

WYOMING STATE VET LAB FEATURED STUDENT OF THE MONTH

**LIZ BOHLKEN
NOVEMBER 2024**

VIROLOGY/ CELL CULTURE

Worked here for: 9 months

Hometown:

Wymore, NE

Major:

Animal Science with focuses in
Production and Range
Livestock

Expected Graduation:

May 2027

What do you like about working here?

I love how working here is so flexible with my class schedule, I also like that I get to learn about diagnostic testing and how it works, which is something that I probably wouldn't have gotten the experience to learn much about without working here.

What are your hobbies or something we don't know about you?

I absolutely love getting to work with cattle- whether it's my Scottish Highland cows, my family's commercial beef cattle back home, or anytime I get to work with cows in my classes, I love working with and learning more about cattle. I also enjoy working alongside my family on our farm back home whenever I get the chance.

What are your future plans?

I know for sure that I want to continue to raise cattle in the future, but I'm not sure yet what I want to do for a career outside of that.
