**Scholarly Interest and Specialization**

Scholarship focuses on Integrated Care/Behavioral Health Integration (BHI). Efforts support the comprehensive coordination of mental health and substance abuse services with primary care and other medical services. Scholarly products aim to prepare clinicians to practice holistic and seamless care that addresses both physical and mental health needs within a single healthcare setting. This initiative seeks to foster a new generation of professionals equipped to address the complex healthcare needs of individuals by providing financial assistance, mentorship opportunities, and specialized training in collaborative care models. The goal of my scholarship is to enhance the quality and accessibility of behavioral healthcare services within integrated healthcare settings, ultimately improving patient outcomes and addressing the growing demand for substance abuse and behavioral health services in rural communities.
