

Master's Degree in Middle-level Science

designed for those who believe there are always new things to learn and better ways to teach

Now Accepting Applications

Apply now to begin this summer at the University of Wyoming. SMTC graduate programs support practicing teachers in deepening their understanding of effective teaching and learning while achieving their professional/career goals. Visit our [MSC webpage](http://www.uwyo.edu/smtc/graduate-programs/) for program and application information (<http://www.uwyo.edu/smtc/graduate-programs/>) or email (smtc@uwyo.edu or Dr. Ana Houseal, ahouseal@uwyo.edu) for more information.

How will a master's degree in Middle-level Science benefit me?

Learn about
**3-dimensional,
phenomenon-
based science
instruction**

Build content
knowledge in

Personalize your MSC Program Outcomes!

Would you like to earn a **Master of Science degree** and a **middle-level science endorsement**?

Yes!

What do I need to do to make that happen?

Complete a **"Plan B" alternative thesis project** tailored to your interests and needs.

Complete science content and education **course-work.**

No.

I'm interested in an endorsement to increase my versatility, but not a Master's.

Complete science content and education **course-work.**

Coursework is offered on a rotating cycle that students can complete in 3 years. Those who are working fulltime typically take an additional semester to complete their Plan B project. Students attend in-person classes in Laramie for 4 weeks in June each summer.
