

Wyoming Telehealth Provider Needs Assessment Spring 2020

This survey was created by the Wyoming Telehealth Network to assess Wyoming provider telehealth needs.

This report summarizes the 295 responses received from telehealth providers between May 13 - July 8, 2020.

Average number of years as a healthcare provider: 19.71

Average number of years providing telehealth services: 1.79

Patient and Provider Telehealth Usage

- 59% of patients are being seen via telehealth across all providers
- 24% of providers currently using 100% telehealth
- 12% of providers currently using 0% telehealth
- 57% of providers currently at or above 50% telehealth

Changes in Telehealth Use in the Next 3 Months

Providers are already using telehealth at a very high percentage and they generally anticipate staying at this level or even increasing in the near future.

Provider Experiences in Implementing Telehealth

Provider Experiences in Implementing Telehealth

- Implementation has been smooth for many participants
- Steep learning curve but time and trainings have helped
- Highly effective for certain groups of patients

Challenges in Implementation

Wyoming Telehealth Network

The Wyoming Telehealth Network (WyTN) increases access to telehealth technology, resources, and education so that Wyoming residents can have better healthcare.

The WyTN is a legislatively mandated activity of the Wyoming Telehealth Consortium and is financially supported through the Wyoming Department of Health, Office of Rural Health and the College of Health Sciences, Wyoming Institute for Disabilities.

The WyTN acts as a hub to connect everyone with an interest in telehealth. Additionally, the WyTN improves implementation of telehealth in healthcare practices through technical and procedural support and technology provision.
