

Symbolic Logic

The triangle above is impossible. But what about living for another 100 million years? That's easy. Logic will teach you how. Want a preview?

Suppose you are **not** a serious, dedicated student. **Then**, if you **are** a serious, dedicated student, you'll live for another 100 million years.

I am not kidding. The conclusion really follows from the supposition. How, you ask? Well, to find out, take this course, which will teach you this and other tricks. As an extra bonus, you'll also acquire some of the foundational technical expertise that comes in very handy in fields as different as computer science and the law (esp. the LSAT).

Instructor: Franz-Peter Griesmaier

Location: Classroom Building 103

Times: MWF 10:00 – 10:50

Spring Semester 2022

(01/18 – 05/06)
