

WYOMING STATE VET LAB FEATURED STUDENT OF THE MONTH

RILEE CLARK
FEBRUARY 2026

DIAGNOSTIC SEROLOGY

Worked here for: 4 months

Hometown:

Rifle, CO

Major:

Animal and Veterinary Science
with a concentration in
Embryology

Expected Graduation:

May 2029

What do you like about working here?

I enjoy being able to work on the flip side of what my future job will be. I've worked as a medical assistant and drawn blood, so being able to run tests and see what happens on the backend has been incredibly interesting and helpful. It's given me a better understanding of the full diagnostic process and how lab results directly impact patient care. I also find it helpful to learn about diseases my own cattle could get, and how they can be tested.

What are your hobbies, or something we don't know about you?

I love showing livestock and spending time working with my cattle. Agriculture has always been an important part of my life, and I'm passionate about cattle reproduction and herd improvement.

What are your future plans?

After graduating from UW, I plan to attend a perfusion school at the University of Nebraska-Lincoln. After completing my master's program, I hope to return home and work as a perfusionist while also operating my own embryology business focused on cattle reproduction.
