MAGGIE RINGLEY

BACTERIOLOGY

for 11 months

Hometown: Richmond, IN

Major:

Microbiology & Animal
and Veterinary Sciences
w/ Pre-Vet Concentration

Expected Graduation:

Fall 2021

What do you like about working here?

I like seeing the different organisms that grow from samples and being able to see cases from start to finish. I also really like the work atmosphere!

What are your hobbies or something we don't know about you?

I love to travel and share the knowledge I have learned with others! I also help Spanish speaking students learn English whenever I get the chance to travel and help!

What are your future plans?

I plan to attend veterinary school and go the mixed animal route so I can still help companion animals while helping with food animals in third world countries!
