What do you like about working at the lab?

There are so many opportunities to learn about the diagnostic component of veterinary medicine, that I wouldn't get else where. I enjoy applying things that I have learned, in the clinical or classroom setting, to cases on the necropsy floor. Working with the Pathologists, our supervisors, and other students helps to create awesome connections and friendships!

Hobbies/something we don’t know:

I really, really, really hate pizza.

Future Plans:

I plan to attend veterinary school, and I aspire to be either a large animal veterinarian or an embryologist.
