

FINANCIAL REPORTING

The implementation of WyoCloud will be accompanied by an array of reporting tools that will allow UW employees to view operational reporting data as well as perform analyses that will enhance our strategic decision-making capabilities. There will be four main reporting tools available to UW employees that will be released over the next few months:

WyoCloud Transactional Reporting

1. Business Intelligence Composer

Ad-hoc data composer tool that allows users to create ad-hoc queries directly within Fusion.

2. Business Intelligence Publisher (BI Publisher)

Pixel perfect reports for widespread distribution in PDF format of real-time data.

3. Oracle Transactional Business Intelligence (OTBI)

Interactive user interface that allows users to review and query real-time data directly from Fusion.

Available...

July 18th

WyoCloud Business Intelligence (BI) Reporting

4. Business Intelligence Cloud Services (BICS, BI Apps)

BICS is the primary analytical reporting tool that allows users to view trend information from the data warehouse.

August
28th

Note: The University of Wyoming is still working through security and access to determine who at the University will have the ability to create their own custom reports in the tools described above.

For more information on Financial Reporting and WyoCloud, you can:
