Cheyenne, WY

**Major:**

Animal and Veterinary Science with  
a double concentration in Pre-  
Veterinary Medicine and Animal  
Biology and a minor in Equine  
Science

**Expected Graduation:**

May 2027

## What do you like about working here?

I enjoy learning the diagnostic side of veterinary medicine, and then being able to apply that knowledge to the clinical side. Working in the lab has provided me with a much more complete understanding of what all goes into a diagnosis. As we get cases in, I really enjoy reading the history and coming up with my own top differentials.

## What are your hobbies or something we don't know about you?

In my free time I like to do horse and cow things, in the past year I started training my first horse, a BLM mustang named Tombstone or Mr. Curly Fries.

## What are your future plans?

I hope to attain my DVM from Colorado State Veterinary School and go on to become a veterinarian for all animals great and small.
