Announcement Title: WyoCloud Planning and Budgeting System Campus Townhall on 12/12

Over the last six months, the University of Wyoming Budget Office and WyoCloud team have been busy developing the new WyoCloud Planning and Budgeting system to be released on January 22nd, 2018. In preparation for the new system's release, the WyoCloud team would like to invite the campus community to attend a townhall on **Tuesday, December 12th from 9:00 – 10:30 AM** in the **Berry Center Auditorium (room 133)**.

The UW Budget Office will share more details about how the WyoCloud Planning and Budgeting system will streamline and simplify the integrated budgeting, planning, and forecasting processes to support the University's strategic plan and enhance data informed decision making. The townhall will also feature a demonstration of the system and an opportunity for campus to ask the WyoCloud team questions.

For more information, please visit the [Planning and Budgeting page](#) on the WyoCloud website.
