UNIVERSITY OF WYOMING
STUDENT CHAPTER

"The Industry forum for
Drilling practices and technology"

Presents:

Advocating, Educating, and Defending for Oil & Gas

Thursday, September 23, 2021

3:30 PM MT

Zoom ID: 958 8426 1574

Passcode: 759742

We are living in an unfriendly political, social and media climate toward the oil industry. How do we educate, advocate and defend our industry and energy in this climate? How do we campaign against anti oil and gas ballot measures? Join us for a discussion of stats and strategies to address false assertions toward the oil industry.

Presented live in the
Engineering Education & Research Building
EERB 301 – Board Room

Rebecca is a 2013 graduate of the University of Wyoming, earning Bachelor of Science degrees in Petroleum Engineering, Finance & Economics. She has since earned her Professional Engineer (PE) credentials. Rebecca has spent her career working for multiple family-owned and private equity-backed oil companies. Working for privately held companies has given Rebecca the unique experience of heading all operations from production, drilling, completions, and EOR floods. For the last two years, she has worked extensively on regulatory projects throughout Wyoming and Colorado.

She currently resides in northeastern Wyoming, on her family's 6th generation cattle ranch, helping to run their professional rodeo stock contracting business. Rebecca is currently a member of the UW Petroleum Engineering Industry Advisory Board, served two terms on the Wyoming DFS Advisory Board, is a Wyoming LEAD Class '16 Graduate, and competed at Miss America as Miss Wyoming 2013. A proud Wyomingite, Rebecca is grateful and proud to have the opportunity to work at home in Wyoming's oil fields.

Rebecca Podio, Petroleum Engineer
