Stereoelectronic Effects on π-Bonding in Asymmetric Tungsten(VI) Oxo and Imido Complexes," J.A. Heppert, July 29, 1993.
- 41. American Chemical Society, National Meeting, Washington, D.C. "The Importance of Ligand Structure and Secondary Metathesis in Determining the Stereochemistry of ROMP Processes," J.A. Heppert, M.D. Morton, S.D. Dietz, N.W. Eilerts, August 28, 1992.

- 42. American Chemical Society, Midwest Regional Meeting, Lawrence, KS, "Stereoelectronic Effects in Pseudoctahedral Tungsten(VI) Oxo and Imido Complexes Bearing Chelating Aryloxide Ligands," J.A. Heppert, M.D. Morton, W.H. Huang, November 5, 1992.
- 43. American Chemical Society, National Meeting, Denver, Co. "Synthesis and Reactivity of Binaphtholate-Chloride Complexes of Titanium", T.J. Boyle, <u>N.W. Eilerts</u>, J.A. Heppert, F. Takusagawa, March 30, 1993.
- 44. American Chemical Society, National Meeting, Denver, Co. "Influence of a Novel Binding Mode of Aromatic Diols with W(VI) Oxo and Imido Tetrachloride." S.D. Dietz, J.A. Heppert, M.D. Morton, F. Takusagawa, March 30, 1993.
- 45. Marvel Symposium, University of Arizona, Tucson, AZ "Synthesis and Reactivity of Binaphtholate Complexes of Titanium," J.A. Heppert, March 12, 1993.
- 46. Organometallic Gordon Research Conference, Newport, RI, "Synthesis and Reactivity of Binaphtholate Complexes of Titanium," J.A. Heppert, July 15, 1993.
- 47. American Chemical Society, National Meeting, Chicago, IL, "An Examination of the Effect of Chiral Ligands on the Tacticity of ROMPed Polynorbornene," S.D. Dietz, <u>N.W. Eilerts</u>, J.A. Heppert, M.D. Morton, August 24, 1993.
- 48. American Chemical Society, National Meeting, San Diego, CA "Well-Characterized Binaphtholate Titanium Dichloride Lewis Acids," Organometallic Chemistry of Early Transition Metals," J.A. Heppert, N.W. Eilerts, T.J. Boyle, M. Kennedy, F. Takusagawa, March 16, 1994.
- 49. 2nd KANSYN Workshop, Manhattan, Kansas, "Well-Characterized Binaphtholate Titanium Dichloride Lewis Acids," J.A. Heppert, May 24, 1994.
- 50. American Chemical Society, National Meeting, Washington, DC "Salicylate Like Ligands in the Synthesis of Hydrogen Bonded Tungsten Oxo, Aryl Imido and Acetylene Complexes," J.A. Heppert, R.R. Hodel, T.J. Boyle, T.E. Baroni, F. Takusagawa, August 21, 1994.
- 51. American Chemical Society, National Meeting, Anaheim, CA, "Organometallic Free Acids of d² Tungsten Acetylene Complexes," J.A. Heppert, R.R. Hodel, T.E. Baroni, G. Yap, A. Rheingold, April 6, 1995.
- 52. Cotton Anniversary Symposium, Texas A&M, College Station Texas, "Hydrogen Bonding in Tungsten(IV) Oxo Acid Complexes," T.E. Baroni, J.A. Heppert, V. Kolesnichenko, R.R. Hodel, M.D. Morton, F. Takusagawa, G. Yap, A.L. Rheingold, April 1995.
- 53. 31st Annual Conference on Coordination Chemistry, Vancouver, B.C., "Octahedral Molecular Templates: Nickel(II) Complexes of Schiff Base Ligands with Terminal Functional Groups," A.L. Vance, N.W. Alcock, D.H. Busch, J.A. Heppert, August 21, 1996.
- 54. Midwest Regional ACS Meeting, Brookings, S.D. "Novel Catalysis of [4+2] Cycloaddition Reactions with Triply Bonded Ditungsten Complexes," K. Millslagle; M.H. Mason; G. Goloverda; E.A. Smith; J.A. Heppert, October 1996.
- 55. CSM Symposium on Laser Techniques, Lawrence, K.S. "Potential Applications in Nonlinear Optical Materials," J.A. Heppert, January 1997.
- 56. KSTAR-NSF-EPSCoR Conference, "the Kansas Collaborative for Excellence in Teacher Preparation," April 1997.
- 57. Midwest Regional ACS Meeting, Joplin, MO. "Hydrogen Bonding in Supramolecular Tungsten Compounds," T.L. Lambert; M.H. Mason; T.J. Baroni; L. Seib; J.A. Heppert, October 1997.
- 58. NSF Regional Conference on Shaping the Future, "Cooperative Efforts to Change Teacher Preparation in Kansas," January 12, 1998.

- 59. Kansas Statewide EPSCoR Conference, Topeka, KS "the Kansas Collaborative for Excellence in Teacher Preparation," February 19, 1998.
- 60. CSM Symposium on Supramolecular Materials, Lawrence, KS "A Tale of Two Polymers," May 1998.
- 61. ACS National Meeting, Boston, MA, "Novel Low Nitrogen Cetane Improvers," M.H. Mason, J.A. Heppert, G.J. Suppes, Z. Chen, C. Tat, August 22, 1998.

Funded Grants:

- 1. Cottrell Research Grant, Research Corporation, \$12,000. Spring 1986-Fall 1986.
- 2. Petroleum Research Fund, Type G Proposal, \$18,000. Spring 1987-Fall 1989.
- 3. Petroleum Research Fund, SRF Supplement, \$2,500. Summer 1989.
- 4. Petroleum Research Fund, Type AC Proposal, \$40,000, "Aspects of the Molecular Rearrangement in Titanium Alkoxide Complexes", Sept. 1, 1990- August 31, 1992.
- 5. Petroleum Research Fund, SRF Supplement, \$2,500. Summer 1991.
- 6. NSF Instrument & Remodeling, "ESR Instrumentation Proposal" \$300,000. (Tom Squires, Lead P.I.)
- 7. NSF-EPSCoR, KAN-SYN, \$1,200,000. (D. Busch, Lead P.I.) October 1992.
- 8. Petroleum Research Fund: Type AC "Tunable Hydrogen Bonded Metal Complexes," February 1994, \$50,000.
- 9. B.F. Goodrich "Catalyst Design for High Performance RIM Thermosets and Thermoplastics," January 1994, \$50,000.
- 10. NSF-ESI, "Unleashing the Power of Molecular Design and Synthesis for Science and Technology," October 1994, \$260,000.
- 11. B.F. Goodrich "Catalyst Design for Improved RIM Thermosets and Thermoplastics," January 1995, \$50,000.
- 12. NSF-ARI Program (David Vander Velde, P.I.) "Acquisition of 400 MHz NMR Spectrometer," July 1995, \$221,000.
- 13. NSF-EPSCoR, Center for Supramolecular Materials, \$900,000. (D. Busch, Lead P.I.) October 1995.
- 14. KU Office of Academic Affairs, Initiative on the Enhancement of the Freshman/Sophomore

Experience, \$2,300.

- 15. BDM Oklahoma, Advanced Recovery Processes Program, "In Situ Permeability Modification Using Gelled Polymer Systems," (Professor Don Green, Lead PI), \$753,837.
- 16. Soy Bean Producers Council, "Specialty Chemicals from Soy Bean Oil and Soy-Biodiesel," (Professor Galen Suppes, Co-PI) \$18,000.
- 17. NSF EPSCoR, "The Kansas Program for Excellence in Teacher Preparation," \$50,000, August 1996 (Heppert Lead-PI, Professor William LaShier Co-PI).
- 18. Department of Agriculture, "High Value Soydiesel Fuel Additives," \$125,000., August 1997 (Professor Galen Suppes, Co-PI).
- 19. NSF EPSCoR, "The Kansas Program for Excellence in Teacher Preparation," \$18,000, August 1997 (Heppert Lead-PI, Professor William LaShier Co-PI).
- 20. Soy Bean Producers Council, "Specialty Chemicals from Soy Bean Oil and Soy-Biodiesel," (Professor Galen Suppes, Co-PI) \$20,000.
- 21. NSF EPSCoR, "The Kansas Program for Excellence in Teacher Preparation," \$18,000, August 1997 (Heppert Lead-PI, Professor William LaShier Co-PI).
- 22. William and Flora Hewlett Foundation, "A Paradigm Change in the Laboratory Curriculum," \$150,000., January 1998 (Heppert Lead-PI).
- 23. KU Energy Research Center, "Studies of Flow Through Rock Strata," \$6,000, March 1998. Supplement to NSF-REU, \$15,000. (Babara Schowen, Lead PI)
- 24. NSF-CETP Track 1, "the Kansas Collaborative for Excellence in Teacher Preparation," \$2,400,000, June 1999 (Heppert Lead-PI).
- 25. Department of Agriculture, "High Value Soydiesel Fuel Additives," \$160,000. August 1999 (Professor Galen Suppes, Co-PI).
- 26. NSF-CCLI, "Improving Student Understanding of Concentration, Equilibrium and...," \$68,000, June 1999 (Heppert Lead-PI).
- 27. NSF-GK12, "Teaching Fellows in Chemistry, Biology and Physics in the Kansas City Metropolitan Schools," \$1,080,000, September 1999 (Heppert, Robinson Lead-PIs).
- 28. Research Development Fund, KU, \$60,000. Kansas Academy for Science, Engineering and Technology Education, Nov 13, 1999.
- 29. Kansas Soybean Commission, \$29,000. "Molecular Design of Soybean Oil Products," Nov 17, 1999.
- 30. Kansas Soybean Commission, \$29,000. "Molecular Design of Soybean Oil Products," May 2000.
- 31. Department of Commerce, SBIR Track II, \$250,000. "Scale-up and Market Testing of Cetane Improvers Based on Soybean Oil," April 2000.
- 32. NSF-TE, \$1,100,000. "Extending Scientific Inquiry through GIS Technologies," September 2001.
- 33. NSF EPSCoR, "Planning Grant for the Centers for Learning and Teaching and Mathematics and Science Partnership Programs," \$10,000, April 2002.
- 34. AT&T Foundation, "Web-Facilitated Professional Development for Science Teachers in Transition," \$200,000, Jan. 2002.
- 35. NSF-DUE, "The Kansas Collaborative for Excellence in Teacher Preparation (KCETP) Supplement: NOYCE Scholarship Program," \$500,000, January 2003
- 36. NSF-DUE, \$93,325, "Integrating Experiment, Computation, Communication, and Independent Inquiry in the Physical Chemistry Laboratory," Jul. 2003. (Heppert co-PI).
- 37. NSF-ERC, \$17,000,000, "Center for Environmentally Beneficial Catalysis," August

2003. (Heppert co-PI).

- 38. Kansas Board of Regents, \$267,086, "Middle School Science Academy," July 2004 (Heppert PI).
- 39. National Science Foundation, \$199,941, "Learning from Dynamic Visual Displays," October 2005 (Heppert PI).
- 40. National Science Foundation, \$246,352, "REU Site: A Summer Experience for Undergraduates Integrating Research, Education, and Career Development in an Interdisciplinary Environment", February 2007 (Heppert PI).
- 41. Kansas Board of Regents, \$299,862, "Middle School Science Academy-Research Experiences." March 2007 (Heppert, PI).
- 42. Ewing Marion Kauffman Foundation, \$150,000,"UKanTeach", May 2007 (Heppert, PI).
- 43. Ewing Marion Kauffman Foundation, \$120,000, "The Kansas City Area Educational Research Consortium", June 2007 (Heppert, PI).
- 44. National Mathematics and Science Institute, \$2,400,000, "UKanTeach," November 2007 (Heppert, PI).
- 45. NSF-GK-12, \$2,900,000, "The Kansas Partnership for Graduate Fellows in K-12 Education," July 2008 (Heppert, co-PI).
- 46. Ewing Marion Kauffman Foundation, \$834,000, "Envisioning an Education Research Consortium for the Kansas City Metropolitan Area", April 2009 (Heppert, PI).
- 47. National Science Foundation, \$599,792, "The University of Kansas Noyce Phase II Scholarship & Stipend Program", July 2009 (Heppert, co-PI).
- 48. National Science Foundation CRIF Program, \$600,000, "Purchase of a Cyber-enabled Regional 400 MHz Solid-State NMR Spectrometer", August 2009 (Heppert, Lead PI, Munson, co-PI).
- 49. Kansas City Area P-20 Council, \$8,000, "Asset Mapping of P-20 Resources in the Kansas City Metropolitan Area: A SWOT Analysis", July 2010 (Heppert, PI).
- 50. Ewing Marion Kauffman Foundation, \$200,000, "KC-AERC Bridge Grant", January 2011 (Heppert, PI).
- 51. National Science Foundation, \$490,000, "Economic and Scientific Effects of Federal Investment in Academic Chemistry Research", \$600,000 (Heppert, PI) January 2011.
- 52. Ewing Marion Kauffman Foundation, \$1,000,000, "KC-AERC Infrastructure Grant", (Heppert, PI), December 2012.
- 53. National Science Foundation, \$275,170 "REU Site: A Summer Experience for Undergraduates Integrating Research, Education, and Career Development in an Interdisciplinary Environment," (Heppert, co-PI), May 2013.
- 54. National Science Foundation, \$288,920, "REU Site: A Summer Experience for Undergraduates Integrating Research, Education, and Career Development in an Interdisciplinary Environment. National Science Foundation (Heppert, Co-PI). June 2016.

Students:

Postdoctoral Fellows (employment)

- 1. Janet Bond Robinson, 1998-1999 (Ph.D. 1998, University of Iowa, Assistant Professor, Chemistry Department, University of Kansas
- 2. Constance Haack, 1999-2001 (Ph.D. 2000, University of Oklahoma, Assistant Professor, Department of Curriculum and Instruction, Wichita State University)

- 3. Adam Wolfer, 1999-2000 (Ph.D. 2000, Oregon State University, Professor, Puget Sound Community College)
- 4. Susan Mason, 1999-2003 (Ph.D. 2000, University of Kansas, China Lake Naval Weapons Center)
- 5. Mark Mason, 2000-2003 (PhD. 2000, University of Kansas, China Lake Naval Weapons Center)
- 6. Jeff Botts, 2001 (Ph.D. 2001, University of Kansas, Analytical Chemist, Aventis Corporation)

Ph.D. Graduates, year of matriculation, (degree date, employment)

- Timothy J. Boyle, 1985. (Postdoctoral Study with Bill Evans, University of California, Irvine. January 1993, Staff Scientist, Materials Research Group, Sandia National Laboratory, Albuquerque, NM.)
- Mark A. Morgenstern, 1986. (September 1990, Postdoctoral study at the National Center for Solar Energy Research, Golden, Colorado, Lecturer, Colorado College, Colorado Springs, CO)
- 3. M. Elizabeth Thomas-Miller, 1986. (January 1993, Marketing Specialist, Monsanto Company, St. Louis, Missouri)
- 4. Steven D. Dietz, 1987. (January 1992, Postdoctoral study with Professor Mary Rakowsky DuBois, University of Colorado; Staff Scientist TDA Corporation, Golden, CO).
- 5. Michael L. Milligan, 1987. (April 1992, Postdoctoral study with Professor Daryle Eyman, University of Iowa; Faculty at Southern Baptist College, Walnut Ridge, Arkansas.)
- 6. Martha D. Morton, 1988. (May 1993, Postdoctoral study with Dr. David VanderVelde, Kansas University)
- Nancy W. Eilerts, 1990. (July 1994, NSERC Postdoctoral Study with Professor Malcolm H. Chisholm, Indiana University; Research Scientist, Poly(ethylene) Group, Central Research, Phillips Petroleum Company, Bartlesville, OK.)
- 8. Timothy Baroni, 1992 (May 1997, Postdoctoral Study with Professor Andy Borovik, KU)
- 9. Andrew Vance, 1992 (July 1997, Postdoctoral Study at Lawrence Livermore)
- Mark Mason, 1995 "The Design, Synthesis and Pilot Scale Production of Soybean Oil Based Alkyl Nitrates for Use As Diesel Fuel Cetane Improvers" (March 2000, Teaching Postdoctoral Fellow, Chemistry Department, University of Kansas)
- Jeffery B. Botts, 1996 (April 2001, "Synthesis and characterization of multifunctional diesel fuel additives derived from biorenewable sources," Postdoctoral Fellow, Chemistry Department, University of Kansas)
- 12. Joseph Vilain, 2000 (July 2005, Postdoctoral Fellow, China Lake Naval Weapons Station)
- 13. April French, 2002 (May 2007, "Informal Science Education at Science City", Assistant Professor, Northwestern State University, Louisiana)
- Christina Munson, 2005 (April 2010, "Assessment of the Efficacy of an Introductory Pharmacy Class," Curriculum Design Officer, College of Pharmacy, University of Kentucky, Lexington, KY)
- 15. Danielle Barker, 2003 (November 2011, "Constructivist-Based Asynchronous Tutorial to Improve Transfer between Math and Chemistry Domains: Design, Implementation, and Analysis of the Impact of ReMATCH on General Chemistry Course Performance and Confidence", Research Assistant, UKanTeach Program, University of Kansas,

Lawrence, KS)

- Deblina Pakhira, 2009 (April 2012, "Analysis of the Effect of Concurrent Enrollment in Organic Chemistry Lecture and Laboratory Instruction on Student Learning and Motivation towards Learning Chemistry ", Postdoctoral Associate, University of Nebraska-Lincoln, Lincoln, NE)
- 17. Linda Myers, 2010 (July 2015, "Analysis of Student Performance in Peer Led Undergraduate Supplements (PLUS)".)
- 18. Janet Bius, 2008 (April 2016, "Increasing the understanding of Chemical Concepts: Effectiveness of Multiple Exposures.")

M.S. Graduates (degree date, employment)

- 1. Denise L. Barnes, 1990 (August 1993, Lecturer at Midplains Community College)
- 2. Rolande R. Hodel, 1991 (October 1994, Scientist, Nanocrystals, Inc, New York)
- 3. Vladimir Kolesnichenko, 1993 (December 1995, Postdoctoral Associate, Professor L. Messerle, University of Iowa.)
- 4. Galena Goloverda, 1993 (September 1996, M.S. Inorganic Chemistry, "Search for New Catalytic Systems for Asymmetric Diels Alder Reactions.")

Current Graduate Assistants (year of matriculation)

1. Mary Erickson, 2012

<u>Undergraduate Assistants</u> (graduate/professional school)

- 1. Devin K. Scheruebel (Iowa State University)
- 2. Mohammad K. Shaker (NSF-GRU from Idaho State University, Baylor Medical School)
- 3. Brent Flatt (NSF-GRU from Texas A&M, Caltech)
- 4. Rebecca Newburn (Peace Corps, Fiji)
- 5. Steven Gray (University of Arizona)
- 6. Edward Toplikar (Utah State University)
- 7. Robert Henning (NSF-URP student from Augustana College, Iowa State University)
- 8. Antonio Williams (NSF-URP student from Grambling State University, U. of Kansas)
- 9. Jodi Westmark (PRF/Summer Research Fellow from Clarke College)
- 10. Tiffany Grant (Texas A & M)
- 11. David Ellis (Ohio State University)
- 12. Wayne Huang (NSF-URP student from Bethel College)
- 13. Michelle Kennedy (NSF-URP from Hastings College; U. of Kansas)
- 14. Vladimir Azov (HCC Summer Student from the Higher College of Chemistry, Moscow, Russia)
- 15. Sinead Martin (Exchange Student from University of Leistichire, England).
- 16. Brian Stebbins (English teacher, Costa Rica)
- 17. Richard Kingsborough (U. of Arizona, Graduate School, the University of Pennsylvania)
- 18. Kristine Millschlagel (Northern State University, Aberdeen, SD) (Summer 1996)

- 19. Tristan Lambert (NSF-URP from University of Wisconsin-White Water)
- 20. Andrew Gundersen (NSF-REU from Central Missouri State)
- 21. Alix Botts (University of Kansas, Graduate Study at KU, Teaching Certification Program, WSU)
- 22. Andy Case (University of Kansas)
- 23. Peter Johannsen (Luther College, Graduate Study at KU)
- 24. Steven Sieck (Northeastern Missouri State University)
- 25. Jason Renfrow (University of Kansas)
- 26. Allison Logsdon (University of Kansas)
