Ever wonder what it all means?

You're not alone! Throughout human history, communities have tried to understand the world and humans' place in it.

In this class, we will travel across the globe for an exploration of some of the world's major religious traditions, including Hinduism, Buddhism, Judaism, Islam, Confucianism, Shinto, Daoism, and Christianity. We take a historical, academic approach in aiming to learn about these religions, rather than aiming at religious practice or conversion. We will learn how people in these communities think about reality, the origins of human problems, and how to overcome these problems to live a good life. You will learn new ways of looking at the world, challenge your own assumptions, and hopefully be excited to learn more in the future.
