

## Aims and Objectives

The College of Arts and Sciences (A&S) is committed to providing a balanced education that matches cultural breadth with disciplinary depth. Students in the College of Arts and Sciences learn to address complex contemporary problems and to place them in their wider social, historical and ethical contexts. To achieve these goals, degree programs require students to develop expertise in a particular field, gain critical understanding of major areas of human knowledge and select from required courses and free electives to prepare for the challenges of the new century.

A successful student in any of the departments and programs in the College of Arts and Sciences will have an excellent foundation for professional success, graduate study, and a passion for lifelong learning.

Through hands-on research and creative projects (either on faculty projects or independently with faculty guidance and mentoring), fieldwork, internships, and study abroad, students integrate and bring coherence to their classroom learning.

## Student Responsibilities

To graduate from the College of Arts and Sciences, students must satisfy all university, college, and major requirements for a given degree. These requirements apply whether the work is taken within the college or transferred from anywhere else within or outside the university (please refer to section below "Acceptance of Transfer Credit").

The college holds students responsible for knowing degree and major requirements and for completing the necessary courses. Students are also expected to know the regulations that govern the academic standards needed to continue study at the university. Students should be aware that changing majors and/or colleges may result in delays in meeting degree requirements and that requirements themselves sometimes change (see "Graduation: Requirements and Procedures" section of this *Catalog*).

## Academic Advising

To help plan a program of study, students are assigned an academic adviser by the department/program of their major. Students undecided about a major are advised in the UW Center for Advising and Career Services (222 Knight Hall).

Students should consult regularly with their academic adviser not only for course scheduling, but also to discuss educational and career goals. Faculty and professional advisers can connect students to the many college and university resources to assist undergraduate study. Instructors are also willing to discuss concerns students may have regarding specific courses.

## Changing/Declaring a Major or Minor

When ready to declare or change a major, minor, or dual/concurrent major in a department or program in the college, the appropriate form is available from the Office of the Registrar (167 Knight Hall) or the Registrar's Web page. Approval is required from the appropriate department heads/program directors. Departments/programs will assign advisors at the time of signing their approval on the form.

**Minors in Arts and Sciences**

The College of Arts and Sciences offers all university students systematic studies leading to recognized academic minors. Minors are available in all academic programs in the college and in a number of interdisciplinary areas.

A&S minors have two aims: to encourage students to create a focus for their course work outside their major by coordinating their elective studies; and to enhance chances of employment or graduate admission with a formally recognized field of study.

Minors consist of course requirements ranging from 18-24 credit hours of study, typically including significant work at the junior and senior level. A&S departments and programs offering minors and interdisciplinary degrees may have further conditions and restrictions regarding requirements in the minor. To be counted toward a minor, courses must be completed with a grade of C or better.

Students desiring a minor must notify the department in which the minor is offered. Forms for declaring a minor are available in the Office of the Registrar (167 Knight Hall) or on the Registrar's Web page. The department of the minor will assign an adviser.

For a description of the minors in A&S, see department offices or Web sites.

## College Degree Requirements- The 2015 A&S Core Bachelor of Arts or Science Programs

Beginning fall 2015, new university and college general education curricula, the 2015 University Studies Program (USP) and the 2015 A&S Core, were implemented. Refer to the USP section of this *Catalog* for details regarding University Studies requirements. Students who matriculate for the first time at UW or a Wyoming community college in fall 2015 or after are required to follow both the new USP and A&S Core. Students transferring from a Wyoming community college with an associate's degree and the Wyoming Core completed between May 2013 and fall 2015, may continue to complete the 2003 USP and 2003 A&S Core requirements (if there has been no interruption in their enrollment for a year or more). Students who matriculated at UW or a Wyoming community college prior to fall 2015 and choose the 2015 USP must also complete the 2015 A&S Core requirements. For additional information please refer to the sections in this *Catalog* that describe the university graduation requirements, the 2015 University Studies Program, and the policies for reenrolling at UW after an absence of a year or more.

### I. College credit hour requirements

#### A. Minimum total semester hours 120

**B. Upper-division credit requirements (42).** Thirty of the 42 hours must be earned from UW. Courses must be taken for a letter grade unless offered for S/U only. This is an all-university requirement for all degree programs and may come from the courses that fulfill the USP, the A&S Core, the major, the minor, and electives.

**C. Major field of study (30-60).** Credit hours in excess of 60 in the major subject may not be used to satisfy the requirement of 120 hours for graduation. At least 30 hours of C grade or better must be earned in the major subject (the major may require more). Courses in the major must be taken for a letter grade unless offered for S/U only.

**D. A&S Core requirements (6).** Courses must be taken for a letter grade unless offered for S/U only.

All other university and college regulations apply. See "Graduation: Requirements and Procedures" section of this *Catalog* for more information. Graduate level "Enrichment" courses do not count toward the requirements for a bachelor's degree.

### II. 2015 A&S Core Curriculum

Graduates of the College of Arts and Sciences are expected to be liberally educated, to have the knowledge and skills to deal with the unexpected, and to see opportunities from multiple perspectives. To develop these abilities, the college faculty implemented the A&S Core.

The approved courses for the following requirements are searchable within WyoRecords under the Browse Classes feature.

- 1. U.S. Diversity (ASD).** This requirement allows students to explore the complexity of cultural identities in the U.S. and interdependence of the cultures. Students will gain an understanding of the influences of categories such as race, class, ethnicity, gender, disability, sexual orientation, religion, and age on American behaviors, institutions, values, and beliefs.
- 2. Global Awareness (ASG).** Because citizens ever more frequently encounter behaviors and practices based on beliefs, conditions, and assumptions different from their own, they need to understand the nature and function of culture. Our students should have an awareness of the multiple links that affect the living conditions and range of action of peoples of the world, including international systems of commerce, art, science, technology, politics, communication, belief, and justice, among other.

### College Degree Requirements Prior to Fall 2015 for Continuing and Reenrolling Students

A&S Core requirements for a student continuing a degree program in effect at the time of matriculation at UW are found in the relevant previous *Catalog*. Contact the Dean's office with any questions.

Students who re-enter the university after an absence of a year or more should refer to other sections of this *Catalog* for university policies and procedures. Unless approved otherwise, reenrolling students, after a year's absence, are required to follow the University

Studies and A&S Core requirements in effect the semester of their re-enrollment. However, all majors in A&S who have yet to complete the A&S Core, regardless of their initial enrollment, must refer to the current list of approved courses.

Checksheets and lists of courses that satisfy A&S college core requirements are available on the Web at [www.uwyo.edu/as](http://www.uwyo.edu/as) or in the Dean's office.

Departments and programs in the College of Arts and Sciences may require reenrolling students to complete requirements in the major that meet the current expectations of the discipline.

### Transfer Students and Acceptance of Transfer Credit

The College of Arts and Sciences and its departments reserve the right to grant transfer credit toward the bachelor's degree only for those courses where a grade of C or better was earned. Students transferring credits from a university or college outside Wyoming with questions about how courses taken elsewhere fulfill the A&S Core may contact the Center for Advising and Career Services (222 Knight Hall, 766-2398).

### Courses Taken for S/U Credit

Students may include up to 20 semester credit hours in free electives with a grade of S as part of the total hours required by the College of Arts and Sciences for graduation. However, no S/U hours may be used to satisfy university and college core general education requirements or major requirements, including the required 42 upper-division credit hours unless the course is offered for S/U grading only.

Students registering in courses for S/U grades are subject to all general regulations.

### Concurrent Majors

Students may pursue two or more majors simultaneously. With careful planning, A&S students may be able to use all or most of the free elective hours for requirements in the other majors. Refer also to the section, "Graduation: Requirements and Procedures" in this *Catalog*.

The A&S Core must be met only once by students whose primary major is in the College of Arts and Sciences. Students whose degree programs are in other UW colleges are welcome to earn a concurrent major in A&S. These students do not have to meet the A&S Core requirements. The student earns one degree with one diploma.

Students pursuing a concurrent major must contact both departments involved for assignments to advisers.

## Dual Degrees

Students may simultaneously pursue degrees in the same or more than one UW college. In addition to requirements described in the section “Graduation: Requirements and Procedures” in this *Catalog*, students in another UW college who wish to earn a degree from A&S must also complete the A&S Core. A&S students working on dual degrees in the A&S College need to meet the A&S Core just once. A diploma is awarded for each degree.

Each additional degree requires 30 more credit hours added to the 120 credits to the primary degree. Of these 30 credits, 12 have to be at the 3XXX-4XXX levels.

## Second Bachelor’s Degrees

For students seeking a second bachelor’s degree in the College of Arts and Sciences whose **first degree is from another university**, the minimum requirements include:

- 30 semester hours earned from the University of Wyoming, 12 of which must be upper division (3XXX-4XXX level) or graduate level (credit by examination does not count as UW hours).
- Completion of the U.S. and Wyoming Constitutions requirement (V courses in the University Studies Program course list in this *Catalog*).
- If the first degree is from an institution where English is not the predominant language, the COM1 and COM2 requirements of the University Studies Program must be completed successfully.
- Students must also meet the 2015 A&S Core requirements.

For students whose **first degree is from UW**:

- The additional required 30 hours (12 of these at the 3XXX-4XXX) are added to the degree requiring the least number of hours. For example, for a first degree A&S requires 120 hours. So the total credits a UW student would have to complete for the second bachelor’s degree is a minimum of 150 credits. Since the University requires a total of 42 upper division hours for a degree, for the second degree from A&S, a UW student would need to earn a total of

60 hours at the 3XXX-4XXX level.

For more information, please see the Second Bachelor’s Degree entry in the section, “Graduation: Requirements and Procedures” in this *Catalog*.

- Students whose **first degree is from another UW college** must meet the 2015 A&S Core requirements.
- In situations in which a student is subsequently required to take coursework from another collegiate institution to fulfill major and overall hour requirements for a second degree from the university, the student’s department can ask the Office of the Registrar to load selected courses into the student’s record.

## Distributed Majors Degree Program

The specific requirements for a major in social science are outlined below. Required courses in this major are selected from several A&S departments and in some cases, outside the college. The basic college requirements are those as described above for the Bachelor of Arts or Science degrees. Appropriate courses from outside A&S may be substituted after consultation with the adviser.

### 1. Humanities and Fine Arts (B.A. only)

To fulfill the 42 credit hours required in the major, the student selects three areas of emphases from the participating departments/programs with a minimum distribution of 18 hours in the first area of emphasis and 12 hours in each of the two other areas. Participating departments/programs include American Studies, African and American Diaspora Studies, American Indian studies, anthropology, art, Latina/o studies, communication and journalism, English, history, modern and classical languages, music, philosophy, political science, religious studies, theatre and dance, and women’s studies. See the A&S dean’s office or the Web at [www.uwyo.edu/as/majors-and-minors/index.html](http://www.uwyo.edu/as/majors-and-minors/index.html) for approved courses and detailed checksheet.

In addition to the 42 hours in this major, students are required to take 12 hours of a single foreign language, or the equivalent (American Sign Language is acceptable) with a grade of at least a C. Only classics 2010 and 2020 and other language courses numbered above 2030 may be counted toward the 42 hours in the major.

The 42 credits must include:

- At least 24 credit hours of upper division courses are required in the major with a distribution of at least 12 credits in one area of emphasis and 6 credits in a second area.
- A grade of C or better must be earned in all 42 credit hours in the major and all courses must be taken for a letter grade unless offered for S/U only.

A maximum of 4 credit hours of music lessons and dance technique courses may apply.

Music performance group credits do not apply.

Students may not minor in the department/program that is selected as the first area of emphasis.

All other university and college degree requirements apply.

Students pursuing this major are advised by Michell Anderson, [maders2@uwyo.edu](mailto:maders2@uwyo.edu).

### 2. Social Science (B.A. or B.S.)

To fulfill the 48 credit hours required in the major, the student selects four core areas of emphasis from the participating departments/programs, with a minimum distribution of 15 credit hours in the first area of emphasis and 6 hours in each of the other three areas. Participating department/programs include African and American Diaspora studies, American Indian studies, American studies, anthropology, Latina/o studies, communication and journalism, criminal justice, economics, geography, global and area studies, history, philosophy, political science, psychology, religious studies, sociology, and women’s studies. The first area of emphasis cannot be in economics or philosophy. See the A&S dean’s office or the Web at [www.uwyo.edu/as/majors-and-minors/index.html](http://www.uwyo.edu/as/majors-and-minors/index.html) for approved courses and detailed checksheet.

The 48 credits must include:

- STAT 2050 or 2070. These also fulfill the Q requirement for the University Studies Program (USP).
- A USP-approved COM3 course that is also an approved College of Arts and Sciences social science discipline course.
- A minimum of 24 credit hours of upper-division courses in the major. At least one course, 3 credits, in the first area of emphasis must be at the 4XXX level.

- A grade of C or better must be earned in all 48 credit hours in the major and all courses taken for a letter grade unless offered for S/U only.

It is also recommended that students complete an upper-division social science research methods and a social science theory course. See the list of Approved courses.

Courses taken for the U.S./Wyoming Constitutions requirement do not count in the 48 credit hours in this major.

Students may not minor in the department/program that is selected as the first area of emphasis.

All other university and college degree requirements apply.

Students pursuing this major may go to the Center for Advising and Career Services in Knight Hall, room 222, for assignment to an adviser.

### 3. Mathematics and Science (B.A. or B.S.)

To fulfill the 48 credit hours required in the major, the student selects four core areas of emphases from the participating departments/programs, with a minimum distribution of 8 credit hours in each of the four areas. Participating departments/programs include anthropology, biology, botany, chemistry, geography, geology and geophysics, mathematics, physics and astronomy, psychology, statistics, and zoology and physiology. See the A&S Dean's office or the web at [www.uwyo.edu/as/majors-and-minors/index.html](http://www.uwyo.edu/as/majors-and-minors/index.html) for approved courses and detailed checklist. One of the four core areas may be outside the College of Arts and Sciences, if in a related science/math area.

The 48 credits must include:

- A minimum of 24 credits of upper-division courses must be earned across at least three of the core areas with at least 3 upper-division credits in each core area.
- A grade of C or better must be earned in all 48 credit hours in the major and all courses taken for a letter grade unless offered for S/U only.

All other university and college requirements apply.

Students pursuing this major are advised by Michell Anderson, [maders2@uwyo.edu](mailto:maders2@uwyo.edu).

### Concurrent Major in Environment and Natural Resources

A student majoring in any A&S department/program may earn a double major by completing the courses required for the Environment and Natural Resource (ENR) program in addition to the requirements in their A&S major and the College A&S Core. The School of ENR Web site, <http://www.uwyo.edu/enr> has detailed information, or contact the School at (307) 766-5080.

### Preprofessional Studies

The College of Arts and Sciences prepares students to enter professional schools through preprofessional programs of study described below.

**Prelaw Study.** Students usually need a bachelor's degree prior to beginning the study of law. There is no prescribed course of undergraduate study and no restrictions as to the field in which the degree is earned. However, to prepare for this competitive profession, prelaw students are advised to select courses that help to develop those talents and skills essential to the study and practice of law. Logical and critical thinking, conflict evaluation/resolution and effective verbal/nonverbal communication skills are essential. Additionally, students should understand the political, economic, social and cultural institutions and values that characterize human society. Rigorous courses in any discipline increase abilities in these areas. Regardless of the prelaw major, courses in the broad liberal arts--the sciences, social sciences, fine arts and humanities--increase understanding of the public's diverse interests and backgrounds.

Prelaw students do not have to declare a major at the time of first enrollment if they wish to explore options. Students who are undeclared in the College of Arts & Sciences are assigned advisers in the UW Center for Advising and Career Services until they decide upon a degree program. Please note that a prelaw minor is available.

In addition to an adviser in the major, prelaw students may contact the designated UW prelaw adviser for assistance in developing a program of study, for career counseling and for guidance in applying to law schools. Contact Michell Anderson, A&S 152, 766-2641, [maders2@uwyo.edu](mailto:maders2@uwyo.edu) for information. A bulletin board for prelaw students is located in the south hallway, 1st floor of the A&S Building. Students are encouraged to use these resources.

Additional information and useful resources may be found on the pre-law Web site, [www.uwyo.edu/as/current-students/pre-law.html](http://www.uwyo.edu/as/current-students/pre-law.html). Detailed information about applying to law schools, the Law School Admissions Test (LSAT) and preparation materials, and links to other web sites are at [www.LSAC.org](http://www.LSAC.org).

**Library Preprofessional Study.** Librarians are information professionals who research, organize, and classify materials so the public can access information. Not only do they work with printed materials, but all the technological advances in digital media such as electronic databases and eBooks. Some librarians focus on teaching the public, scholars, and students how to access and use these materials, while others concentrate on collecting and maintaining these diverse resources. Librarianship offers many career opportunities to people of different academic backgrounds, interests, and talents. Most public, academic, and special libraries require a Master's degree in library science (MLS).

The degree programs and minors in the College of Arts and Sciences offer the variety of academic preparation expected by accredited library schools in the country. Most of the graduate schools in library science require a bachelor's degree, a good undergraduate record, and a reading knowledge of a foreign language for admission. The best undergraduate preparation includes a wide range of courses in the sciences, social sciences, and humanities along with a strong concentration in one subject area. The choice of a major will be determined by the student's academic interest and professional objective. The general education that the University Studies and the A&S Core require provide the well-rounded background graduate schools expect of their MLS candidates.

Additional information about library schools, their requirements, and programs as well as career opportunities may be obtained from the reference desk at Coe Library and the Center for Advising and Career Services. The U.S. Bureau of Labor Statistics "Occupational Outlook Handbook" at [www.bls.gov/ooh/](http://www.bls.gov/ooh/) has detailed descriptions of the varied work of librarians, working conditions, employment outlook, and sources for additional information.

**Premedical, Predental and Preoptometry Study.** Students with the most promise and the best undergraduate preparation have the competitive advantage in being admitted to these professional programs. These schools are favorably impressed by a broad educational background, including a substantial number of

both non-science and science courses; therefore, students are well advised to look beyond the minimum requirements.

Students may select any major in which they are interested. In addition to completing all university, college and departmental requirements, students must include in their curriculum the basic professional school requirements such as courses in biology, chemistry, math, and physics. Professional schools have other specific requirements and students should learn about any additional recommendations from those professional schools in which they are interested. For assistance, contact the preprofessional adviser in the College of Health Sciences, 110 & 112 Health Sciences Center, (307) 766-6704 or 766-3499, or preprof.hs@uwyo.edu.

Common majors in the College of A & S for these preprofessional programs include chemistry, biology, botany, psychology, physiology, and zoology. However, there are preprofessional students in programs as diverse as theatre and dance and anthropology. Students need not declare a major immediately upon first enrollment. Advisers in individual departments can discuss options or if students wish to remain undeclared, they are advised in the UW Center for Advising and Career Services.

Preprofessional assistance is available in the Departments of Chemistry, Physics, Psychology, and Zoology/physiology. The preprofessional advisers in the College of Health Sciences have current information regarding professional school admission requirements, entrance examinations, programs in Western Interstate Commission on Higher Education (WICHE), Wyoming Medical Contract Program WWAMI (affiliated with the University of Washington School of Medicine) and financial assistance for professional education. The honor society for students enrolled in preprofessional studies, Alpha Epsilon Delta, is also administered in the College of Health Sciences. The Web site, <http://www.uwyo.edu/preprof/> includes additional information.

## Internships

Many departments in the College of Arts and Sciences offer internships for academic credit, and some provide monetary compensation. Academic internships provide practical, hands-on experience in a professional job setting as a complement to classroom instruction. An internship can provide students with both insight and preparation for future jobs. All internships require a strong background in writing, organizational ability and analytic skills. Junior or senior standing is recommended.

## Special Courses (AS)

**USP Codes are listed in brackets by the 2003 USP code followed by the 2015 USP code (e.g. [QB◀▶Q]).**

The American Indian Studies Program offers an academic major at the undergraduate level and a minor at both the undergraduate and graduate level. This interdepartmental course of study examines Native North American cultural and social life, including economic, political, and educational systems. Historical and contemporary perspectives of American Indian experiences are included in this program.

Students may choose an American Indian studies minor to complement a major field of study. Related disciplines include American studies, anthropology, art, ethnic studies, geography, history, law, music, philosophy, political science, and sociology. A minor in American Indian studies provides excellent preparation for teachers, researchers, social workers, health care providers, resource managers, economic developers, and legal practitioners.

### AIST Undergraduate Minor

Students graduating with an undergraduate minor degree in American Indian studies will be able to: 1) Explain the concept of tribal sovereignty and how tribal sovereignty is both restricted and acknowledged by the federal trust relationship and by relationships with states; 2) Understand the development of modern tribal governments and their functions and importance in contemporary society; 3) Understand and appreciate the roles of his-

tory, culture, and politics in the development of tribal world views, world views that relate to modern life and contemporary issues of concern for Native American peoples; 4) Identify historical, cultural, and political diversity and significance in Native oral traditions and written literatures; 5) Recognize stereotypes about Native American peoples and explain why these stereotypes were created and why they are sustained in modern society, and; 6) Understand from the perspective of American Indian peoples, historical experiences and contemporary issues in North America.

### AIST Undergraduate Major

In addition to the skills acquired by students who earn an undergraduate minor degree in American Indian studies, students working toward a B.A. in American Indian Studies will study tribal governance, literature, history, environment and natural resource management, ways of knowing, and indigenous languages. Inherent in this degree's curriculum and related activities is the expectation that students and faculty will assume an active role in working with and for Indigenous communities. AIST requires it majors to earn a grade of C or better in all courses taken to fulfill the major.

### AIST Graduate Minor

A graduate minor in American Indian studies is comprised of 12 hours with at least 6 hours at the 5000 level. It is expected that each graduate minor student and his/her graduate committee, at least one member of whom will be from American Indian studies, will determine the specific courses to be taken. It is recommended that one of the four classes selected be a 3 credit AIST 5000 Independent Study. This class will provide a research experience in the discipline of American Indian studies that may support a master's thesis or doctoral dissertation. The research expectation in AIST can be satisfied by the 3 credit hour Independent Study and/or by the thesis or doctoral dissertation.

Students graduating with a graduate minor degree in American Indian studies will be able to: 1) Make apparent in masters'-level research the interdisciplinary connections between American Indian studies and the primary field of graduate study; 2) Integrate American Indian studies research methods with the research methods used in the primary field of graduate study; and 3) Demonstrate in writing the ability to understand a variety of subjects from a tribal perspective.

## Teaching Certification

Through the Outreach School, a Teachers of American Indian Children (TAIC) Endorsement / Graduate Certificate can be earned. This non-degree graduate program certifies that those who complete its five specialized courses possess the attitudes, knowledge, and competence necessary to effectively teach American Indian Children. Upon completion, students receive official recognition of their achievement on their transcripts and an official certificate. Visit the Outreach Credit Program Website <http://outreach.uwyo.edu/ocp/> for more information. All courses are cross-listed with AIST.

An interdepartmental American Indian Studies Advisery Committee guides the program's development. The director advises students selecting the American Indian studies major or minor.

Complete information about the American Indian studies undergraduate major, undergraduate minor, and graduate minor is available in the American Indian Studies Program office and on the program Website.

American Studies is an interdisciplinary field emphasizing the integration of the humanities, fine arts, and social sciences in the study of American experiences, past and present. Our program places special emphasis on studying American cultures through course work, field experiences, and internships so that each student can apply academic knowledge to real-life circumstances. Our program highlights international perspectives, as well as the transnational context of American impacts and experiences, in coursework and in exchanges available to American Studies students. American Studies also highlights opportunities in the public sector, including historic preservation of buildings, neighborhoods, or landscapes. American Studies puts people, ideas, places, artifacts, images, and histories together in programs of study preparing students for specific career goals in K-12 education or work in the public section (e.g. museums, collections, historic sites, interpretive centers), or for further education in professional schools and graduate study.

## Undergraduate Major

Through its core of American Studies courses, the program frames and develops each student's individual research interests, and in consultation with an American Studies advisor, allows students to include courses from virtually any program and department at UW that sustain a student's engagement with their particular focus. Most coursework outside American Studies draws on programs and departments in the College of Arts and Sciences. Individual programs of study are as varied as our students. Examples of possible concentrations (drawing on courses outside American Studies) include ethnic studies, sustainability, museum studies, philosophy of science, public health and social justice, environment and society, and the U.S. in international perspectives. Each student develops a concentration of study in consultation with their American Studies advisor with ample room to combine courses and interests into a coherent undergraduate education.

Because American Studies is both an international field with scholars all over the world, and the U.S. has transnational significance, **we strongly encourage students to take 2 years of language study** to achieve meaningful access to skills as readers, scholars, and travelers, and consider participating in an international exchange. Some languages currently in demand by American Studies students include Spanish, Arabic, and Japanese.

Through the following curriculum, students develop individual programs of study, with their advisers, to understand and engage American cultures.

### 1. Foundation (12 credits):

- AMST 2010 and AMST 2110
- Two courses at the 1000- or 2000-level in interdisciplinary fields, optionally including one in American History, from programs and departments such as African and American Diaspora Studies, American Indian Studies, Environment and Natural Resources, Global and Area Studies, Gender and Women's Studies, Latina/o Studies, Religious Studies, or appropriate courses transferred from other institutions, to be named in the program of study in consultation with an American Studies advisor.

### 2. Concentration (27 credits)

**Core.** Each student must take three AMST courses at the 3000-4000 level, excluding the senior seminar. These seminars are designed

to maintain an interdisciplinary view of American culture and to foster an American Studies community (9 credits).

**Theme.** An American Studies theme is devised, in consultation with the student's adviser, and is presented to the American Studies core faculty in writing as a proposed course of study. This proposal is usually made at the end of the second year of study (or upon completion of 60 hours of course work toward graduation), since the document guides the student through an exploration of American culture. Typical themes include: American diversity, environment and society, material culture and everyday life, visual culture and media, American cultural history, American institutions and public culture, the United States in international perspective. The theme must include a minimum of 6 credits and a maximum of 9 credits in a single discipline. Up to 3 credits can be granted for courses at the 1000-2000 level (18 credits).

### 3. Capstone (6 credits):

Senior seminar plus an individual project stemming from either AMST 4010 (independent study) or AMST 4970 (internship).

Students pursuing Program honors should also write an undergraduate thesis.

## Internships

The internship experience is essential for students specializing in public sector American studies. The program has an active program of paid internships that can place students in work environments in Wyoming, other parts of the U.S., or in selected foreign countries.

## Exchanges

The program has established semester or academic year exchanges with universities in Great Britain, the Netherlands, Denmark and New Zealand in order to encourage an international understanding of American culture. The Elaine Kay Clatterback Fund supports majors who are spending this valuable time abroad.

## Financial Aid

The William Robertson Coe Fellowship supports undergraduate tuition. The Long-Findeisen Fund supports individual research or exhibition projects. The Elaine K. Clatterback Fellowship assists students engaged in an international exchange. The internship program provides students with a stipend while engaged in a program-approved internship.

## Teacher Education

Teacher certification in elementary or secondary (social studies) is available by arrangement with the College of Education. Students will be assigned an adviser from the College of Education, as well as from American Studies.

## Certificate

The certificate program allows students to choose from undergraduate and graduate courses in American Studies, literature, geography, music, art, history, philosophy, sociology, folklore, anthropology, American Indian studies, political science, environmental studies, and media studies. The program encompasses two semesters of full time work: a total of at least 24 semester hours, or approximately 8 courses. Of these, 6 hours (2 courses) must be selected from the following list:

AMST 2010 or 2110 .....	3
<b>and</b>	
AMST 4300, 5550 or 4020.....	3

An additional 18 hours (6 courses) are chosen in consultation with an American Studies faculty adviser. The final 3 credit hours, completed during the summer months, are devoted to an internship (AMST 4385) or field experience in American culture (AMST 4990).

## Undergraduate Minor

Students may minor in American Studies through a program of 24 credits of study, some which may be matched with major requirements in related disciplines and fields. For details, see the list of eligible courses at [www.uwyo.edu/ams](http://www.uwyo.edu/ams).

## Graduate Study

The program offers an interdisciplinary course of study leading to the Master of Arts degree. The program also supports a historic preservation concentration that involves studio courses and field experience. Other specific paths through the American Studies curriculum are tailored to the needs of the students. Semester exchange programs reinforce an international perspective on American culture.

## Program Specific Admission Requirements

A significant writing sample (usually a seminar paper or, for those coming from technical fields, a major report) that demonstrates potential for graduate study.

## Program Specific Degree Requirements

Degree requirements based on university minimum requirements. Successful completion of the following: AMST 5500/5510 with a grade of “B” or better, three additional American Studies courses and a Thesis or Plan B (non-Thesis) project.

The department of Anthropology promotes the understanding of humankind from an integrated, holistic approach which examines past, present and future trends in cultural, biological and linguistic diversity and uniformity. Though the department serves undergraduate and graduate majors who will become professional anthropologists or will pursue other related careers, it also provides information to a large number of non-majors and to the larger community regarding cross-cultural issues. Furthermore, because of its commitment to the four field approach including biological anthropology, archaeology, cultural anthropology and linguistic anthropology, the department fosters among its students an awareness of the interrelatedness of

scientific concepts, methods and theories, and the humanistic foundation of scientific inquiry. The Department of Anthropology prepares its students both to understand the cultural resources of Wyoming and to participate as informed citizens in an increasingly complex global community.

### **Undergraduate Major**

The Anthropology B.A. program has the following learning outcomes:

1. students demonstrate knowledge about the four fields of anthropology and their interrelationship,
2. students participate in a research experience and understand its process, and
3. students demonstrate ability to analyze and synthesize in relation to anthropological issues or theories.

In addition to university and college requirements listed in this *Catalog*, anthropology majors must complete three semesters of foreign language and a statistics course—STAT 2050 or 2070. Anthropology majors must complete two lab science courses outside the major. Specific requirements for a B.A. in anthropology are ANTH 1100, 1200, 1300, 2000, 3300, 3310, 4010; one course from each of the following series: archaeology, ANTH 4110, 4111, 4115, 4116, 4120, 4125, 4130, 4150, 4160, 4170, or six credits of archaeological field school (ANTH 4140 or 5180); cultural anthropology—ANTH 4300, 4310, 4320, 4325, 4330, 4340, 4350, 4360, 4380, 4020 (with instructor’s consent); linguistic anthropology—ANTH 4740, 4775, 4785, 4795, 4020 (with instructor’s consent); and biological anthropology—ANTH 4210, 4215, 4220, 4230, 4255, 4260, 4020 (with instructor’s consent). It is recommended that anthropology majors take ANTH 1101 to fulfill the First-Year Seminar requirement, but it is not required that students take this particular First-Year course. In some cases (e.g., ANTH 3300, 3310) students will be required to take one hour of a section of ANTH 4975. Courses required by the department for the major and minor must be completed with a grade of C- or better.

At the completion of the Bachelor of Arts degree in Anthropology, students will be able to demonstrate knowledge about the four subfields of anthropology and their interrelationships; they will have participated in a research experience and understand its process; and, they will demonstrate ability to analyze and synthesize in relation to anthropological issues or theories.

### **Undergraduate Minors**

The Anthropology undergraduate minor has the following learning outcomes:

1. students learn sufficient subfield information to complement a variety of disciplines,
2. students learn basic methods of the discipline, and
3. students learn basic theories/types of subfield explanation.

The minor for non-anthropology majors requires two of the introductory courses: ANTH 1100, 1200, 1300, 2000, and 11-12 hours of electives from 2000, 3000, or 4000-level anthropology courses with no more than 3 hours at the 2000-level. See the anthropology web site for more details.

### **Teacher Education**

Anthropology courses may be used to complete part of the requirements for teacher certification in social studies.

### **Graduate Study**

The department offers programs of study leading to Master of Arts and Doctor of Philosophy degrees in Anthropology. Check Anthropology department web pages for any updates.

### **Program Specific Admission Requirements**

#### ***Master’s Program***

The Anthropology M.A. program has the following learning outcomes:

1. students will be able to explain the content of the “four fields” of anthropology and their interrelationship in written and oral formats,
2. students will have experience in original research, and
3. students will develop skills which foster professionalism as related to their chosen field.

Deadline for application is February 15 for the following fall.

See graduate admission requirements.

Submit letter of intent, resume, copies of GRE scores, transcripts, and an optional writing sample as digital documents to the UW online application system. A minimum of three letters of recommendation are required; a standardized recommendation form is provided through the application system.

In the letter of intent, students should describe their research interests, career goals, and how Wyoming’s program will help them achieve these goals.

The Department of Anthropology requires that at least two of the recommendation letters be from academic supervisors or instructors.

Students must present evidence of a satisfactory background in anthropology, which should include coursework in all four subfields of Anthropology (socio/cultural, bio/physical, archaeology, and linguistics). Deficiencies in anthropology may require remediation. Students must have three semesters of a single foreign language or equivalent, and one semester of statistics. In those instances in which the undergraduate background of the student is deficient, the department reserves the right to prescribe course work that would correct such deficiencies.

The M.A. program is designed to be completed in two full years of graduate study. Appropriate allowance will be made for part-time students.

Students who graduate with a Master of Arts degree will be able to explain the content of the four fields of Anthropology and their interrelationship in written and oral formats; they will have an experience in original research; and, they will develop skills which foster professionalism in their chosen fields.

#### ***Doctoral Program***

The Anthropology Ph.D. program has the following learning outcomes:

1. students will have professional and specialized training so they can move into careers in academic or non-academic tracks,
2. students will have a dissertation research experience that results in professional publication(s), thereby contributing to the expansion of knowledge, and
3. students will have practical experience that will promote their movement into professional careers in a reasonable amount of time.

Deadline for application is December 1 for the following fall.

See graduate admission requirements.

Submit letter of intent, resume, copies of GRE scores, transcripts, and an optional writing sample as digital documents to the UW online application system. A minimum of

three letters of recommendation are required; a standardized recommendation form is provided through the application system.

In the letter of intent, students should identify whom they would like as their faculty adviser and describe their research interests, career goals, and how Wyoming's program will help them achieve these goals.

Note: Contact department for GRE requirements and preferences.

Students with a master's degree may apply directly to the Ph.D. program.

Students with a bachelor's degree may apply to the Ph.D. program. If admitted, students are expected to complete the master's degree requirements following the Plan A or Plan B option before formal admission to the Ph.D. program. At the thesis defense or hearing for the Plan B paper, the student will receive a no pass, pass-terminate at the master's degree, or a pass-admit to the Ph.D. program.

Students admitted to the department's M.A. program are not guaranteed admission to the Ph.D. program.

For admission to the Ph.D. program with the Bachelor's degree, students must have course work in the four subfields of anthropology, three semesters of a single foreign language, and statistical competency at either the B.A. or M.A. level. If these are not satisfied, the student's faculty adviser in coordination with the student's graduate committee assigns remedial work as appropriate.

Students who graduate with a Ph.D. in Anthropology will have specialized and professional training so they can move into academic or non-academic tracks; they will have a dissertation experience that results in professional publications; and they will have professional experiences that facilitate their move into careers in a reasonable amount of time.

## Program Specific Graduate Assistantships

Doctoral students generally receive two years of assistantships. First semester, first year M.A. students are generally not awarded assistantships; however, the department occasionally does make exceptions. M.A. students are eligible to apply for assistantships beginning in the second semester.

Assistantships are awarded through a departmental application process. An application form, cover letter, and resume are required.

Information and deadlines may be obtained in the department office.

Failure to complete steps in the M.A. program by established deadline (e.g., advisor selection, proposal presentation, etc.) means the student is not eligible for an assistantship. Failure of the Ph.D. preliminary exam means the student is not eligible for an assistantship.

## Program Specific Degree Requirements

### *Master's Program Plan A (thesis)*

See university minimum requirements.

Completion, with a grade of "B" or better of a four core-course sequence. This sequence will consist of ANTH 5010, 20th Century Anthropological Theory; ANTH 5015, Archaeological Theory and Method; ANTH 5020, Biological Anthropology; and ANTH 5030, Linguistic Anthropology.

First semester (fall): Students will submit form to the graduate advisor and department head identifying their thesis advisor BEFORE the graduate assistant allocation meeting (mid-late November).

Second semester (spring): Students will work with their advisor to select their committee, which must be formed and on-file in the department office by the end of the semester. During the core classes' final exam periods, students give a presentation to departmental faculty which outlines the general ideas for their proposed thesis.

Third semester (fall): Working closely with their advisor and committee, students complete a detailed prospectus and gain approval from thesis committee for MA thesis topic.

Fourth semester (spring): Thesis is completed and is approved by thesis committee.

Any M.A. student receiving a grade of C or less in two core classes will be expelled from the program.

Second semester research presentations are assessed by all department faculty in attendance at the presentation and evaluations will be given to the student's advisors. It is expected that students will work closely with their advisors to rectify any problems before they complete their thesis prospectus in the third semester.

If not completed prior to admission; three semesters of a single foreign language and one statistics course must be completed.

### *Plan B (non-thesis)*

See university minimum requirements.

All requirements for a Plan A except thesis, if not completed prior to admission; three semesters of a single foreign language and one statistics course must be completed.

### *Doctoral Program*

See university minimum requirements.

After completion of an M.A. program in anthropology.

A minimum of six content courses (18 hours) chosen by the student in conjunction with the student's committee. These courses are normally completed in the first two years of the Ph.D. program. In addition to anthropology courses, the other 4000/5000-level courses outside of the department may be required by the committee or chosen by the student in consultation with their committee.

Two additional courses in their first or second year: ANTH 5880, Professionalism in Anthropology and the two-semester sequence of ANTH 5000, Teaching and Learning in Anthropology (3 hours total).

Teaching experience, including stand-alone courses, after completion of the first semester of Teaching and Learning (ANTH 5000), as well as teaching assistance to UW faculty members.

Participation in an approved internship experience (6-24 credit hours). Students pursue internships in state and federal agencies, museums, contract archaeology organizations, and other organizations that offer potential career experience.

Committee meeting and successful completion of a dissertation proposal.

Preliminary exams take place after the completion of 18 hours of content courses. ANTH 5880, and Teaching and Learning in Anthropology (ANTH 5890, or other as designated), normally before the end of the second year. If a student does not receive a passing grade on the preliminary exam, it can be repeated once. Failure to pass the preliminary examination the second time results in termination from the anthropology program.

International experience is highly recommended but not required, e.g. pre-dissertation summer fieldwork.

Student maintains a portfolio which documents teaching, internship, and research experience.

Students are encouraged to present papers at professional conferences and submit articles for publication throughout their tenure as a student. After admission to candidacy, the student is expected to research, write, and defend a dissertation based on original research (up to 48 credit hours). Students may either submit a single dissertation or a series of integrated publishable articles (30-40 pages each). The student's committee must approve this choice and decide on the number, length and content of the articles at the same time, usually at the committee hearing prior to the preliminary exams.

**B.F.A. Degree.** The B.F.A. degree program is offered to outstanding students who are prepared for art studies, careers and professional activity beyond the undergraduate level. Up to seventy (70) semester hours are focused in studio and art history course work, while a minimum of fifty-eight (58) semester hours are reserved for University Studies Program requirements. All B.F.A. students will be required to participate in the B.F.A. exhibition upon graduation.

All B.F.A. students will be required to sign a contract that will outline deadlines and requirements for the B.F.A. exhibition. Prior to the B.F.A. exhibition, students will participate in studio visits with a rotating group of Art faculty members. If faculty deem their work insufficient, they reserve the right to exclude the work from the exhibition and withhold the B.F.A. degree.

**Application**

Formal application is made to the department for acceptance into the B.F.A. degree program. Application must be submitted at least two semesters prior to applicant's anticipated graduation. Favorable faculty review of the application materials and a cumulative 3.250 GPA in course work in the major and university studies are required before a student is declared a candidate for the B.F.A. degree.

- C or better in all art classes
- 3.250 in art major program
- 3.000 overall GPA

Undergraduate majors proceed with meeting the USP requirements for the B.A. in art and balance with foundation, art history, and studio core requirements in the major until formally accepted as a B.F.A. candidate. Application does not automatically guarantee acceptance into the B.F.A. program.

Majors in the process of completing the fourth semester of their Foundations and Studio Core course work (16-19 hours) submit applications materials by February 1st or November 1st of their first semester in the department. Students transferring to the Department of Art who have completed their foundation core and successfully passed portfolio review are eligible to apply for a B.F.A. after one semester in the Department of Art.

**B.A. in Art History.** The Art History major will provide students with a course of study that will provide depth and breadth in the history of art. Students will develop a broad understanding of world art, study the art of western and other global cultures in-depth, and be introduced to the historiography and professional practices related to the field. Closely linked to the Museum Studies minor curriculum, the Art History major would have a strong vocational application.

**Program Requirements**

Requirements of the program include:

- 121 hours, including 51 hours within the Art major
- All Art courses must be passed with a letter grade of C or better
- 2.500 GPA within major required
- 2.500 overall GPA
- UW Transfer Art Residency Requirement for transfer of 12 or more art credit hours into department: 26 upper division hours of UW Art courses

**B.A. Degree.** The B.A. degree is available to students who are preparing for further studies or careers in the arts and arts-related fields, such as art education, graphic design, art therapy, medical illustration, botanical illustration and forensic illustration. Students work with their academic advisers to select courses from the USP and elective offerings to complement art studies in their areas of interest. Students must earn a grade of C or better in all courses taken to satisfy department requirements. Courses in the major must be taken for a letter grade. In addition to the university requirement that degree candidates hold a minimum cumulative grade point aver-

age of 2.000, degree candidates for the B.A. degree in the Art Department also must have a minimum 2.500 cumulative grade point average and a 2.500 grade point average in Art Department courses at the time of graduation.

**Art/Art Education Concurrent Major.**

Through a cooperative agreement between the Art Department and the program of Art Education, all Art Education students will concurrently complete a major in Art. The Art degree requirements are essentially the same as for all other Art majors; however, specialized advising is available to ensure that students select programs that are both efficient and beneficial to their ultimate career goals.

**Transfer Residency.** A minimum of 26 hours of upper-division course work in the major is required to establish residency in the department for all transfer students. This applies to students in the B.F.A., B.A., and Art Education degree programs who transfer in 12 or more hours of art courses for the major. Students in all art programs must meet the university requirement of at least 42 hours of course work at the upper-division level (3000 and above).

ART 1005, 1110, 1120 and 1130 are considered an important preparation and prerequisite for drawing, painting, printmaking, ceramics, sculpture and graphic design courses and are required freshman courses for the major. Majors must complete the foundation core hours before electing upper-division courses in any studio area. ART 2010, 2020, and 2305 are required sophomore courses.

Once sophomore majors complete course prerequisites, they select a minimum of three courses from the studio core hours. Most of the university and college requirements should be completed as early as possible before the senior year. The department will enforce published prerequisites for courses.

Art majors must submit a portfolio for evaluation before proceeding to intermediate and advanced studios beyond the required studio core. Any student whose portfolio is assessed as deficient must address the deficiencies before receiving permission to advance in the major.

**Please note:** Students who do not pass the portfolio review will be able to resubmit the following semester. However, if students fail more than once, they will be unable to progress in the department of art and may be asked to transfer to another department or UW college or complete an art minor. Portfolio evaluation will occur once in each of the fall, spring, and summer semesters.

**Art Concentrations.** In choosing art electives, students (in consultation with their department adviser) may select from a full range of art course work either broadly based or with concentration in the areas of painting, drawing, printmaking, sculpture, ceramics or graphic design. In the Humanities/Fine Arts Distributed Major degree program. In the

B.F.A. degree program, students may declare a concentration in drawing, painting, printmaking, sculpture or ceramics.

**Graphic Design Option.** Graphic designers explore a variety of communication issues that deal with diverse messages and audiences.

Students interested in pursuing a professional career in graphic design and visual communication may elect a required sequence of courses for the B.A. degree in art with a concentration in graphic design. Students planning to graduate in four years must begin the sequence in the second semester of the freshman year.

**ART 4425 - Graphics Internship/ART 4400 - Internship.** Each graphic design concentration student is responsible to take at least 6-credit hours of Graphics Internship and/or Internship, and may take up to 9-credit hours maximum.

Each student must take at least one, 3-credit hour section of ART 4425: Graphics Internship. Internship hours taken after the completion of ART 2112, ART 2122 and ART 2030 or upon completion of 12 credit hours within the Graphic Design sequence will count toward each students' degree.

**Visual Communications Center.** The graphic design/visual communication area provides students with a "human centered" approach to learning that challenges and nurtures them to think conceptually and prepares them to be flexible in an international community that is continually being influenced by new ideas, tools and technology.

The visual communications center is a facility for undergraduate research that functions as a classroom, studio and high-end technology space and incorporates industry standard tools for graphic design, computer graphics and digital art exploration.

**Department Policy.** An art class may require additional meeting times, so that students may fully participate in the Visiting Artist Program and the UWAM lecture series.

As a matter of policy, the art department reserves the right to retain any works created by students it deems worthy for the purposes of exhibition until the end of the academic year.

The art department studios are the primary instructional classrooms. As a matter of policy, access to the studios and use of the equipment is reserved for students who are formally registered for scheduled courses and are following a prescribed curriculum.

**Scholarships.** The department has several scholarships for qualified students at all stages in the program. See Department of Art for a full list of scholarships.

**Academic and Career Advisement.** Faculty advisers work closely with art students to guide and direct their progress through the declared degree program and course of study. Through the visiting Artist Program, the UW Art Museum and internship placements, the department provides numerous opportunities and role models for a professional life in the visual arts. Through consultation and discussion with faculty advisers, art students consider their interests and abilities in relation to the many and varied careers in the arts and art related fields. Many graduates go directly into industry, on to pursue graduate studies or take the next step in their career plan. On a competitive basis upon graduation, majors may participate in the Post Bac Program where they prepare a portfolio for graduate school and gain additional experience in the studio and the classroom setting.

### Graphic Design, Museum Studies, Studio, Art History Minors

A minor is offered in graphic design, museum studies, all studio areas and in art history. Further information may be found on the department's web site.

### Graduate Study

At present, no program for a graduate degree in art is offered; however, some courses at the 4000-level may be counted at the graduate level in other degree programs.

Botany is the study of plants and their relationship to human affairs. The science is fundamental to food, fiber and pharmaceutical production; to the management of landscapes for beauty, recreation, forest products and forage; and to the protection of landscapes against pollution and other abuses. The botanist is concerned with the diversity and classification of plants and fungi, their structure at both the macroscopic and microscopic levels, and their physiology, ecology and genetics and evolutionary relationships.

Courses in botany have been developed to meet the needs of the following groups of students: those who desire a general knowledge of the subject for its cultural value; those specializing in areas which require a background in plant biology; and those selecting botany or biology as a major.

**Undergraduate Degrees****Biology**

The Biology major is designed for students interested in obtaining a broad education in biological sciences. It enables students to combine courses in biology, botany, zoology, physiology, and other biological sciences to meet the requirements of the major. On completion of the core requirements for the major, specific courses selected to complete the major may vary according to students' interests and are worked out by consultations between student and adviser. Botany collaborates with the College of Education in offering the Natural Sciences Program, which provides training in science and mathematics for prospective K-12 teachers.

## Graduate Study

The Department of Botany offers graduate programs leading to the master of science and the doctor of philosophy degrees in botany and the master of science degree in botany/water resources.

## Program Specific Admission Requirements

The program requires a composite minimum score on the verbal and quantitative sections of the GRE of: 900 (M.S.) and 1000 (Ph.D.).

A minimum GPA of 3.000 on previous coursework is also required.

## Program Specific Degree Requirements

Regardless of field of specialization, all candidates will be held responsible for basic information in the following areas: genetics, physiology, morphology, and evolutionary and environmental botany. A knowledge of chemistry (including organic and elementary biochemistry), physics, calculus, and statistics may be required.

A minimum GPA of 3.000 must be maintained. Any course in which a C (or below) or U is obtained cannot be counted toward the degree requirement.

Participation in seminars will be required of all candidates during their residence at the University of Wyoming.

### Master's Program

Requirements for this degree are 26 semester hours of courses approved by the student's committee plus four hours of BOT 5960, Thesis Research.

### Doctoral Program

In addition to the minimum requirements set forth in this Catalog, the Department of Botany may require that a student demonstrate skills in two peripheral areas. This decision is made for individual cases by the major professor and graduate committee. These could include foreign languages, statistics, or computer science. In some cases, additional skills may be required.

Chemistry is one of the fundamental physical sciences dealing with the structure and properties of matter, along with changes that matter undergoes. Chemistry's scope encompasses all substances, living and non-living. Its study and practice include (1) the theoretical and experimental aspects of chemical bonding and structure using computational, spectroscopic, and diffraction techniques; (2) the laboratory synthesis from simple starting materials of desirable compounds in the inorganic, organic and biological classes; and (3) the total analysis of complex mixtures using modern spectroscopic and electrochemical methods. Since we live in a material world, applications of chemical knowledge influence most areas of human endeavor: scientific, economic, political and social. Many of the advances in the areas of new materials, medicines, biotechnology, food production, new energy sources and semiconductor technology associated with the "computer revolution" are based on chemistry and chemical principles. Some understanding of these chemical principles should be part of every educated person's knowledge.

Because of the broad scope of this discipline, the Department of Chemistry offers a variety of courses and programs. These programs meet the needs of students planning professional careers in chemistry and those wishing to major in chemistry for other objectives. In particular, chemistry is a traditional preprofessional major for students interested in medicine and dentistry. Specific courses are offered to serve other major areas and as part of University Studies and A&S core requirements.

Students who have taken an AP examination and have received a score of 4 or 5 may receive credit for CHEM 1020 and 1030.

**Undergraduate Major**

The department offers both, B.A. and B.S. degree programs. The B.A. degree includes a minimum of 32 hours of chemistry. The Plan 1 B.S. degree requires at least 38 hours. The Plan 2 B.S. requires 46 hours of chemistry courses. Since the chemistry required in the first two years of all programs is the same, students interested in pursuing a chemistry major can elect any program initially. Discussions with a departmental adviser will allow students to choose the most appropriate major for their career objectives. In general, students planning graduate work in chemistry should elect one of the B.S. programs. The B.A. program has a more liberal content with additional electives. It would support careers in business, law and advanced study in areas needing a strong chemistry background such as toxicology or forensic science.

A B.A. is suitable for students in the College of Education who wish to obtain an A&S degree, and may also be appropriate for some premedical tracks. The Plan 2 (CACs) program is designed to meet standards set by the American Chemical Society (ACS). A student who completes the Plan 2 B.S. program will be certified by the Department of Chemistry to the ACS as having met the specific ACS requirements for undergraduate professional training in chemistry. Students must obtain a grade of C- or higher in each of the chemistry, physics or math courses specifically required for their degree.

The Department of Communication and Journalism provides a broad range of professional and research courses, offering a sound interdisciplinary academic program for students who plan careers in communication or mass media. Courses are comprised of writing, speaking and analyzing messages; forms of interpersonal communication; mass media effects and audiences' interpretations

of media messages and images. Degrees are granted in communication and journalism with academic specialties in each of the degree areas. Students are given academic preparation in communication skills (media writing and public speaking), coupled with opportunities for professional experience in their majors. The department also offers minors in public relations, communication and journalism for non-majors.

**Marketing, Facilities and Research Activities**

The department encourages majors to work actively in print media. The department offers unique professional opportunities for students with the student newspaper, *The Branding Iron*.

Lab instructors offer assistance at any stage in the process—from topic selection, purpose statements and gathering materials—to organizing, outlining and rehearsal. They can help alleviate speech anxiety that may prevent or inhibit some individuals from achieving their overall academic or career goals. Clients can have their presentations video-taped for critical input and evaluation as well as for portfolio or interview applications.

**Forensics.** The department conducts a nationally recognized program of Cross Examination Debate Association (CEDA). Teams and individuals representing the university attend national intercollegiate tournaments each year. Participation in the forensics program is open to all University of Wyoming students on a credit (COJO 2060) or non-credit basis.

## Graduate Study

The Department of Communication and Journalism offers graduate work leading to the master of arts degree in communication (either Plan A or Plan B) with emphasis on human communication or mass communication.

The graduate curriculum addresses six major areas of inquiry in human communication: 1) the structure and function of contemporary epistemological, ontological, theoretical, and methodological paradigms in the communication discipline; 2) theories of language and nonverbal symbolic interactions; 3) communication processes in small group and organizational settings; 4) communication as an agent of stability and change in diverse social systems; 5) the role assumed by communication processes in the formation, development, and coordination of intimate human relationships; and 6) the nature and function of argumentative discourse in democratic societies.

The master's program in the mass media addresses media issues and problems from a theoretical perspective. The program is designed to be flexible such that students can examine questions that relate to their specific interests in the media. Areas of interest include but are not limited to print media, broadcasting, advertising, public relations, visual communication, media law and regulation, media management, media effects, mass media and society, media history, or media ethics.

We are writers. Our principles follow from what claims us as writers as we guide our students in the creation of their own work. We offer a commitment to art and to the development of community through art. We offer an immersion in making, a chance to discover, to create serious work without pretense, to collaborate, to shake off assumptions and anxieties.

To be first and foremost concerned with making does not mean we take refuge from the world. It means we begin by supporting the deepest, most intelligent engagement with what matters to us as writers. A critical distance from the literary and academic marketplaces allows us to engage with them in a more thoughtful manner once we have found our authentic calling—that which we are truly compelled to explore. Our values will never map perfectly onto the concerns of institutions, and that is good. We strive to create the finest conditions for the making of art when we remain in an eccentric orbit of our own, one that overlaps with the other orbits, yet remains, as much as possible, guided by our own principles which include:

*Making*: we require the serious, committed, ongoing process of writing and revision.

*Range*: we cultivate a diversity of taste, form, genre, experience, and background, as well as an open understanding of what might constitute professional accomplishment.

*Flexibility*: we invite our writers to pursue their own creative and intellectual goals, to tailor the program in individual ways.

*Curiosity*: we urge creative and intellectual roaming: cross-genre work, interdisciplinary study, the movement across what are usually understood as boundaries; we encourage students to imagine possibilities beyond what is already imagined for them by the program and the university.

*Community*: we foster an environment that sustains listening, investment in the work of others, collaboration, rigorous expectation, generosity and, at the same time, respect for solitude.

*Integrity*: we challenge students to engage in deep investigation, to find their intent as a writer and to commit to it fully.

**Undergraduate Minor**

Minor in Creative Writing. The creative writing minor consists of six courses (18 hours) in creative writing and literature. Four of these courses will be in creative writing (12 hours) and must adhere to the following sequence: CW 1040 Intro to Creative Writing, two Lower Division Creative Writing courses (at the 2000-level), and an Upper Division course (4050). In addition, two courses will be in literature (6 hours). All courses must be completed with grades of C or better.

This minor is intended to be used with any major and must be designed in conjunction with a creative writing advisor. Each course must be passed with a grade of C or better.

**Graduate Study**

The Creative Writing Master of Fine Arts offers three areas of concentration: poetry, fiction, and creative non-fiction. A concentration consists of three workshops in the appropriate area.

**Program Specific Admission Requirements**

In addition to the minimum requirements set forth in this Catalog, the Creative Writing M.F.A. Program requires that students demonstrate by means of an official transcript that they have a solid undergraduate record. The M.F.A. program welcomes degrees in any discipline from four-year colleges or universities. Candidates must submit GRE general test scores, three letters of recommendation, a writing sample consisting of no more than 25 pages of prose or 10 pages of poetry, a 500-word statement of purpose and a vita. Students should consult the M.F.A. web site or contact the department for specific admission information and deadlines.

**Program Specific Graduate Assistantships**

We are a fully-funded program, meaning that we accept only as many students as we can support with graduate (teaching) assistantships. Full assistantships carry an annual stipend and remission of tuition and fees, and require the teaching of one section per semester. In the first year, M.F.A. students are expected to teach freshman English.

Each fall, the English department conducts a week-long orientation for new teaching assistants and a subsequent series of colloquia. Each graduate assistant is assigned to an experienced teacher in the English department as a mentor, to be available throughout the semester for consultation on teaching and grading techniques.

**Program Specific Degree Requirements****Master of Fine Arts in Creative Writing**

M.F.A. students follow the guidelines for a Plan A thesis. Only those courses in which a grade of B or better has been earned may be applied to the graduate program of study. All courses must be taken for a grade unless offered for S/U only. No graduate credit is allowed for grades S and U.

The cumulative GPA must be at least 3.000 to receive a degree. Courses below 4000-level will not count toward the degree nor will they be figured in the GPA, although they will appear on the transcript.

A minimum of four Workshops (CW 5560) and/or Creative Writing Seminars (CW 5540) must be taken. These may be in any combination to reach the four-course total, typically for a total of 12-16 credit hours. We require a cross-genre component in that mix of courses.

- Elective courses (typically taken for a total of 18 credit hours)
- MFA Project (CW 5990): typically taken for 3-4 credit hours (elective)
- ENGL 5900, taken in semesters teaching 1010, 1 credit per semester
- ENGL 5010, taken in the first semester teaching 1010, 4 credits (can be waived if a student has taken a comparable graduate-level course in a prior program)
- Other electives: free to be taken in any UW program or department across campus
- Thesis Hours (5960): 4 credit hours

Total credit hours must be a minimum of 36.

**Undergraduate Minor**

A minor in criminal justice requires 18 semester hours in criminal justice. All courses must be completed with a grade of C or better. The required courses are: CRMJ 1001, CRMJ 2210, CRMJ/SOC 2400, CRMJ 3110, CRMJ 3350, and CRMJ 3490.

**Graduate Study**

A criminal justice concentration within the master of public administration is offered by the Department of Criminal Justice. The MPA curriculum consists of 39 credits including core (7), option-core (2) and criminal justice (4) courses. Core courses are designed to develop comprehensive administrative, managerial, quantitative, financial, and analytical skills with an understanding of their applications in different sectors. Criminal Justice courses provide opportunity to supplement the core courses and facilitate the achievement of professional and career objectives in the field. One of the four courses is a required internship in the criminal justice field and can be replaced with an additional elective if the

MPA Director approves a waiver. Students may complete the degree within two years full-time or approximately three-four years part-time.

### Program Specific Admission Requirements

Applicants for the M.P.A. may have any undergraduate major. Only POLS 5000 may be taken prior to full admission into the program with permission of the M.P.A. director.

In addition to graduate coursework, M.P.A. students must complete a series of papers constituting the Plan B project. It is the purpose of POLS 5690, Capstone in Public Management, to be a framework within which students initiate and substantially complete their Plan B projects.

Following the completion of all other requirements, the M.P.A. student is required to pass a comprehensive oral examination covering the information contained within his/her program of study as well as a defense of the Plan B projects. The oral examination is also conducted within the framework of the POLS 5690 Capstone course.

Significant administrative experience is required of all M.P.A. graduates.

If the M.P.A. student has little or no administrative experience an internship is required and will be included as three hours of the required elective credits.

Students entering the M.P.A. Program are expected to possess basic computer literacy, and to have access to a computer for such purposes as communicating with professors via e-mail, receiving M.P.A. Study in the English department today embraces literature, creative and expository writing, and the nature and workings of language. Students in the department's programs can learn to read with pleasure and understanding, to write with grace, clarity and force, and to think with greater penetration and breadth. With these accomplishments, students are prepared for lives and work in which their power to understand, read, write and communicate will serve themselves and others, some specifically in careers in writing or teaching, some in professions of law, medicine, administration or almost any other field.

English studies center on the reading of what people have said, sung or written about their lives, their desires and the whole experience of being human. Literature is a great inheritance, a tradition that reaches back through the centuries, but it is also continually growing and changing. New theories about literature, and new and rediscovered literature itself, renew the ancient functions of literature to reflect, support and enhance the lives of the men and women who read it.

### Assessment of English Undergraduate Learning

Through an active and ongoing assessment of our program, we have identified the following outcomes that are expected of each student graduating with a Bachelor of Arts in English. We will continue to assess our curriculum to ensure these outcomes are being met:

UW students graduating with a Bachelor of Arts in English will have demonstrated an ability to:

1. Read, interpret, and write about a diverse range of texts in English, for example literature, film, digital media, and popular culture;
2. Understand those texts analytically and critically;
3. Understand those texts on the basis of careful close reading;
4. Understand those texts through past and current literary theory;
5. Understand that those texts are culturally constructed in time, place, and tradition;

6. Understand how those texts inform culture;

7. Participate in the critical and cultural discourses of English;

8. Participate clearly and appropriately through multiple spoken and written forms.

### The English Undergraduate Major

The English major requires 36 hours of work within the major and an additional 12 hours of a single foreign language. 21 of the hours within the major must be taken at the upper division. Only those courses in which a grade of C or better has been earned may count toward the 36 hours required for the B.A. and the foreign language requirement. No 1000-level courses count toward the B.A.

### Prerequisites

Most 2000-level courses require the completion of the COM1 requirement. Normally, 3000-level courses have the COM1 and ENGL 2025 as prerequisites, and 4000-level courses have 6 hours of 2000-level English courses as prerequisites. Students without certain prerequisites should consult the English department for permission to enroll.

### English Tracks

There are two tracks within the English degree: a Literary Studies track and an English Studies track. The former focuses on the study of literature and culture, while the latter balances literary study with courses in rhetoric and composition and professional writing. All English Education students are required to take the English Studies track.

### Teacher Certification

Students seeking the B.A. in English may also be certified for public school teaching by completing additional requirements set forth by the College of Education, via a concurrent major in English and English Education.

### Graduate Study

The M.A. graduate program in English offers two concentrations leading to the master of arts degree: Literary Studies, and Composition and Rhetoric.

#### Program Specific Admission Requirements

##### *Master of Arts in English*

In addition to the minimum requirements set forth in this *Catalog*, the Department of English requires that students demonstrate by means of an official transcript that they have a solid undergraduate record with course work in English. That said, the department welcomes degrees in English or other disciplines from four-year colleges or universities.

Depending on their undergraduate preparation, some successful applicants may be required to take additional or specific courses toward the English master's degree.

Students must show knowledge of one foreign language, ordinarily ancient or modern European. Students may complete a language requirement concurrently with their program.

Candidates must submit GRE general test scores, a writing sample, and a 500-word statement of purpose.

Students should consult the M.A. web site or contact the department for specific admission information and deadlines.

#### Program Specific Graduate Assistantships

Teaching assistantships are available to qualified applicants. Full assistantships carry an annual stipend and a remission of full-time tuition and fees, and require the teaching of freshman English - currently one section per term. (Sections meet three hours each week and are composed of a maximum of 23 students.)

Each fall the department conducts a week-long orientation for new teaching assistants and a subsequent series of colloquia for all graduate assistants. Each assistant is assigned an experienced teacher in the department as a mentor, to be available throughout the semester for consultation on teaching and grading techniques.

## Program Specific Degree Requirements

### *Master of Arts in English Plan A (thesis)*

The Department of English offers two concentrations within the master of arts degree. A concentration consists of three courses chosen from among those designated by the department as belonging to that concentration, together with other courses to total 30 hours. The concentration insures coherence in each student's graduate program; breadth is insured by a distribution of courses. Much of each student's program is taken in courses outside the concentration. Seminars will usually include students from all concentrations.

**Literary Studies.** Working from a variety of perspectives, this concentration focuses on the study of literature and of other culturally significant texts and materials, including, for example, film, oral materials, and political documents.

**Rhetoric and Composition.** Founded in the reflective practice of different kinds of writing, this concentration emphasizes the theory, research, and scholarship bearing on the production of discourse; it offers training for writing and for teaching that can include teaching of ESL, composition, and creative writing.

30 hours of coursework and a thesis for 4 additional hours (ENGL 5960).

A one credit course in bibliography and research methods.

A course in contemporary theory.

A reading exam and final oral examination covering coursework as well as the thesis.

With approval of the graduate adviser, a student may take a maximum of three hours credit outside the department.

Students take most of their courses at the 5000-level; if given official permission by the program director, a student can count one 4000-level course toward the M.A. degree.

The Department of Geography is comprised of faculty with interests and expertise in geography, planning, and resource management. The department focuses upon the following:

1. The origin and nature of the physical and cultural environment, how the physical environment and its natural resources form, and how the environment and natural resources affect the quality of life.
2. The ways in which people and institutions affect natural resources and the environment.
3. The variety of methods and techniques with which we solve or prevent problems through the planning and management of natural resources.

- The ways in which human institutions (e.g. political, economic, social) interact to produce diverse human landscapes.

### Four Fundamentals of Geographic Learning

The Department of Geography has identified four fundamental goals of geography to emphasize in its undergraduate curriculum. These four goals are at the intersection of topically important areas in the discipline of geography. We continue to evaluate student learning in our program to insure our curriculum addresses these fundamental goals as effectively as possible.

#### Goal 1 – Human-Environment Interaction

Students will be able to identify and explain how humans modify the environment and affect Earth’s biophysical systems through their human activities.

#### Goal 2 – Biophysical Systems

Students will be able to identify and explain an array of patterns, processes, and interactions in Earth’s biophysical systems occurring at different spatial scales.

#### Goal 3 – Human-Cultural Systems

Students will be able to identify and explain an array of patterns, processes, and interactions across Earth’s human landscapes at different spatial scales.

#### Goal 4 – Geographic Thought, Methods and Analysis

Students will understand basic geographic concepts and ideas, and will be capable of using them to inform their work. Students will also demonstrate the ability to select and use appropriate tools and techniques for addressing geographic problems and conducting geographic analysis. They will also be able to use multiple methods to examine, represent, and visualize Earth and its geographic characteristics.

### Undergraduate Major

In addition to course work required by the university and the college, majors must complete 40 hours of department requirements, all of which must be completed with a grade of C or above. Students who accumulate 15 or more of their 26 credits between Physical Geography and Geographic Information Science qualify for the B.S. degree. **G**eology is the study of the origin, history and structure of the earth. Our undergraduate offerings encompass virtually every aspect of the science, with emphasis on current theory, methods and applications. The philosophy of the department is to provide sound training in both theory and field observation, and to couple this background with a thorough education in modern laboratory, quantitative and field techniques required for an understanding of geologic processes.

The setting of the university in the Rocky Mountains is ideal because some of North America's most outstanding geologic features are within a short drive of campus. The semi-arid climate in Wyoming has resulted in excellent exposures of diverse rock types ranging in age from Precambrian to Recent. Deformation of the rocks in the region has been extensive, affording the student a field laboratory that exhibits a wide diversity of styles of faulting and folding. Mineral deposits, petroleum resources and coal abound in the region.

### Undergraduate Majors

The Bachelor of Science in geology is designed for those students who intend to become professional geologists and/or those who plan to attend graduate school in geosciences. The program includes courses normally expected of graduate school applicants, including a summer field camp and courses in related sciences and mathematics. This degree program prepares students for the examination for the professional geologist license.

The Bachelor of Arts in geology and Earth sciences is specifically designed for undergraduates who wish to study Earth sciences as a foundation for careers in a variety of areas, such as environmental law, natural resource business, land use planning, Earth science education, science journalism, and many governmental positions. The B.A. program includes a broad spectrum of courses, and focuses both on information about the Earth and on how society makes decisions that affect the Earth system.

The Bachelor of Science in Environmental Geology and Geohydrology is designed for those students who intend to become professionals in environmental fields such as consulting, site assessment, hazard assessment, and remediation. ## Undergraduate International Studies Curriculum

Students graduating with a degree in international studies will be able to recognize and appreciate the historical, political, social, cultural, and economic dimensions of international processes and issues, integrating these into an interdisciplinary perspective.

In addition to courses housed in the Global and Area Studies Program, the curriculum consists of numerous interdisciplinary courses across UW's seven colleges, primarily from the departments of political science, history, anthropology, geography, sociology, religious studies, women's studies, African and American diaspora studies, environment and natural resources, and economics.

**Core Courses** - Students take 9 hours of core coursework. INST 2350 (Introduction to Global Studies) and INST 2310 (Introduction to International Relations) provide the theoretical framework for the global and regional tracks. INST 4950 (Capstone) provides the culminating experience for students completing the B.A. degree in international studies and fulfills the WC/COM3 writing requirement for the University Studies Program.

**Area of Focus** - Students will complete a minimum of 18 hours of coursework in two specific areas of focus, choosing a global and regional track. Students must complete a minimum of 9 hours in each track. Global and regional tracks have suggested Gateway courses. Most Gateway courses fulfill University Studies requirements.

*Global Tracks* - Culture and Social Issues; Economic Systems; Governance and Conflict Resolution; and Sustainable Development and the Environment  
*Regional Tracks* - Africa and the Middle East; Asia and the Pacific Rim; Europe and the Former Soviet Union; and Latin America.

**Foreign Language** - Students must complete 18 hours in a single foreign language with one course at the 3000/4000-level, or show an equivalent level of proficiency. Language courses must be conversational language courses. American Sign Language is not considered a foreign language.

**Electives** - Students must take 9 hours of elective courses from the international studies curriculum, six of which must be upper division. One of the following Gateway courses can count for the elective requirement: ANTH 1200, ECON 1000, GEOG 1000, POLS 1200, INST 1330.

All required courses for the major must be passed with a grade of C or better. There are numerous special topics courses offered during the academic year and these courses can fulfill the international studies requirements with approval from your adviser. Students are

encouraged to satisfy the USP QB (quantitative reasoning) requirement by taking STAT 2070, Introductory Statistics for Social Sciences.

International Studies majors are encouraged to study abroad or do an internationally-focused internship. Opportunities are listed on the Global and Area Studies website.

## Graduate Minor in International Studies

A graduate minor in international studies provides students in graduate programs other than international studies with the opportunity to acquire a basic graduate-level familiarity with international relations, global processes and cultural diversity around the world. Students acquire a foundation in inter-governmental relations and research methodology. Beyond this, students work closely with a graduate director to fashion a program of study appropriate for their interests and post-graduate plans. The minor complements several other graduate degree programs.

### Prerequisites for Admission

Declaration of an international studies minor is contingent on admission to a master's or doctoral degree program. Application is in the form of a letter of interest to the director of the program, including the background, anticipated course of study, and reason for seeking the minor. An interview with the director is also required. All prerequisites for entering the graduate program in international studies as a major apply to the minor with the exception of proficiency in a second language. Students must be prepared for coursework in international studies at the graduate level and be willing to take prerequisite courses if necessary.

### Course and Committee Requirements

Graduate students minoring in international studies must satisfy the requirements of their graduate major and take twelve credits of guided graduate coursework in international studies. With the approval of the department of the graduate major, these twelve hours may also count toward the major. Students are required to take at least one advanced theory course (INST 5200) and one advanced research methods course. All courses will be determined in consultation with the program director.

The Modern and Classical Languages department offers work leading to the B.A. degree with majors and minors in French, German, and Spanish, or concentrations for the B.A. in humanities/fine arts. A minor is offered in Classical Civilizations, Chinese,

Latin and Japanese. The M.A. is available in Spanish. Courses are also offered in literature in translation.

## Foreign Language Requirements

All candidates for the B.A. and B.S. degree in the College of Arts and Sciences who matriculated before Fall 2015 are required to complete the equivalent of 8 semester hours of work in a single modern or classical language. Students with prior exposure to the language may be granted college credit after taking an online examination administered by the department; students must take this examination before completing registration for a language course (for regulations governing credit by examination, refer to Credit Available to Undergraduate Students in this *Catalog*). An advanced placement, AP, examination in the language with a score of 4 or higher satisfies the language requirement in most languages, as do CLEP and IB scores (see section on Credit by Examination on the department web site).

Students who have had a foreign language in high school should take the online examination to determine the course in which they should enroll and to avail themselves of the opportunity to receive credit by examination. Students who have completed their language requirement can enroll for additional language courses of their choice, something strongly advised for those who wish to reach adequate levels of proficiency in the language or wish to study abroad. Check the Catalog or website for special sections targeted for students with varied experiences in the language.

## Undergraduate Major

A language major usually requires 30 semester hours of work in a single language beyond 2030. To include a language option in the humanities/fine arts interdisciplinary program, students must complete at least 12 hours above the 2030 level.

Students completing an undergraduate major in our department will meet the following learning goals:

1. attain proficiency in another language in all four of the basic skills (speaking, listening, reading, and writing);
2. gain understanding of other cultures; and
3. develop skills in research critical thinking, analysis, and writing on subjects appropriate to the field of study.

Students will meet the following learning outcomes to:

1. demonstrate proficiency in conversation;
2. demonstrate reading comprehension of texts written in the language;
3. produce grammatical, idiomatic compositions in the target language;
4. gain essential knowledge about the history, traditions, customs, and ways of thinking of at least one other culture;
5. demonstrate understanding of works of literature read in the original language; and
6. produce well-reasoned and clearly articulate research papers on subjects appropriate to their field.

### French

Required courses for the major in French are 2040, 2130 or 3110, 2140, 3005, 3050, 3060, 4100, 4110, plus 6 hours of electives at the 4000-level.

### German

Required courses for the major in German are 2040, 2140, 3050, 4100 and 4110, plus 15 hours of electives in German above 2030.

German in-residency requirement: German majors need to take 3 of the following 6 courses to meet the in-residency requirement: GERM 4100, 4110, 4145, 4240, 4230, 4265.

### Spanish

Spanish offers two major tracks:

- (1) The culture, literature, and cinema track requires 2040, 2140, 3030/3050, 3040, 3100/3110/3120, plus an additional 12 hours of electives above SPAN 2030.
- (2) The language-linguistics track requires 2040, 3030/3050, 3040, 3060, 3300, 4090, plus an additional 12 hours of electives above SPAN 2030.

Highly recommended electives for the language-linguistics track are SPAN 3080 and SPAN 4080. It is possible to take one class from the following: SPPA 3160; ANTH 4775; ANTH 4785; ANTH 4795; LANG 4785.

### Humanities/Fine Art Majors

The humanities/fine art majors should have 2040, 2140 and 3050 as part of their language option. Prospective B.A. language majors should seek help from their advisers

to work out a coordinated program of study. An additional area of concentration (e.g., a second foreign language, English, fine arts, philosophy, history, science or social science) is strongly recommended.

The Latina/o Studies program, through an interdisciplinary and comparative approach examines the history, cultures, language and contemporary experiences of Mexicans, Mexican-Americans and other Latinos/as in Wyoming, and the United States.

### Learning Outcomes

Latina/o Studies courses emphasize perspectives that are historical and contemporary, theoretical and practical, as well as critical and aesthetic. These perspectives help to develop an understanding of oppression and resistance, at the individual, institutional, and ideological levels.

Upon completion of the University of Wyoming Latina/o Studies minor curriculum, students will have an awareness and apprecia-

tion for the Latina/o experience. Particularly as the Latina/o experience is expressed in the following concepts and principles of organic insight, relational awareness, historical perspective, power for social change, intersectionality, and aesthetics.

1. *Organic Insight* - The development of a contextual framework for understanding one's own and others' experiences in relation to the Latina/o experience.

2. *Relational Awareness* - The development of a theoretical framework for understanding how institutional social structures impact individuals, families, and communities, and in turn, how individuals, families, and communities impact social structures through resistance, social agency, and change.

3. *Historical Perspective* - The development of a critical historical viewpoint for understanding how struggles around social, economic, and political forces have shaped the traditional and contemporary Latina/o Diaspora.

4. *Power for Social Change* - The development of a critical consciousness, which is necessary for a social praxis that combats oppressive racist ideologies and social structures that perpetuate individual and institutional inequalities.

5. *Intersectionality* - Gaining an awareness of the intersection of race, ethnicity, class, gender, and sexual orientation as it plays out organically, relationally, historically, and politically.

6. *Latina/o Aesthetics* - The development of an appreciation and awareness of the aesthetics evident in Latina/o art, music, theatre, literature, and other artistic expressive forms and styles.

Web site: [www.uwyo.edu/lifescience](http://www.uwyo.edu/lifescience)

Program Director: Jonathan Prather

The Life Sciences Program consists of all LIFE prefix courses. These courses support a wide range of life science majors and several non-life science majors across campus. The number of LIFE courses taken by students in each major is determined by the departments that offer the majors. The curriculum intends to provide science majors with both breadth and depth in the basic life sciences, and non-science majors with exposure to key concepts in biology and an understanding of the connections between science and society. The program courses also expose students to the fields of cell and molecular biology, genetics, ecology, and evolution, and they familiarize students with the diversity of life on the planet. Courses within the curriculum address four fundamental goals at a level appropriate for each course:

1. Acquisition, Application and Synthesis of Knowledge

2. Communication Skills
3. Critical Thinking and Problem Solving
4. Research Skills

The Life Sciences courses listed below were previously offered under the BIOL prefix. All courses listed below are now offered through the LIFE prefix.

**“For the things of this world cannot be made known without a knowledge of mathematics.”--Roger Bacon**

Virtually every student at UW will take one or more math courses to fulfill graduation requirements. The intent is to illustrate the esthetics inherent in mathematics, and to provide students with the quantitative skills needed for today’s careers.

Mathematics majors receive a broad and deep view of the mathematical sciences. They develop their mathematical thinking and communications skills in algebra, analysis, and applied math. They learn a variety of technological tools necessary for jobs in education, business, government, and industry. In addition to our math classes, the department offers a variety of opportunities to enrich the undergraduate experience. Students can participate in weekly seminars, summer research projects, Putnam Team competitions, and the math club.

## Mathematics Placement

All UW math courses have prerequisites which are detailed in the course listings below. These are to assure that each student has the best possible opportunity for success in the course. In accordance with this, *all students registering for a math course will have their records checked in order to determine whether the prerequisite is satisfied.*

A computerized prerequisite check is run prior to the start of every semester. *Students who preregistered for a math course but have not satisfied the prerequisites at the time of the check will be automatically dropped from the course.*

Prerequisites for courses numbered 2200 or lower (except 1105 and 2120), and 2350 (Business Calculus), may be satisfied in one of four ways:

1. Obtain a grade of C or better in a prerequisite course. Note that non-credit courses from out-of-state colleges are not accepted as prerequisites.
2. Pass the Mathematics Placement Exam (MPE) at the stated level within one year of the start of the course.
3. Obtain a sufficiently high score on one of the following standardized exams within three years of the start of the course: ACT math score or SAT quantitative score.
4. Obtain a sufficiently high score on one of the following standardized exams: AP Calculus, CLEP, or IB.

More information on mathematics placement may be obtained from the Center for Advising on Mathematics Placement (CAMP), 202 Ross Hall, 766-4221, or at [www.uwyo.edu/mpe](http://www.uwyo.edu/mpe).

## Duplication of Courses (MATH 1400, 1405, 1450)

To avoid loss of credit because of duplication of course content, please note the following: (a) students with credit for both MATH 1400 and MATH 1405 will not receive new credit by taking 1450; (b) students with credit for one of MATH 1400 or MATH 1405 will receive only 2 additional credits by taking MATH 1450; (c) students with credit for MATH 1450 will receive only 1 additional credit by taking both MATH 1400 and MATH 1405. Note that the GPA calculation for these situations is unusual, and students should ask the Registrar’s Office for details.

Note that MATH 1450 counts as one attempt at each of MATH 1400 and 1405 for the purposes of repeating classes.

## Undergraduate Major

A degree in mathematics should prepare students to enter either graduate studies or the workforce with a skill set that could only come from an intense study of both quantitative reasoning and rigorous proof. This can be accomplished by focusing on the following goals for our undergraduate major:

1. Develop mathematical thinking and communication skills
2. Develop skills with a variety of technological tools
3. Provide a broad view of the mathematical sciences
4. Require study in depth

The required lower division core courses for a mathematics major are Calculus 1, 2, and 3 (MATH 2200,2205,2210), Differential Equations (MATH 2310), Linear Algebra (MATH 2250), and the Math Major Seminar (MATH 2800).

At the upper division, all mathematics majors must take Analysis 1 (MATH 3205), Algebra 1 (MATH 3500) and Introduction to Scientific Computing (MATH 3340). These courses, known as the transition courses, introduce students to the three main areas of mathematics research currently represented in the department.

Every mathematics major must select one two-course sequence (MATH 4200/4205, MATH 4510/4520, or MATH 4340/4440) that builds on the corresponding transition course. This sequence provides the student with an opportunity to study one of these areas in greater depth.

Finally, an additional 12 credits of upper division math courses (3000 and above) are required. It is recommended that these courses be selected to provide a broad view of mathematics.

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student’s advisor. More details about such courses are available on the math department’s web site, [math.uwyo.edu](http://math.uwyo.edu).

Only grades of C or better will be accepted for the major.

## Undergraduate Minor

The minor in mathematics focuses on fundamental aspects of mathematics that are essential for further study in mathematics and are also useful in a variety of other disciplines. Students minoring in mathematics may customize the minor by choosing the appropriate transition course and upper-division electives to match their needs.

The required lower division core courses for a mathematics minor are Calculus 1, 2, and 3 (MATH 2200,2205,2210), Differential Equations (MATH 2310), Linear Algebra (MATH 2250), and the Math Major Seminar (MATH 2800).

At the upper division, all mathematics minors must take ONE of Analysis 1 (MATH 3205), Algebra 1 (MATH 3500) or Introduction to Scientific Computing (MATH 3340), as well as 6 additional credits of upper division math courses (3000 and above).

Two of the math electives may be chosen from a list of approved courses that have significant math content, upon approval by the student's advisor. More details about such courses are available on the math department's web site, math.uwyo.edu.

Only grades of C or better will be accepted for the minor.

### Undergraduate Interdisciplinary Computational Science Minor

### Graduate Study

The Department of Mathematics offers programs leading to the degrees of master of arts, master of science, master of arts in teaching, master of science in teaching, and the doctor of philosophy.

The requirements for these degrees reflect our belief that mathematicians should have a broad foundation in the core areas of algebra, analysis, and applied mathematics as well as the experience of a more intensive investigation of a specialized area. We provide this within a flexible structure that recognizes the individual interests and varied backgrounds of our students.

### Program Specific Admission Requirements

To be competitive for admission, applicants must have strong backgrounds in mathematics. Generally, this means a bachelor's degree in mathematics or a closely related discipline. All applicants should have substantial coursework beyond the calculus sequence; courses in differential equations, linear algebra, and, in particular, courses in abstract algebra and analysis are highly recommended. A solid performance on the GRE Subject Test in Mathematics can demonstrate the applicant's mastery of these subjects. The GRE Subject Test in Mathematics is therefore recommended but is not required.

The GRE General Test is required, with a minimum Quantitative Reasoning score of 157 and Verbal score of 143. International applicants need a composite TOEFL score of 76 or an IELTS score of 6.5.

ETS only reports TOEFL scores taken within two years of the date of request.

### Requirements for Admission for M.A.T. or M.S.T.

Applicants are required to have:

- (a) A valid teaching endorsement in any state or educational requirements satisfied for secondary teaching;
- (b) courses equivalent to MATH 3205, 3500, 4000 and 4600;
- (c) a course in computer programming.

Students who enter the program with a deficiency in the courses listed in (b) must take them at UW, but these courses may not be counted toward the course requirements of the M.S.T./M.A.T. program.

## Graduate Assistantships

The mathematics department employs approximately 25 graduate assistants each year. Assistantships include a full tuition and fee waiver, a monthly living stipend, and health insurance. Ph.D. students normally receive a higher stipend than master's students.

Teaching assistants teach an undergraduate course each semester.

Students may also compete for research assistantships, provided that their interests align with an externally funded research project.

Summer support is not guaranteed but is usually available through teaching and research opportunities.

Renewal of funding and continuation in the mathematics graduate program is dependent upon the student's adequate progress towards graduation.

## Program-Specific Degree Requirements

### *Master's Programs: M.A. and M.S. Plan A and Plan B*

- As part of the 30 hours of formal 5000-level mathematics courses, the student must complete the following courses with a grade of B or better:
  - MATH 5200: Real Variables I,
  - MATH 5230: Complex Variables I,
  - MATH 5310: Computational Methods I
  - MATH 5400: Methods of Applied Mathematics I,
  - MATH 5500: Advanced Linear Algebra, and
  - MATH 5550: Abstract Algebra I.

- Within the 30 hours of formal 5000-level coursework, the student must pass 1 hour of MATH 5800-01: Professional Development Mathematics.
- The student must pass the department's Foundation Exam. This exam covers material from advanced vector calculus and linear algebra at the upper-division undergraduate level and is offered before the beginning of each semester.

In addition to the common elements above, students must select and complete one of the capstone experiences described in the tracks below.

### **Track #1: Master's Thesis (Plan A)**

Within the 30 hours of 5000-level courses, the Plan A student must complete 4 hours of MATH 5960: Thesis Research. At least 26 hours of 5000-level coursework must be math-content courses (not thesis research).

The student must prepare a master's thesis (Plan A) and give an oral defense of the thesis. In the mathematics department, a Plan A thesis reports on the result(s) of independent and original research completed by the student under the direction of a faculty member. The thesis should describe the research and its results and be written to the standards of the appropriate area of mathematics.

### **Track #2: Master's Paper (Plan B)**

The student must prepare a master's paper (Plan B) and give an oral defense.

To write a Plan B paper, the student must present an expository paper on a designated mathematical subject. Students are guided by their advisor in the subject matter and in the preparation of the paper. A successful paper and defense demonstrates that the student has mastered a substantial mathematical topic that is beyond those covered in formal foundational coursework.

### **Track #3: Coursework/Project (Plan B)**

A second M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper, the student takes a sequence of three 5000-level courses that all address a common mathematical theme. The sequence must be approved by the student's advisor and the mathematics graduate committee. Two of the courses must be mathematics-department offerings, and the third may be either a mathematics course (including reading/topics courses) or a course from another department in a related field.

- The student must complete an additional 6 hours of courses at the 5000 level. Thus, Track #3 requires the completion of 36 hours of graduate-level coursework.
- Within the 36 hours, the student must propose and complete with a grade of B or better an appropriate 3-course sequence
- The student will a short paper illustrating how the common mathematical theme of the sequence manifests itself in the content of each course and give a presentation/defense of the paper.

In approving the student's proposal for this option, the graduate committee and the advisor will consider how the writing and independent study spirit of the Plan B option are fulfilled within the recommended plan.

### **Track #4: Qualifying Exam (Plan B)**

A third M.A. or M.S. option exists for the Plan B student. In lieu of writing a paper or taking additional coursework, the student must take and pass the department's PhD Qualifying Examination in one of the three areas: Analysis, Algebra, or Applied Mathematics. These examinations focus on the material in the required courses.

- Pass one of the department's qualifying exams in:
  - Analysis (MATH 5200 and MATH 5230)
  - Algebra (MATH 5500 and MATH 5550)
  - Applied Mathematics (MATH 5310 and MATH 5400)
- The oral component of this Track will consist of a defense of the student's written answers to qualifying exam.

These examinations are given twice a year at the beginning of the fall and spring semesters. This option is intended for students who will continue for a PhD at UW.

## Doctoral Program

The student must maintain a 3.0 cumulative GPA.

The student must teach two semesters of college mathematics.

The student must complete a combination of 72 hours of coursework and dissertation research. Within the 72 hours, a maximum of 12 hours can be at the 4000 level, and 42 hours must be formal courses at the 5000 level. The courses must be mathematics courses or

courses with significant mathematical content, as approved by the department's graduate committee.

Within the 42 hours of 5000-level courses, the student must:

- Complete MATH 5200, 5230, 5310, 5400, 5500, and 5550 with a grade of B or better.
- Take a broadening course as defined by the department and pass with a grade of B or better.
- Take one hour of MATH 5800-01, Professional Development.
- Take two hours of MATH 5800-02, Seminars and Colloquia.
- Complete the courses distributed in three areas: algebra, analysis, and applied mathematics. The student must take at least two courses in each of two categories and at least one course from the third category. The department maintains a list of course categories.

In addition, the student must:

- Pass the foundation exam, the qualifying exam in the student's research area, and the preliminary exam.
- Write a dissertation containing the student's original mathematical results and present an oral defense of the research.

The Department of Music offers undergraduate and graduate degree programs which combine scholarship with performance, theory with practice and the academic with the creative. It also provides an opportunity for the study and performance of music by university students who are not majors in music. By giving concerts, workshops and lectures throughout the state of Wyoming through the Fine Arts Outreach Program, the music department serves as a musical resource for the entire state. The music department is fully accredited by the National Association of Schools of Music.

Procedures and requirements are listed in the music department *Student Handbook* which is available online at [www.uwyo.edu/music/forms/index.html](http://www.uwyo.edu/music/forms/index.html). The music department *Student Handbook* and the *University Catalog* are binding documents for the degree programs listed below. Students must receive a "C" or better in all courses designated MUSC to satisfy department requirements. The foreign language requirement for the Bachelor of Arts in Music and the Bachelor of Music in Performance: Vocal Emphasis degrees may be satisfied with a "C" or better in all courses. A student's transfer courses must meet all of these requirements to be accepted for credit.

An audition is required to become a Music major or minor. The 3 Steps to Becoming a Music Major are:

1. Apply for admission to the University of Wyoming (<http://www.uwyo.edu/admissions/>).
2. Audition for admittance as a Music major and for Music scholarships. Audition and scholarship information may be found at [www.uwyo.edu/music](http://www.uwyo.edu/music). All Music majors and minors MUST audition to be admitted to the Music program.
3. Perform at an acceptable level, and you are in!

**Degrees**

**Bachelor of Arts (with major in music):** A program designed for the student who desires a broadly-based liberal arts program.

**Bachelor of Music Performance:** A four-year course of study designed for students who wish to prepare for a professional career as performer and applied teacher.

**Bachelor of Music Education:** A four-year course of study for the student who wishes to prepare for a career as a teacher of music in elementary or secondary schools in the instrumental, vocal, and general music fields.

**Performer's (post-baccalaureate) Certificate**

A non-degree course of study for the student seeking to improve professional performance skills. The program consists of a total of 30 credit hours from applied lessons, ensembles and electives to be selected in consultation with the major adviser. Prerequisites are demonstrated evidence of advanced performance proficiency through a live or recorded audition, undergraduate degree in music, and admission to the university.

**Music for Other Students**

**Music as an elective subject.** Students from other departments of the university may, with consent of their adviser and applied instructor, elect private or class lessons in applied music (with or without previous training) and may enroll in any theory, music literature or activity course for which they are qualified. See the music department *Student Handbook* for requirements for a minor in music.

**Organizations.** Performance organizations include the Happy Jacks, Marching Band, Symphonic Band, Wind Ensemble, Collegiate Chorale, Symphony Orchestra, Chamber Orchestra, Singing Statesmen, Bel Canto, Women's Choir, and Opera Theatre. Other groups are brass, woodwind, string, percussion and piano ensembles, Vocal Jazz, Civic Chorus and Jazz Ensemble. Membership is open to qualified students in all colleges and departments of the university. Each year, in addition to frequent appearances on the campus, several of these organizations and groups are heard on tour in Wyoming and neighboring states.

**Music Fees**

**For Individual Instruction:**

## Undergraduate Study

### Bachelor of Arts in Music

All music majors must successfully complete MUSC 0200 Convocation (0 credit, S/U) each semester in residence and must enroll in lessons and one major ensemble per semester. Each ensemble course is deemed to be a unique course even though the course number is not unique. To fulfill this degree requirement students will be expected to enroll in ensembles at the lower and upper divisions a minimum of four times with a career maximum of 8. All music majors must pass the piano proficiency test during their sophomore year. Class Piano I-IV is highly recommended for majors with little piano background. Consult your advisor for specific information.

#### Learning Outcomes

Graduates of the UW Department of Music will develop the skills, concepts, and sensitivities essential to the professional life of a musician (NASM Handbook, p. 85).

At the completion of the Bachelor of Arts degree in Music, students will be able to: (1) demonstrate a level of competence as solo and ensemble performers appropriate for a musician educated in the liberal arts, (2) demonstrate specific knowledge in music theory, music history, and general studies appropriate for their professional goals, and (3) demonstrate the ability to think, speak, and write clearly and effectively about the art of music.

Philosophy starts with those hard questions we all ask at some time or another. Some important questions of meaning and justification can't be answered by making observations or doing experiments. Philosophy is the effort to deal with these problems through sustained,

hard, and critical thinking. Philosophy is good preparation for careers that call for you to use your mind, without prejudice but with rigor.

The Philosophy Department offers an undergraduate major, three undergraduate minors, and a graduate MA.

For details on each of these programs, see the department's web site.

## Undergraduate Major

A philosophy major must earn a C or better in 11 philosophy courses, including three courses at or above the 4000-level and five additional courses at or above the 3000-level. Our courses fall into four program areas: metaphysics and epistemology; ethics and philosophy of value; logic and philosophy of science; and history of philosophy. In each of these areas, there are two core courses. Philosophy majors choose three of the four distribution areas; they take at least two courses, including a core course, in each of the chosen areas. All prospective majors should take Introduction to Philosophy.

The department allows its majors to concentrate in a number of interdisciplinary areas, and we welcome double-majors in philosophy and another field. Please consult the department's undergraduate adviser to work out a suitable program.

## Minor in Philosophy

The minor in philosophy affords students the benefits, both personal and professional, of studying philosophy.

A student minoring in philosophy must earn a C or better in six philosophy courses, including four at the 3000-level or higher.

## Minor in Ethics

Ethical questions and problems arise in all aspects of life. A minor in ethics can complement and enrich any major field of study.

The minor in ethics consists of six courses, four at the 3000 level or above. A student takes one course in each of these areas: ethical theory; applications; scientific, historical and social analysis, and capstone course. The other two courses are approved electives.

## Minor in Environmental Values

The minor in Environmental Values may be added to any bachelor's program at UW. This minor creates a vital link among the natural sciences, humanities, and social sciences through exploration of aesthetics, culture, ethics, and policy.

The minor requires a total of 18 credit hours, including at least one course within each of four areas of concentration. At least 12 of these credits must be outside the primary major, and nine of these credits must be at or above the 3000-level. A three-hour, core course (either PHIL 2330 Environmental Ethics or PHIL 2340 Natural Resource Ethics) is required of all students.

## Graduate Study

The Department of Philosophy offers the master of arts degree under the Plan A

## Program Specific Admission Requirements

A writing sample of no more than 3,000 words on any subject in philosophy.

A statement describing specific philosophical interests.

## Program Specific Graduate Assistantships

The department offers two to three graduate assistantships yearly on a competitive basis. These assistantships carry a tuition and fee waiver, plus a stipend. For more information, please contact the department.

## Program Specific Degree Requirements

### Plan A (thesis)

31 hours of graduate credit

27 hours of graduate coursework

4 hours of thesis research

Proof of proficiency in formal logic (through first-order predicate logic with identity) by either passing the department's course (3420) or some other course judged to be its equivalent with a grade B or better or by completing a test with a grade B or better at the end of the second semester.

First year paper at the beginning of the third semester.

Defense of a thesis prospectus by the end of the third semester.

In any cases of deficiency, the department may require remedial work before admission to M.A. candidacy.

Physics originated in antiquity as the study of natural philosophy. As such, it attempts to describe the universe within the context of both physical laws and the fundamental particles of nature. The broad scope of physics runs from the microscopic nuclear structure and that of the elementary particles themselves to the macroscopic, the galaxy and evolution of the universe as a whole. Today the subject is generally divided into broad areas such as solid-state, nuclear, elementary particles, astrophysics, etc. The department maintains competence in most major branches of physics and offers instruction in these areas at both

the undergraduate and graduate levels. In addition, it has a strong interest and involvement in science education.

## Learning Outcomes

The B.S. and B.A. in Physics, the B.A. and B.S. in Astronomy, the Physics Plus B.S., and the B.A. in Physics and Physics Education all have the broad objectives enumerated below. These objectives are designed to promote the success of our majors in their chosen career path, whether that takes them into academia, secondary teaching, industry or further education:

1. Provide students with problem-solving and data-manipulation skills appropriate to the growing range of scientific and technological careers in academia or industry.
2. Develop students' oral, written, interpersonal and communication skills.
3. Provide students with skills in experimental design, data collection, and data analysis through research experiences in a laboratory/computational/telescope setting.
4. Educate students in the application of mathematical tools that will be useful for them to achieve success in a post-college career.
5. Provide a conceptual and analytical understanding of the core areas of physics and their specialty area.
6. Provide students with an understanding of scientific reasoning, i.e., the roles of theory, hypothesis, and experiment in the scientific method.

The B.S. in Physics and the B.S. in Astronomy are primarily designed for students who wish to pursue post-graduate education or to have a more in-depth physics background. The Physics B.A. is primarily designed for students interested in pursuing a double major, or a professional career. The Physics B.S. is designed to accommodate students who have an interest in pursuing a hybrid career, for example, Physics + Atmospheric Science or Physics + Materials Science. The B.A. in Physics and Physics Education is structured for those interested in pursuing a secondary science teaching career.

Political Science is the study of how societies govern themselves and interact with one another. Courses of instruction in the Department of Political Science are offered in the following subfields: American politics, comparative government, international relations, political philosophy, public law, and public administration. Areas of focus include analysis of government structures and processes, citizens' influence on government, policy content, philosophical concepts and traditions, political systems of other nations, and resolution of conflicts between nations. Our goals are to help students better understand political processes, and to develop the critical thinking and analytic skills necessary for: effective participation in the political process,

successful careers in the public and private sectors, and further study in law, political science, and public administration.

In 1925, the state legislature passed a law requiring the study of the U.S. and Wyoming Constitutions by all University of Wyoming students. Political Science 1000 satisfies this requirement, but the requirement can also be satisfied by special examination given periodically by the Department of Political Science.

### Learning Outcomes

We continuously and actively assess the Political Science undergraduate curriculum to ensure that the following learning outcomes are being met for each of our graduates:

1. Acquire a knowledge and understanding of the values, beliefs, and institutions that constitute governing processes;
2. Acquire an understanding of the distinctions among the major subfields of the discipline including: American politics and law, international relations, comparative politics, and political theory;
3. Develop a knowledge and understanding of citizens' roles within governing processes;
4. Acquire a knowledge of the theories and analytic skills necessary to evaluate conflicting arguments, assemble and present appropriate evidence, and make reasoned conclusions from the evidence available;
5. Communicate effectively, both orally and in written form.

### Undergraduate Major

In addition to the university and college requirements listed elsewhere in this bulletin, a major in political science requires 33 hours. Students are required to complete the following four introductory courses: POLS 1000; POLS 1200 or POLS 1250; POLS 2310; and POLS 2460 or POLS 3600. Students are also required to take at least one seminar in political science (and its prerequisites); 8 hours of a single foreign language or equivalent credit by examination as determined by the Department of Modern and Classical Languages; STAT 2070; and a minimum of 9 hours of upper division credit in political science. A maximum of 6 hours of internship credit may be applied toward the 33 hours required for the political science major. Only those politi-

cal science courses in which a grade of C or better has been earned may be used to satisfy departmental requirements.

Most university studies courses and lower division political science courses should be completed prior to the junior year. Additional information about the political science major may be obtained from the Department of Political Science office, 136 A&S Building.

### 5 Year B.A./M.A. Program in Political Science

The Political Science 5 Year B.A./M.A. Program is designed to present highly qualified UW students with the opportunity to begin graduate study while they complete their bachelor's degree (whether B.A. or B.S.) and thereby earn a graduate degree more efficiently. Political science majors with a cumulative GPA of 3.200 or higher (and a political science GPA of 3.200 or higher) may be invited to apply at the outset of the second semester of the junior year. Interested students will submit an application and 2 letters of recommendation, at least one from a political science faculty to be reviewed, along with unofficial, current UW transcripts, by the M.A. Director and Committee. Upon provisional acceptance into the program in the junior year, students will be required to take the GRE. GRE scores will be considered for full and final acceptance to the M.A. program, which will be made once the student has completed the bachelor's degree.

Provisional acceptance to the 5 Year B.A./M.A. program in Political Science will allow students to apply up to six credit hours of 5000-level courses toward both the B.A./B.S. and M.A. degree programs. To earn graduate-level credit for a course, students must achieve at least a 3.000 in the course. By successfully completing up to six credit hours of graduate coursework during their senior year, these students will have demonstrated their ability to do graduate-level coursework as undergraduates, easing their transition to the Master's Program in Political Science. Interested students may reserve up to six additional credits for graduate study that do not apply to the undergraduate degree by securing appropriate approvals as explained in the Registrar's "Request to Reserve Coursework for Graduate Credit" prior to taking the coursework. Students will be granted the BA/BS upon completion of the credit hours required for the undergraduate degree in political science. Students must complete the BA/BS before formally entering the MA program. To remain in good standing in the

program, students must maintain a cumulative and departmental GPA of 3.200 and earn at least a 3.000 in all 5000-level courses. Failure to meet the GPA requirements places a student on probation for one semester. If the GPA requirement is not met after that semester, the student will be suspended from the program. Students in the program are encouraged to take the Plan B option. Please see the Graduate Study section to find the degree requirements of the M.A. in Political Science.

### Undergraduate Minors

The department offers optional undergraduate minors in American politics, international relations and comparative government, public law, and political theory. Eighteen hours are required in each minor, including 9 hours of upper-division courses and one seminar. A maximum of 3 hours of internship credit may be applied towards the 18 hours required for the political science minor. At least 12 credit hours in a minor must be from courses *not* being counted toward the student's major. Information relating to specific courses fulfilling minor requirements may be obtained from the Department of Political Science office, 136 A&S Building.

### Teacher Education

The teacher certification program in Secondary Social Studies Education, with a concurrent major in Political Science is available through the College of Education. A minimum 2.500 UW grade point average and a 2.500 grade point average in Political Science and Social Studies content are required to change majors. Further information may be found under the College of Education section in this *Catalog*.

1. Introductory courses for students in other programs who wish an elementary knowledge of psychology.
2. Courses supportive of work in other majors.
3. An undergraduate major that is sufficiently flexible to allow students to prepare for graduate programs in psychology, professional schools (e.g. law, medicine) or for employment after graduation.
4. Graduate course work leading to the Ph.D. in clinical psychology, social psychology, cognition/cognitive development, or psychology and law.

Facilities are available for course work and laboratory experiences in areas of psychology such as cognition, personality, social, biological psychology, cognitive development, and psychology and law.

Students who wish to increase chances of employment related to their undergraduate majors should consult an adviser concerning areas of specialization within psychology.

**Graduate Study**

The Department of Psychology offers the doctor of philosophy in psychology with programs in clinical (APA accredited) psychology, social psychology, cognition/cognitive development, and psychology and law.

**Program Specific Admission Requirements**

The deadline for receipt of all application materials is December 1.

We only admit students one time per year. Our graduate students begin their programs of study in the fall semester.

Although our graduate programs technically consist of separate master's and doctoral degree components, only students who are applying for, and who expect to complete,

the doctoral program are considered for admission. That is, we do not offer a terminal master's degree.

Application materials include the application, one to two page personal statement, undergraduate and graduate (if applicable) transcripts, GRE scores (general and Advanced Psychology subject), curriculum vitae, and three letters of recommendation. An application fee of \$50 is required.

Applications are evaluated based on the applicants' academic qualifications (e.g., GRE scores, undergraduate GPA) and interests. Particular attention is paid to the goodness of fit between the applicant's expressed interests and the particular strengths and offerings of our program.

Our program does not employ a set of formal "cut-offs" with regard to any of the quantitative application elements (e.g., GRE scores or undergraduate/graduate GPA). Often a strong record in one area may make up for a weakness in another area. Applicants interested in information on the qualifications of admitted students should consult the student summary data ([www.uwo.edu/psychology](http://www.uwo.edu/psychology)).

### Program Specific Graduate Assistantships

Applicants are considered for graduate assistantships at the time of admission. Graduate students typically receive some departmental financial support for the first four years.

### Program Specific Degree Requirements

#### Master's Programs Plan A (thesis)

In addition to the general requirements specified in this *Catalog*, the following are required: (1) successful completion and oral defense of a thesis; (2) PSYC 5060. Statistical Methods in Psychology – 3 hours or STAT 5050. Statistical Methods in Biological Science – 3 hours; PSYC 5300. Applied Multivariate Analysis – 3 hours or STAT 5055. Statistical Methods for Biologists II – 3 hours; PSYC 5520. Research Design in Psychology – 3 hours; (3) at least 9 hours in 5000-level courses exclusive of those listed above and exclusive of research and thesis research credit.

A minimum of 30 semester hours is required (26 coursework hours and 4 thesis hours).

## Doctoral Programs

### Professor Emerita:

Gladys M. Crane

Throughout history, religion has played an important role in shaping cultures and societies. Religious beliefs have inspired armies in their wars and leaders in their decisions. Religions have provided the foundation for ethical behavior and in many societies have been the primary source of education. In today's world, religions remain important, influencing our responses to 9/11, the Arab Spring, the Middle East crisis, and other events in regions around the world. Even in our own secular United States, religions and their beliefs play a major role in our debates over public policy.

The Religious Studies department offers a range of courses in the academic study of religions. These courses seek to acquaint students with religious beliefs and behavior, helping them to understand the ability of religions to define the world in which their adherents live and the power religions have to influence the behavior of their followers. Religious Studies courses cover a broad range of religions, both modern and historical. Some courses focus on understanding a single religion in a limited

time period, while others compare aspects of different religions. Yet further courses focus on religious expression, studying how religious beliefs are depicted in literature, film, art and music. Many of these courses are offered by the Religious Studies department, while others can be found in various departments, including anthropology, art, English, history and sociology.

## Undergraduate Major

A major in Religious Studies requires 33 hours (11 courses) plus a second major or minor in another discipline.

### Honors

If a student wishes to pursue an Honors designation in Religious Studies, two additional requirements must be fulfilled.

A) A three-hour Thesis Seminar or Internship, during which a research paper is written, or other suitable research project is carried out.

B) Demonstration of competency in a foreign language equivalent to a fourth-semester college-level course.

Notes:

1. If students majoring in Religious Studies can use its courses to satisfy requirements in a second major or minor, this is permitted.
2. Courses for the major should be drawn from those with a RELI prefix, or from a list of approved courses taught by other departments or programs. See the list of approved courses on the Religious Studies website. In each of the concentrations, only one course may be from outside RELI offerings. Two such courses may be used as electives. Occasionally, courses on religion are taught by outside departments as one-time opportunities. Students may propose these for inclusion in the major to the director of the Religious Studies department.
3. The language requirement may be satisfied with American Sign Language (ASL) or, with the approval of the department, coursework in another form of non-English communication (e.g. computer science, statistics, music composition).
4. All courses must be passed with a grade of C or better.

Sociology is the scientific study of group life and the investigation of the social causes and consequences of human behavior. This discipline occupies a central position in the social sciences and covers the full scope of social behaviors from intimate interactions between individuals to relationships among entire societies. Most importantly, sociology invites students to analyze those features of social existence that we are most likely to take for granted. As such, sociological training imparts critical and analytical skills of great value in virtually all aspects of modern life.

Much of the applied knowledge employed in diverse fields such as communications, social work, business management, family life, health care, urban planning, government, education, religion and the administration of justice derives from basic sociological research. Consequently, sociological training provides an excellent background for occupations connected with these fields. In addition, an undergraduate degree in sociology prepares

many students for advanced study in law, education, business, public administration, social work, pastoral work, health care and other professions.

The department provides a comprehensive sociology education both for students who elect to terminate their formal education with the B.A. and for those who plan to pursue advanced degrees in sociology or a related social science. Fundamentally, however, the department aspires to prepare students for informed participation in an increasingly complex world.

## Undergraduate Major

In addition to University and College requirements, the following are minimum requirements for the undergraduate major in sociology leading to the Bachelor of Arts degree.

**Total Elective Hrs. 9**

## Undergraduate Minor

The sociology minor requires a total of 18 sociology credits including SOC 1000. At least 9 of these 18 hours must be upper-division sociology credits.

Only grades of C or better can be counted toward the minor. Also, A&S students seeking a minor must have 12 credit hours exclusive to the minor and not counted toward their major.

## Honors in Sociology

Sociology majors with a 3.500 overall GPA, a 3.500 GPA in sociology courses and one 5000-level sociology course graduate with honors in sociology. The department also nominates students for membership in *Alpha Kappa Delta*, the international honorary society for sociology. Selection is based on academic excellence.

## Graduate Study

The Department of Sociology offers programs leading to the master of arts degree in sociology under Plan A.

## Program Specific Admission Requirements

Admission based on the university minimum requirements.

## Program Specific Graduate Assistantships

Graduate education allows students to acquire both teaching and research experience. Assistantships are available, upon application, to many incoming students and continued support is contingent on adequate progress in the program.

## Program Specific Degree Requirements

### *Master of Arts in Sociology Plan A (thesis)*

To graduate with a master's degree in sociology, the student must complete a minimum of 26 hours of coursework.

The student is required to take Advanced Social Theory (SOC 5000), Statistical Methods for the Social Sciences (SOC 5070 - no other statistics course can be substituted), and Advanced Social Research Methods (SOC 5100).

The student must also take three elective sociology courses, as well as three additional elective courses that may be outside of the department. In addition, all graduate students must complete a thesis.

Credit for Practicum in College Teaching (SOC 5900) may not be included in the minimum number of course hours.

A minimum GPA of 3.000 is required for satisfactory progress in the program and graduation. Students must earn a grade of "B" or better in required classes.

Students whose undergraduate training in sociology does not include the prerequisites for the required graduate courses may correct the deficiencies by taking such undergraduate courses early in the graduate program. However, such work does not count toward graduation requirements.

Students also are required to write a master's thesis for which they receive a minimum of four hours of credit (SOC 5960). Before undertaking the thesis work, students must write and defend their thesis prospectus before a select faculty committee.

The department emphasizes both research skills that prepare the student for immediate job placement and broad academic work facilitating entrance to doctoral programs.

The curriculum in statistics includes a firm foundation in mathematics and computer science, in addition to course work in statistical theory and methodology. Statistics majors are also required to obtain a minor in an area of application. The nature of statistical work is to design and analyze research projects through the application of the principles of mathematics, computer science, and statistics. The student who wishes to make valid inferences from empirical data will find the field of statistics fascinating and rewarding.

The study of statistics as a separate professional field is comparatively recent. The wide demand for graduates with special training in research and development techniques has fostered development of statistical curricula in colleges and universities. A pioneer in this field, the University of Wyoming is one of the few schools in the nation where a coordinated undergraduate training program in statistics is available.

We expect that students graduating with a statistics degree will be able to: 1) recognize the importance of variation and uncertainty in the world, 2) understand how statistics improves decisions when faced with uncertainty, 3) become proficient with a broad range of statistical tools, 4) develop critical thinking skills that enable application of statistics in new and unusual settings, and 5) communicate effectively. With these skills, graduates will be able to work effectively as statistical professionals and, if desired, successfully pursue further training at the master's and doctorate levels.

Graduates with statistical training are employed in a broad spectrum of areas which include the business world, the sciences (social, biological, physical and health), as well as engineering and education. For this reason, an area of application is required of each student.

The statistics department also offers graduate programs leading to a minor in statistics, and to a Master of Science (Plan A, Plan B), and Doctor of Philosophy in statistics.

All of these programs emphasize the understanding and application of a broad variety of statistical methods on real projects. Students will be provided with numerous opportunities to perform analyses and communicate findings. The M.S. and Ph.D. programs in statistics are grounded in statistical theory.

**Program Specific Admission Requirements**

The prerequisite for admission to graduate study is an undergraduate degree from an accredited institution, including work in mathematics through calculus III, Linear Algebra and at least one second-level class in statistical methods. Prospective students are encouraged to have had Math Analysis and upper level introduction to probability and mathematical statistics. Test scores from the GRE and TOEFL exams are required. The minimum score for the TOEFL is 600 (100 Internet-

based Test) or for IELTS minimum score is 6.0. Students who do not have prerequisites in mathematics and statistics may make up this deficiency at the beginning of their graduate program; however, such work does not count toward graduation requirements.

### Degrees Offered

The Department of Theatre and Dance offers curricula leading to the B.A. degree and the Bachelor of Fine Arts and courses which fulfill a part of University Studies and various colleges' requirements, including the College of Arts and Sciences.

### Curricula

Students may not take a course for S/U credit to satisfy course requirements in the major. This does not apply to courses offered for S/U only. Requirements for students majoring in the areas of the department are indicated below.

### Theatre

The study of theatre provides students with a broad understanding of the art of theatre appropriate to theatre's position as a fine art in a liberal arts college. The study of theatre is considered to provide a basis for more specialized theatre study in a graduate or professional school. The liberal arts education in theatre together with extensive experience in the production program also provides the foundation for a professional career in theatre, motion pictures, or television drama for those individuals with special desires and abilities. Secondary teaching certification in theatre can be obtained through this program of study.

### Dance

The dance concentration within the Department of Theatre and Dance is designed to provide students with a broad foundation in the humanities and specific emphasis in performance and production aspects of dance. Students pursuing this course of study will have opportunities to attain technical competency in ballet and/or modern dance, to perform in yearly dance productions, to obtain practical experience in the fundamentals of teaching dance and to gain experience in technical theatre as an aid to dance production. The program seeks to provide a comprehensive

view of dance as an artistically expressive medium, as well as a creative and recreational tool to human expression.

Students completing this program will qualify for more advanced private instruction as well as advanced academic instruction.

All dance students are matriculated into the BA degree. Students wishing to apply for the BFA in Dance Performance or BFA in Dance Science do so the second semester of their freshman year.

The Department of Zoology and Physiology offers a variety of courses in the biological sciences that encompass many aspects of animal form, function, and biology.

Whether you are interested in the intricacies of cell biology or the complexities of ecosystem functioning and whether you want to become a wildlife biologist or a physician, we offer a major that will suit your needs. Students can choose from four undergraduate degrees: biology, physiology, wildlife and fisheries biology and management, or zoology. Course requirements for each degree are detailed on our website: [www.uwo.edu/zoology](http://www.uwo.edu/zoology).

**Undergraduate Degrees*****Physiology Major***

Physiology is the study of how animals work: how they breathe, feed, interact with their environment, and carry out many other activities and functions. Physiology is the knowledge that the health sciences are built on and so is especially important for students who may be thinking of becoming medical practitioners, veterinarians or health care professionals. In addition to the University and College of Arts and Sciences requirements, a degree in physiology typically involves the following courses:

***Freshman and Sophomore Years***

Students take introductory courses in biology, chemistry, physics, and mathematics as these are essential for understanding physiological processes. Students begin the study of physiology with Human Systems Physiology which focuses on how the cardiovascular and respiratory systems function.

***Junior and Senior Years***

Students take Integrative Physiology, which is concerned with how the body regulates such functions as reproduction or blood glucose concentrations.

Students can specialize in an area of physiology they find particularly interesting. The department has strong expertise in neuroscience physiology, cell physiology, ecological and comparative physiology. For details, visit our web site.

At the end of this program students will have a thorough knowledge of physiology, will be well prepared to enter health sciences or graduate education, and will have a range of skills attractive to employers.

***Wildlife and Fisheries Biology and Management Major***

Wildlife and Fisheries Biology and Management is a professional degree designed to prepare students for state, federal, and other positions in resource management and conservation biology. The degree provides students with knowledge of the natural world, understanding of processes governing dynamics of wildlife and fish populations, as well as an appreciation of human-mediated effects on wildlife and fish populations. A student graduating with this degree will be familiar with the theory of resource management as well as with methods used to determine population status, habitat quality, and conservation. In Wyoming the abundance of wild animals and pristine habitats provide a unique natural laboratory for studying the responses of wildlife and fish populations to changing climates and habitats.

In addition to the University and College of Arts and Sciences requirements, a degree in wildlife and fisheries biology and management typically involves the following:

***Freshman and Sophomore Years***

Students take introductory courses in biology, chemistry, physics, and mathematics as these provide essential tools for understanding ideas and processes in wildlife and fisheries biology and management.

Students begin the study of wildlife and fisheries biology and management by taking courses in resource management, natural history of vertebrates, physiology, genetics, and evolution, as these subjects provide the underlying principles of population dynamics and the mechanisms of evolution.

***Junior and Senior Years***

Students can elect to concentrate in those areas of wildlife and fisheries biology and management they find most interesting and can specialize in a terrestrial or aquatic option. For details, see our web site.

A student graduating with a degree in WFBM will have comprehensive knowledge of wildlife and fisheries biology and management, will have earned a degree that is compatible with the requirements for professional certification with the American Fisheries Society or the Wildlife Society, and will have a range of knowledge and skills that are valuable to potential employers.

***Zoology Major***

Zoology is the study of animals: their structure, physiology, development and evolution. One of the enduring fascinations of zoology is that we can learn so much about ourselves and our environment by studying what our fellow creatures do.

In addition to the University and College of Arts and Sciences requirements, a degree in zoology typically involves the following courses:

***Freshman and Sophomore Years***

Students take introductory courses in biology, chemistry, physics, and mathematics as these provide essential tools for understanding zoological ideas and processes.

Students begin the study of zoology by taking courses in anatomy, physiology, genetics, ecology, and evolution, as these subjects provide the underlying principles of the mechanisms of evolution, and animal structure, function, and ecology.

***Junior and Senior Years***

Students take courses in five main areas: invertebrate zoology, ichthyology, herpetology, ornithology, and mammalogy. For details of these and other courses see our web site.

At the end of this program students will have a comprehensive knowledge of zoology, will be well prepared for graduate education, and will be equipped to enter any of the many employment opportunities that are available.

**Learning Outcomes for Undergraduates**

The learning outcomes that direct the teaching of the department's degrees and which we expect our graduates to have acquired are:

- Competence in basic sciences;

- Competence in the content of the specific courses that constitute the principal knowledge of the degree;
- Ability to comprehend, analyze, and interpret biological data where appropriate; and
- Ability to synthesize information from the biological literature, and communicate it effectively in writing or orally.

## Undergraduate Minor

Minors in zoology, physiology, wildlife fisheries biology management, and neuroscience are offered. Contact the department for further information or see the web site [www.uwyo.edu/zoology](http://www.uwyo.edu/zoology).

## Graduate Study

The Department of Zoology and Physiology offers programs leading to the master of science and the doctor of philosophy in zoology and physiology. We also participate in graduate programs through the Neuroscience Program and the Program in Ecology.

## Program Specific Admission Requirements

Admission is open to all students who meet the minimum requirements set forth in the admissions section of this *Catalog*.

Research and teaching assistantships are available for graduate students working toward the M.S. or Ph.D. degrees. Applicants can apply for this financial assistance at the time they apply for admission to graduate standing. Applications must be completed by February 15 in order to be considered for the following academic year.

Information on how to apply to the graduate program in the Department of Zoology and Physiology is detailed on our web site. Begin by identifying a faculty member in our department whose research interests are similar to yours. We will only consider an application if a faculty member has indicated a willingness to serve as the student's adviser. After finding a potential adviser, e-mail a completed departmental application form, a copy of your curriculum vitae, copies of college transcripts, recommendation letters and GRE scores to him or her. Our graduate admissions committee will review all applications and make decisions on admission based on the availability of funding and a commitment from a faculty member

to serve as the adviser. Students recommended for admission will then be asked to fill out an application to the University of Wyoming and pay a non-refundable application fee.

Consult the website, [www.uwyo.edu/zoology](http://www.uwyo.edu/zoology), to find out about faculty research.

## Program Specific Degree Requirements

### *Master's Program Plan A (thesis)*

Includes 26 hours of coursework and 4 hours of thesis research.

Applicants should have at least 20 semester hours of undergraduate work in zoology, physiology, or other areas of the biosciences and have completed introductory courses in mathematics, chemistry, and in at least one other natural or physical science. Early in the second semester the student must file a program of study with the university and have a graduate committee appointed. Plan A candidates shall orally defend the thesis before the graduate committee.

All M.S. candidates will be required to complete credit in two graduate seminars. A student may enroll in more than one of these required seminars during one semester or academic year.

After two semesters in the department, a Plan A master's candidate may request permission from the department's graduate advisory board to proceed directly to the Ph.D. degree; however, such a bypass is granted only by the department head after considering recommendations from the graduate advisory board.

Zoology and physiology may be used as a field by a candidate working for the interdisciplinary master of science in natural science in the College of Arts and Sciences and the College of Education.

### *Plan B (non-thesis)*

Includes 30 hours of coursework.

The program for the Plan B is established by the student and a faculty adviser and must be approved by the department head during the student's second semester or summer session.

The graduate committee will require the candidate to take a written examination. An oral examination may also be required. The final examination is comprehensive, covering all areas of zoology, but emphasizing one major area.

## **Doctoral Program**

This is a 72 hour program.

A Ph.D. applicant must have 20 hours of undergraduate work in zoology, physiology, or other areas of biology and also have completed substantial undergraduate work in other sciences. Under exceptional circumstances, a student with an undergraduate major in a scientific discipline other than biology may be admitted. After the Ph.D. student has completed two semesters of graduate work, s/he must be approved for continued work toward the doctorate by the graduate advisory board. This board can reconsider a candidate thereafter if it so desires.

A graduate committee shall be appointed for the individual student no later than the third semester. After consultation with the student, this committee will prescribe special requirements (courses, minors, research tools, etc.) that must be fulfilled. At this time, the graduate committee shall consult with the candidate on the proposed research and shall identify the subject matter areas to be included in the preliminary examination. The preliminary examination will consist of a written research proposal, its oral defense, and a written and oral preliminary examination. When training outside zoology and physiology is specified by the committee, certification of satisfactory completion of the requirement will be made by the appropriate department.

In addition to the general university requirements for the Ph.D. degree, the department requires the following:

The coursework program should include work in a discipline outside the department, generally in the sense of a minor, to be identified in consultation with the graduate committee.

The preliminary examination consisting of written and oral portions should be taken no later than midterm of the fourth semester in residence. The graduate committee will certify satisfactory performance for the preliminary examination.

The dissertation must be received by each member of the graduate committee three weeks before the final dissertation seminar. As oral defense of the dissertation, the candidate will deliver a formal 50 minute seminar on original research from the dissertation. The seminar will be followed by an examination by the graduate committee.

Some time during their degree program, all Ph.D. candidates will be required to complete credit in three graduate seminars. A

student may enroll in more than one of these required seminars during one semester or academic year.

All candidates for the Ph.D. degree shall be required to teach for one semester during their program.

The dissertation may be written in a format suitable for publication in a journal and the usual extensive literature review, description of study sites, technical details, raw data, supporting figures, charts, and photographs should be included in a well-organized appendix. (See also format requirements by the university.)
